

Docket #00D-1598, 00N-1396

I write to express my strong suggestion that all genetically engineered foods be LABELED as such.

Citizens of the European "Union" are strictly opposed to such foods and food products. These nations, as we know, have ~~highly reputable~~ ^{excellent} education systems whose students outperform American students in many areas, specifically SCIENCE.

As an intelligent American, why should I accept genetically modified foods at all? The public has not been given enough information on HOW they are different, long-term consequences and so on.

I support the moratorium on GE foods, along with the majority of American consumers.
