MULTIPLE CHEMICAL SENSITIVITY

I have seizures or attacks every time I go out in public due to multiple chemical sensitivity. I wear a mask, but I still have them, Different chemicals affect me in different ways, very bad headaches (some like migraines), hands and feet swell, sleeping spells, lungs won't expand 80 I can breathe, whole body jumping and jerking, one side of the body will go numb as if having a stroke, real bad vertigo, slurred speech, blurred vision, throat swells almost shut, pulse racing or decreases, short term memory loss, loose muscle control, chest pain (like having a heart attack) making the body immobile, feet flipping out of control. I am in pain 24 hours a day, Some seizures or attacks make it almost unbearable to stand the pain. Since I can't smell it is impossible for me to protect myself. When I have a seizure or attack, I have to ask the people what they have on. I have been keeping a list of things as I come into contact with, that I'm almost positive affect me.

Demeral, aspirin, novacain, dental gas, pesticides, cortisone, predisone, albuteral, Oil of Olay, Mary Kay, Jergens Lotions, Shara Michales-Fressia, T Jours Mouri, White Diamonds, Opium, Artistry, Stetson, Old Spice, Mennens, Calalyst, suntan lotions, Clairal Herbal Essence products, body washes, hair sprays, deodorants, bath soaps, (all)409, Shower Shine, Scrubbing Bubbles, Most all of the seizures or attacks affect the nervous system while standing or trying to walk. I don't know what products or chemical cause the affect like stroke or heart attack. In fact, I don't know what products cause 99% of the seizures or attacks while in the grocery store, postoffices, and other places because there are to many people around.

I need tests for antibiotic, anesthetic, and chemicals, but Medicare will not pay for' them.

Doctors say they don't know how to help me as I have a reaction to everything. My only medication is, vitamins, minerals, herbs, essential oils, gamma globulin, and B-12, B-complex shots.
