ROCKVILLE MD 20852

Dear Commission:

The FDA has a lot of standards and here you have none on genetically engineered food. Why not? It is **NOT** the same as regular seed for food. Its been tampered with my men.

This food should be tested and labeled. What are you afraid of?

It is not right that you take chances with our food. It is no different than Thalidomide. Now we're finding so much antibiotics in our water that it is scandalous that you permit such activity. Is it money over health? Where is our protectors?

Its time to do your duty in protecting the public from untested and unlabeled genetically engineered food.

We demand that you take right action and stop experimenting with the publics' health.

Sincerely,

KENNY CHIROPRACTIC HEALTH CENTER
