

Docket # 00D-1598  
00N-1396

Dear Commission:

As shown with the Monarch Butterfly  
and other incidences, ~~the~~ genetically altered  
food is not safe ~~at~~ at any stage of its  
development or consumption. This  
~~is~~ unwholesome component should  
never enter our food supply. But if it  
does, it must be clearly appropriately  
labeled as all products, for the consumer's  
protection. Thank you, Sandra Freeman

00D-1598
