Year 1999; Notice**

## DEPARTMENT OF EDUCATION

[CFDA No: 84.051]

**Office of Vocational and Adult Education, National Research Centers (National Centers and Centers); Notice Inviting Applications for New Awards for Fiscal Year (FY) 1999**

**NOTICE TO APPLICANTS:** This notice is a complete application package. Together with the statute authorizing the program and the Education Department General Administrative Regulations (EDGAR), the notice contains all of the information, application forms, and instructions needed to apply for a cooperative agreement under these competitions.

**SUMMARY:** The Secretary invites applications for two new awards for FY 1999 under the National Research Centers authority of sections 114(c)(5) and (6) of the Carl D. Perkins Vocational and Technical Education Act of 1998 (Act) and announces deadline dates for the transmittal of applications for funding under that program authority. The Secretary plans to hold two separate competitions for the National Centers, with the same closing date. Applicants may apply under one or both competitions.

**PURPOSE OF PROGRAM:** Sections 114(c)(5) and (6) of the Act authorize the Secretary to establish one or more National Centers for the purpose of conducting research, development, evaluation, dissemination, and professional development activities, designed to improve the quality and effectiveness of academic, vocational, and technical education in secondary and postsecondary institutions.

Given this flexibility, the Secretary has endeavored to design Centers that would best address the statutory requirements while meeting the most important needs of the vocational and technical education community. For assistance in accomplishing this goal, the Secretary sought the views of interested parties. First, the Secretary invited public comments and suggestions on how to configure the National Center or Centers through a notice published in the **Federal Register** (March 1, 1999 (64 FR 10076)). Second, the Secretary actively solicited the views of prospective customers of the Centers, especially those of States, in accordance with section 114(c)(5)(A) of the Act. The Secretary held individual and group consultation sessions with representatives of community colleges and State vocational and technical education programs, practitioners, researchers, policy makers, and

disseminators. The interest and enthusiasm of persons expressing views provided for a very rich exchange of very thoughtful ideas that the Secretary found invaluable when making decisions about the scope and structure of the National Centers. A summary of the comments and suggestions received by the Secretary are on the Internet at: <http://www.ed.gov/offices/OVAE/ncrperk111.html>.

One of the most substantive decisions facing the Secretary in implementing sections 114(c)(5) and (6) of the Act was to determine the most effective structure for the National Center or Centers. The Secretary considered the clear meaning of the Act; congressional intent; the suggestions of stakeholders; and possible activities, focuses, and audiences to be served by the National Center or Centers and weighed the advantages and opportunities of a variety of possible options for configuring a National Center or Centers.

The Act clearly highlights (1) research and (2) dissemination and professional development as two of the most important functions of the National Center or Centers. Moreover, the Act challenges the Secretary to support high quality research, development, evaluation, dissemination, and professional development activities while, at the same time, minimizing duplication of effort among these required activities. Section 114(c)(5) of the Act requires a Center to perform specifically identified research activities. Section 114(c)(5)(A)(iii)(II) of the Act authorizes a Center to carry out dissemination and professional development activities and section 114(c)(5)(C) of the Act requires all Centers established under section 114(c)(5) of the Act to conduct dissemination and professional development activities based upon the research described in section 114(c)(5)(A) of the Act. Further, sections 114(c)(6)(A) and (B)(ii) of the Act authorize the Secretary to provide for technical assistance upon request of a State and for the dissemination of best practices information through a National Center or Centers. The emphasis Congress placed on (1) research and (2) dissemination and professional development activities lends support to the establishment of two Centers.

The Secretary believes that Congress intended, through the use of numerous references in the Act (sections 114(c)(5)(A)(iii)(I), 114(c)(5)(A)(iii)(II), and (C), and 114(c)(6)(A) and (B)(ii)), to emphasize the critical importance of dissemination and professional

development activities, especially those involving the research of the National Centers. Most significantly, in view of section 114(c)(5)(C) of the Act, the Secretary believes Congress intended that research conducted by the Centers contribute to the efforts of State and local agencies to improve the quality and effectiveness of vocational and technical education.

