

Dear FDA:

13 March 2007

I strongly oppose the FDA's new rule & guidance on genetically engineered (GE) foods. The agency's voluntary labelling & notification proposals are grossly inadequate & pose a threat to public health, the environment & the ideals of an informed democracy. Please pursue the following immediately:

- All GE foods & food ingredients must be completely labeled in order to allow us to make informed choices.
- All GE foods should be subject to independent pre-market testing. (Duh.)
- There must be a moratorium on GE foods until their potential long term effects are fully understood. Thank you,
Dave G
