

Dear FDA,

March 12 2001

I hope you will have all genetically engineered foods labeled so I can choose not to buy them.

I am not buying beef anymore... because what happens in Europe eventually happens here. We are getting their products.

The big food companies tell us their beef is safe and genetically engineered foods are safe because they don't want to loose money.

I am becoming more vegetarian in daily meals - probably healthier - and now soya beans may be genonically altered!

Does that ~~mean~~ mean I have grow my own food more and more. I will.

Thanks for reading this.

Sincerely,
Robert Mohr