Through their correspondence and during consultation sessions with the Secretary, stakeholders overwhelmingly identified needs that would be best met through National Centers that focus on dissemination and research activities. While agreeing that basic and applied research are needed, many stakeholders expressed the view that dissemination of information for practitioners is the most important function a National Center should perform. Stakeholders thought that researchers typically used presentations at conferences and articles in research journals as the primary vehicles for sharing research findings. These stakeholders thought that the National Centers should be responsive to the needs of the field and use a variety of proactive dissemination strategies to reach target audiences.

Further, a majority of stakeholders thought the National Centers should use a variety of innovative approaches for carrying out all of the Centers' functions; be responsive to the needs of constituencies, especially by focusing on activities that have practical applications; involve the field when establishing research and dissemination agendas; and leverage available resources, including partnering and coordinating with existing networks, professional organizations, and research and dissemination efforts at the Federal, State, and local levels.

After much deliberation, and following the consultations discussed earlier, the Secretary has determined that two Centers are needed for the most effective implementation of the Act and to meet the distinct needs of the vocational and technical education community. Therefore, the Secretary plans to establish: (1) the National Research Center for Career and Technical Education (Research Center) and (2) the National Dissemination Center for Career and Technical Education (Dissemination Center). The Secretary believes this configuration will result in the most effective services being offered by the Centers and will ensure that the work of the Centers will be of high quality, relevant, timely, and accessible to the vocational and technical education community. In addition, the research and dissemination activities provided for in

sections 114(c)(5) and (6)(A) of the Act are more likely to be appropriately addressed by two Centers since each activity will be the focus of a separate Center.

While there was no clear preference expressed by stakeholders on the number of Centers the Secretary should establish, the types of activities stakeholders viewed as being most beneficial to them strongly suggests that it is preferable to establish two Centers. In addition, the Secretary believes the complexity and magnitude of the research and dissemination activities required by the Act provide strong support for the establishment of two Centers. The Secretary also believes that significant benefits would be derived from having one of these Centers focus on dissemination and professional development activities, which were identified by stakeholders as their most critical need. In sum, a few advantages of two Centers are:

- (a) Providing a nationally recognized and centralized mechanism for a broad and comprehensive dissemination and professional development effort;
- (b) Providing access, via technology, networking, and brokering, to research best practices developed by entities other than the National Centers supported under section 114(c) of the Act; and
- (c) Allowing the National Research Center for Career and Technical Education to focus on the important work of research, and at the same time minimize the amount of resources it

would use to support dissemination and professional development activities.

The establishment of a Center to focus on dissemination and professional development will certainly reduce the amount of resources the Secretary expects a Research Center to devote to carrying out dissemination and professional development activities. However, in light of the requirement in section 114(c)(5)(C) of the Act, the Secretary expects the Research Center to play a key role in dissemination and professional development efforts. The Secretary believes that a researcher's knowledge of his or her research activities is invaluable when translating that research into practice—it enhances the product being disseminated. For this reason, the Secretary believes that researchers of the Research Center shall be involved in dissemination and professional development activities. The nature and extent of that role would depend on the activities proposed by successful applicants under this competition. However, the Secretary expects, at a minimum, that an entity entering into a cooperative agreement with the Department for the Research Center will (1) make its research and researchers available for the translation of research into practice that is carried out by the Dissemination Center and (2) disseminate information on its work through a wide variety of means, including research and practitioner journals, conference presentations, newspapers and magazines, newsletters, and technology, as appropriate.

Further, the Secretary expects, as a part of the overall coordination of all activities of the Centers, that both Centers will coordinate their dissemination and professional development activities to ensure that any duplication of effort is reduced or eliminated. A more detailed discussion of coordination to be carried out by the Centers is in paragraph (b) of the "Program Requirements" section of this notice.

The Secretary plans to make awards for the Research Center and Dissemination Center using cooperative agreements. The Secretary expects the Department's interaction with the recipients of awards to be characterized by continuing and regular participation in the project, unusually close collaboration with the recipient, and intervention or direct operational involvement in the review and approval of project activities.

