

Dear FDA,

3/3/01

I am opposed to FDA's approach to genetically engineered (GE) foods. Voluntary labeling and notification are inadequate to protect my health.

All GE foods should be labeled so I have a choice. This includes food ingredients also.

GE foods should be required to undergo ~~OF~~ ~~MARK~~ ~~TESTING~~ ~~MARKET~~ testing.

No GE foods should be marketed without long term studies showing they are safe for human health & the environment. Thank you.
