

Docket # 00N-1396, 00D-1598

I am writing to voice my serious concern about genetically engineered foods.

I believe that any such foods ³¹⁶ ⁰¹ ^{MAR 13} ^{11P:48} MUST be clearly & comprehensively labeled. Throughout history there have been numerous examples of previously - thought "safe" foods & methods of food production that later turned out to be unsafe. We must protect the consumer's right to make their own decisions about what they're eating.
