

FDA : RE: New Rules GE Foods 2-28-01

- 1) We need mandatory pre-market safety Testing  
(otherwise many of us will boycott food producers)
- 2) We need mandatory pre-market environmental  
review (We will not tolerate Earth ecocide)
- 3) We need mandatory labeling of GE foods  
(We have a right to know!)
- 4) The "Notification" policy is an insult to consumers  
(You are putting industry interest ahead of  
consumers)

Testing + labeling of GE foods is necessary  
for overall health + safety of people + planet.
