DEAR Commissioner,

0036 '01 MAR -6 11:36

I have recently become more aware of the potential dangers of genetically-engineered foods. I would like to avoid using these foods myself.

Therefore I urge you to require labelling of genetically-modified foods so that people like me can choose to avoid them if we so desire.

Since this technology may cause unforeseen health risks, I also advocate pre-market safety testing. Please protect the rights of consumers.

Thank you!
