

What is a Partial-Birth Abortion?

The partial-birth abortion procedure is used after 20 weeks (4½ months) of pregnancy—often to six months, and even later. The difference between partial-birth abortion and homicide is a mere three inches . . .

1
Guided by ultrasound, the abortionist grabs the baby's leg with forceps.

2
The baby's leg is pulled out into the birth canal.

3
The abortionist delivers the baby's entire body except for the head.

4
The abortionist jams scissors into the baby's skull. The scissors are then opened to enlarge the hole.

5
A suction tube is inserted. The child's brains are sucked out, causing the skull to collapse. The dead baby is then removed.

01P-0075
Please withdraw all morning - after abortion pills + please don't make them over - the - counter pills, because they do not prevent abortions; they are abortions. Life begins at the very moment of Conception. God gives life + only God should take it away. God bless you + help you with correct decisions. Sincerely,

C173
Sister M. Laureen Farrow

Who wants over-the-counter abortion:

The organizations petitioning the FDA to allow sales of the morning-after pill without a doctor's prescription include a who's who of groups that favor abortion:

- American Public Health Association
- Center for Reproductive Law and Policy
- Family Planning Council
- National Abortion Federation
- National Abortion and Reproductive Rights Action League
- National Organization for Women
- Planned Parenthood Federation of America
- Planned Parenthood affiliates nationwide
- Population Council
- Sexuality Information and Education Council of the United States

All these promote abortion

Presenting Life in Against God's Law

What the pro-aborts say:

"Aspirin, which is known to cause overdose deaths, is more dangerous to use than emergency contraception," said Bonnie Scott Jones of the Center for Reproductive Law and Policy.

David A. Grimes, M.D., identified by CRLP as "a leading health care expert," said the morning-after pill could reduce "unwanted births or abortions" by as much as half.

But the doctor who developed the morning-after pill regimen, A. A. Yuzpe, wrote in a medical journal that "abortifacient effect [of the morning-after pill] ... must be considered."

> UNFOLDING THE ROSE

- > It is only a tiny rosebud,
- > A flower of God's design;
- > But I cannot unfold the petals
- > With these clumsy hands of mine.

- >
- > The secret of unfolding flowers
- > Is not known to such as I.
- > GOD opens this flower so sweetly,
- > When in my hands they fade and die

- >
- > If I cannot unfold a rosebud,
- > This flower of God's design,
- > Then how can I think I have wisdom
- > To unfold this life of mine?

- >
- > So I'll trust in Him for His leading
- > Each moment of every day.
- > I will look to him for His guidance
- > Each step of the pilgrim way.

- >
- > The pathway that lies before me,
- > Only my Heavenly Father knows.
- > I'll trust Him to unfold the moments,
- > Just as He unfolds the rose.

- >

What the real experts say:

“These drugs achieve their primary anti-fertility effect by destroying a new and distinct human being—with a unique genetic code different from the mother’s and father’s—after the process of fertilization has taken place, but before the child has nestled into the mother’s womb.” This quote is taken from the “Physicians’ Statement on the Morning-After Pill,” a document endorsed by more than 100 doctors.

In a statement concerning the method by which this drug operates, Canadian Physicians for Life reports, “The common description of the morning-after pill as emergency contraception fails to accurately describe its abortifacient action and is misleading the public. It is a basic fact of human embryology that life begins at conception.”

Cardinal Alfonso López Trujillo, prefect of the Pontifical Council for the Family, said, “The process of human life does not begin with the embryo’s adherence to the maternal womb, but before, at the very moment of conception. Hence, to talk about ‘impeding implantation in the uterus’ is nothing but a euphemism in an attempt to disguise abortion.”

National Day of Prayer Task Force

Here's what Mr. Bush and his White House advisors need to learn about partial-birth abortion:

Pro-abortion Lies

Partial-birth abortion is sometimes needed to save a mother's life.

Partial-birth abortion is a very rare procedure.

Partial-birth abortion is used only to help extreme medical cases.

Partial-birth abortion is mostly used on babies with gross deformities.

Partial-birth abortion is just another form of legalized abortion.

The Truth

There's never a medical benefit from partial-birth abortion!

Partial-birth abortion kills 20,000 babies annually!

Partial-birth abortion supplies body parts for researchers!!

Most partial-birth abortions kill healthy, viable, normal babies!

Even many pro-aborts agree that this is really infanticide!

Everything is in place to make this partial-birth abortion ban happen!