*Eligible Applicants:* The following entities are eligible for an award under this program:

**SUPPLEMENTARY INFORMATION:** The Secretary believes National Centers have a unique role that enables them to serve as effective catalysts for program improvement. In this regard, the Secretary believes that in carrying out section 114(c)(5) and (6) of the Act, both National Centers should—

- (a) Build a knowledge base that is critical to increasing the quality and improving the effectiveness of

vocational and technical education programs;

- (b) Help to redefine vocational education and spearhead conversations on reform;

- (c) Conduct activities that show a balanced agenda that addresses secondary and postsecondary vocational and technical education issues;

- (d) Contribute significantly to both theory and practice, especially in areas that are relevant to practitioners and in

emerging areas of practice that are not well defined; and

- (e) Translate research into practice for teachers, counselors, administrators, and policy makers through dissemination, professional development, and technical assistance.

**Center Activities**

Under section 114(c) of the Act, the Secretary will award cooperative agreements to establish (1) a National Research Center for Career and

Technical Education and (2) a National Dissemination Center for Career and Technical Education.

*National Research Center for Career and Technical Education*

The purpose of the National Research Center is to design and conduct, using a variety of approaches, research, development, and evaluation activities that are consistent with the purposes of the Act. The National Research Center shall design and conduct—

(c) The dissemination of best practices information and the provision of technical assistance, for the purposes of developing, improving, and identifying the most successful methods and techniques for providing vocational and technical education programs assisted under the Act.

*Priorities:* Using as a basis the suggestions that were provided by stakeholders on the scope and structure of the Centers, the Secretary has identified a number of issues that are important as initial foci for the National Research and Dissemination Centers. The issues have been separated into two types of priorities: competitive and invitational. Although extra points will be awarded to applicants addressing competitive priorities, the Secretary encourages applicants to incorporate as many as possible of both types of priorities into their applications.

**Competitive Priorities**

Under 34 CFR 75.105(c)(2)(ii), the Secretary gives preference to applications that meet the following competitive priorities. The Secretary awards up to five points to an application that meets the competitive priority in a particularly effective way. These points are in addition to any points an application earns under the selection criteria for the program.

*Research Center*

**Competitive Priority 1—Program Improvement (up to 5 Points)**

Activities that promote reform and improvement in instructional practices; that promote learning that effectively transfers from the classroom to the workplace; and that result in measurable student achievement of academic and technical knowledge and skills needed to prepare for further education and careers (e.g., integrated academic and technical learning, skills competencies, career pathways and school-wide restructuring).

**Competitive Priority 2—Professional Development (up to 5 Points)**

Activities that investigate, validate, and promote professional development, such as effective models of pedagogy and models of applied learning.

**Competitive Priority 3—Effective Links Between Employment Knowledge and Skills and Academic Competencies (up to 5 Points)**

Activities that investigate and validate the most successful methods and techniques for improving student achievement through effective links between employment knowledge and skills and academic competencies that support transitions to employment, post secondary education, and life-long learning.

*Dissemination Center*

**Competitive Priority 1—Translating Research to Practice (up to 5 Points)**

Activities that translate research into promising or best practices, including synthesizing research and technical reports into applied tools and practitioner-oriented documents and materials.

**Competitive Priority 2—Most Successful Practices (up to 5 Points)**

Activities that identify and share the most successful products, programs, and practices for enhancing student achievement and performance, including participation in non-traditional training, and that address the immediate needs of practitioners.

**Competitive Priority 3—Professional Development (up to 5 Points)**

Professional development activities that lead to high-quality and effective professionals providing services and programs under the Act.

**Invitational Priorities**

Under 34 CFR 75.105(c)(1), the Secretary is particularly interested in applications that meet the following

invitational priorities. However, an application that meets an invitational priority does not receive competitive or absolute preference over other applications.

#### Research Center

##### Invitational Priority 1—Technology

Activities that investigate and validate the appropriate use of technology to facilitate the learning process and provide a basis for adoption/adaptation by others.

##### Invitational Priority 2—Evaluation

Activities that develop and validate appropriate evaluation methods and tools that assess student achievement and educational effectiveness at the State and local levels.

#### Dissemination Center

##### Invitational Priority—Technical Assistance

Activities to deliver technical assistance to States and “eligible recipients” for the purposes of developing, improving, and identifying the most successful methods and techniques for providing programs and activities under the Act.

