RE: Docket #OOP-1211/CP1

Dear Ms. Henney,

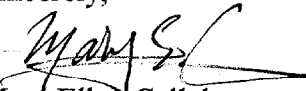

Please help me and other concerned Americans eat healthful food and avoid allergies and illness. Don't make us unwitting participants in experiments like the StarLink™ genetically engineered corn "experiment", wherein this unapproved, untested, unlabelled and possibly harmful substance turned up in products available in supermarkets across the country.

It is the people in the EPA and FDA offices who have the capacity to protect their fellow citizens and create legislation to make this country a better place. Please take a stand to end corporate control of this country by demanding that people's health and happiness be put ahead of growth and profits.

I demand mandatory pre-market testing, environmental review and labeling of all genetically engineered foods.

The public has a right to know what it is eating and to choose healthful food. Thank you for your help.

Sincerely,

  
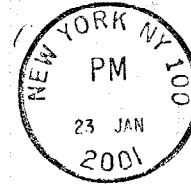

Mary Ellen Callahan
