

9 March 2001

FDA Commissioner:

New proposed rule on G.E. foods is wrong!!

Consumer cannot discern if all G.E. foods
and food ingredients are not so labeled.

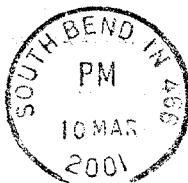

How can I be sure that G.E. foods are
safe if they are not subject to mandatory
pre-market safety testing?! Isn't that one
of the reasons your agency was created?

I am in favor of a moratorium on ALL GE FOODS
until long term testing can establish that they are safe.

Thank you for reading my note.