#### *Instructions for Part IV—Program Narrative*

The program narrative will comprise the largest portion of your application. This part is where you spell out the who, what, when, why, and how, of your proposed project.

Although you will not have a form to fill out for your narrative, there is a format. This format is based on the selection criteria. Because your application will be reviewed and rated by a review panel on the basis of the selection criteria, your narrative should follow the order and format of the criteria.

Before preparing your application, you should carefully read the legislation and EDGAR rules governing the program, eligibility requirements, Center activities, priorities, selection criteria, and program requirements for this competition.

Your program narrative should be clear, concise, and to the point. Begin the narrative with a one page abstract or summary of your project. Then describe the project in detail, addressing each selection criterion in order. Be sure to number consecutively ALL pages in your application.

You may include supporting documentation as appendices to the program narrative. Be sure that this material is concise and pertinent to this program competition.

You are advised that—

(a) The Secretary considers only information contained in the application in ranking applications for funding consideration.

(b) The technical review panel evaluates each application solely on the basis of the Center activities, selection criteria, and competitive priorities contained in this notice.

(c) Letters of support included as appendices to an application, that are of direct relevance to or contain commitments that pertain to the established selection criteria, such as commitment of resources, will be reviewed by the panel. Letters of support sent separately from the formal application package are not considered in the review by the technical review panels. (34 CFR 75.217)

#### **Estimated Burden Statement**

According to the Paperwork Reduction Act of 1995, no persons are required to respond

to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 1830-0538. (Expiration date: 4/30/02). The time required to complete this information collection is estimated to average 90 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection.

If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Education, Washington, DC 20202-4651.

If you have comments or concerns regarding the status of your individual submission of this form, write directly to: Ricardo Hernandez, Division of National Programs, Office of Vocational and Adult Education, U.S. Department of Education, 400 Maryland Avenue, SW (Room 4512, Mary E. Switzer Building), Washington DC 20202-7242.

#### Notice to All Applicants

Thank you for your interest in this program. The purpose of this section is to inform you about a new provision in the Department of Education's General Education Provisions Act (GEPA) that applies to applicants for new grant awards under Department programs. This provision is section 427 of GEPA, enacted as part of the Improving America's Schools Act of 1994 (Pub. L. 103-382).

#### To Whom Does This Provision Apply?

Section 427 of GEPA affects applicants for new discretionary grant awards under this program. **ALL APPLICANTS FOR NEW AWARDS MUST INCLUDE INFORMATION IN THEIR APPLICATIONS TO ADDRESS THIS NEW PROVISION IN ORDER TO RECEIVE FUNDING UNDER THIS PROGRAM.**

#### What Does This Provision Require?

Section 427 requires each applicant for funds (other than an individual person) to include in its application a description of the steps the applicant proposes to take to ensure equitable access to, and participation in, its federally-assisted program for students, teachers, and other program beneficiaries with special needs.

This section allows applicants discretion in developing the required description. The statute highlights six types of barriers that can impede equitable access or participation that you may address: gender, race, national origin, color, disability, or age. Based on local circumstances, you can determine whether these or other barriers may prevent your students, teachers, etc. from equitable access or participation. Your description need not be lengthy; you may provide a clear and succinct description of how you plan to address those barriers that are applicable to your circumstances. In addition, the information may be provided in a single narrative, or, if appropriate, may be discussed in connection with related topics in the application.

Section 427 is not intended to duplicate the requirements of civil rights statutes, but

rather to ensure that, in designing their projects, applicants for Federal funds address equity concerns that may affect the ability of certain potential beneficiaries to fully participate in the project and to achieve to high standards. Consistent with program requirements and its approved application, an applicant may use the Federal funds awarded to it to eliminate barriers it identifies.

#### What Are Examples of How an Applicant Might Satisfy the Requirement of This Provision?

The following examples may help illustrate how an applicant may comply with section 427.

(1) An applicant that proposes to carry out an adult literacy project serving, among others, adults with limited English proficiency, might describe in its application how it intends to distribute a brochure about the proposed project to such potential participants in their native language.

(2) An applicant that proposes to develop instructional materials for classroom use might describe how it will make the materials available on audio tape or in Braille for students who are blind.

