Re: **Genetically Engineered Salmon**

Dear Dr. Schwetz:

Approval for genetically engineered salmon to be produced or sold in this country should be denied!

Why is your agency allowing the biotech companies that stand to profit from the selling of these foods gauge their safety? This is absurd!

I can't believe the insanity of tampering with nature and millions of years of evolution. Are we as a species really this stupid and greedy? It seems so.

Is your agency so corrupted by the biotech industry that you are willing to completely ignore your responsibility to the American people and this planet!

NO GENETICALLY ENGINEERED SALMON!

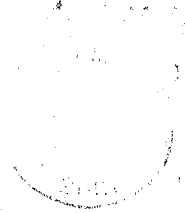

LABEL GENETICALLY ENGINEERED FOODS!

Thank you.
