

Docket # 00D-1598, 00N 1396

Feb 22, 2001

Dear FDA Commissioner,

In a culture that purports to be free
and open, I find it shocking that our
consumers are being subjected to such a
large and serious experiment as genetically
engineered food represents. It is unthinkable
that, furthermore, it is done without our
consent or even ^{our} knowledge. Please require
labelling ASAP.

Thank you
