

# Detection of Hexavalent Chromium With Microcantilevers

**Contact: Thomas Thundat ([thundattg@ornl.gov](mailto:thundattg@ornl.gov); 865-574-6201) and Lal Pinnaduwege ([pinnaduwegla@ornl.gov](mailto:pinnaduwegla@ornl.gov); 865-574-6540)**  
**Funding Source: DOE National Energy Technology Laboratory**

- First use of a single cantilever for chemical detection in the presence of interferences
- Detection of chromate in water samples from the DOE Hanford site
- Detection limit below the EPA regulated levels ( $<5 \mu\text{g/L}$ )
