

Consumer Right to Know—One Million in '98 Campaign

Securing the Mandatory Labeling of Genetically Engineered Foods

Dear Friend,

In July 1997 a letter was sent to the mainstream food retail industry to garner their support for the mandatory labeling of genetically engineered foods from the Consumer Right to Know Initiative. The Initiative was mounted by leaders from every corner of society and every part of the country. The list of signees now has over 150 names and is still growing. Businesses and organizations throughout the nation have also begun to take an active role in the Campaign. We would like to invite you and your colleagues, organization or business to join in.

Our goal is to get 1000 names on this VIP list and 1,000,000 signatures on our grass roots petition by Thanksgiving this year. We look forward to hearing from you and welcome your support.

Sincerely,

Laura Ticciati
