Dear Sec. Shalala,

I strongly protest the production of irradiated food! 77% of Americans don't want it! No! to radioactive cesium-137-waste! It was the most stupid, greedy idea to ever start nukes in the first place such deadly toxin. Nuked foods: ① Deplete nutrients in food ② Creates mutant life forms, ③ Kills beneficial microorganisms, ④ Masks filthy slaughterhouse conditions, ⑤ Marginalizes already struggling family farmers, ⑥ Creates "unique radiolytic products" ⑦ Forms toxins such as formaldehyde, benzene & formic acid & ⑧ Creates carcinogens (aflatoxins) & toxic splanine. 88.6% of Americans want labels on nuked food. Why aren't you listening? - Are you being paid?

Earth First, Profits Last!

Your attention to this most urgent matter would be much appreciated.

Thank-you,

Lydia
