

Docket #15 OOD-1548 2/3/01
Dear Commissioner; and CON-1396

The FDA should not promote the food industry but regulate it. I am very anxious about genetic engineering on foods, pesticide use, weed killer Roundup Ready on soy and or genetically engineered soys, etc.

I ask you to require both labeling and pre market safety testing of these foods with unforeseen hazards health risks cancer producing foods.

Sincerely Jeanette Oliver

OOD-1548
