Dear Regulator

0037 '01 MAR -6 11:36

I want to voice my concern

about the new organic regs - the

notification in a must to consumers

as in the lack of mandatory labeling -

what will it take - a few deaths from

allergic shock to get regulators notice?

But it's the more subtle effects of

food sensitivities - lay terms + lay labeling

that are more pervasive. We need

testing + labeling of GE food. Period.

00N-1396
