

Comments on Dockets #'s OOD-1598 &

00N-1396

Dear Commissioner,

The FDA should be a regulator, not a protector of the economic interests of biotech cooperations.

Please require labeling + premarket safety testing of genetically-engineered foods. We have a right to know what is in the food we buy + if it is safe.

this safety issue has not been adequately addressed. Consumers have a right to support businesses

that choose to use non-GE foods. Label the food + let the free market decide where to put our money for a change!

Sincerely,
Michelle Collins, 123 Yale SE, Alb.