(3) An applicant that proposes to carry out a model science program for secondary students and is concerned that girls may be less likely than boys to enroll in the course, might indicate how it tends to conduct "outreach" efforts to girls, to encourage their enrollment.

We recognize that many applicants may already be implementing effective steps to ensure equity of access and participation in their grant programs, and we appreciate your cooperation in responding to the requirements of this provision.

#### Appendix B—Questions and Answers

Potential applicants frequently direct questions to officials of the Department regarding application notices and programmatic and administrative regulations governing various direct grant programs. To assist potential applicants, the Department has assembled the following most commonly asked questions followed by the Department's answers.

Q. Can we get an extension of the deadline?

A. No. A closing date may be changed only under extraordinary circumstances. Any change must be announced in the **Federal Register** and must apply to all applications. Waivers for individual applications cannot be granted regardless of the circumstances.

Q. How many copies of the application should I submit and must they be bound?

A. Applicants are required to submit one original and two copies of the application. To aid with the review of applications, the Department encourages applicants to submit four additional paper copies and one electronic copy (in Department of Education standard program format) of the application. The Department will not penalize applicants who do not provide additional copies. The binding of applications is optional.

Q. We just missed the deadline for the XXX competition. May we submit under another competition?

A. Yes, however, the likelihood of success is not good. A properly prepared application must meet the specifications of the competition to which it is submitted.

Q. I'm not sure which competition is most appropriate for my project. What should I do?

A. We are happy to discuss any such questions with you and provide clarification on the unique elements of the various competitions.

Q. Will you help us prepare our application?

A. We are happy to provide general program information. Clearly, it would not be appropriate for staff to participate in the actual writing of an application, but we can respond to specific questions about application requirements, evaluation criteria, and the priorities. Applicants should understand, however, that prior contact with the Department is not required, nor will it in any way influence the success of an application.

Q. When will I find out if I'm going to be funded?

A. You can expect to receive notification within 2 months of the application closing date, depending on the number of applications received.

Q. Once the review panel has reviewed my application, can you tell me the outcome?

A. No. Every year we are called by a number of applicants who have a legitimate reason for needing to know the outcome of the panel review prior to official notification. Some applicants need to make job decisions, some need to notify a local school district, etc. Regardless of the reason, because final funding decisions have not been made, even at the point where all applications have been read, we cannot share information about the results of panel review with anyone.

Q. Will my application be returned if I am not funded?

A. No. We no longer return unsuccessful applications. Thus, applicants should retain at least one copy of their application.

Q. Can I obtain copies of reviewers' comments?

A. Upon written request, reviewers' comments will be mailed to applicants.

Q. Is travel allowed under these projects?

A. Travel associated with carrying out the project is allowed. Because we may request the staff of funded projects to attend an initial meeting with the Department's staff and provide an annual briefing to the Department on the project's activities, you may also wish to include a trip or two to Washington, DC in the travel budget. Travel to conferences is sometimes allowed when the purpose of the conference will be of benefit and relates to the project.

Q. If my application receives high scores from the reviewers, does that mean that I will receive funding?

A. Not necessarily. In addition to the rank order of an application, the Secretary determines which applications will be selected for grants by considering—

(a) Information in the application, including any additional information submitted by an applicant to clarify budgetary or programmatic questions raised by the Secretary; and

(b) Other information relevant to a criterion, priority, or other requirement that

applies to the selection of applications for new grants or cooperative agreements, including information concerning the applicant's use of funds under a previous award under the same Federal program. (34 CFR 75.217)

Q. What happens during pre-award clarification discussions?

A. During pre-award clarification discussions, technical and budget issues may be raised. These are issues that have been identified during the panel and staff reviews that require clarification. Sometimes issues are stated as "conditions." These are issues that have been identified as so critical that the award cannot be made unless those conditions are met. Questions may also be raised about the proposed budget. Generally, these issues are raised because an application contains inadequate justification or explanation of a particular budget item, or because the budget item seems unimportant to the successful completion of the project.

If you are asked to make changes that you feel could seriously affect the project's success, you may provide reasons for not making the changes or provide alternative suggestions. Similarly, if proposed budget reductions will, in your opinion, seriously affect the project activities, you may explain why and provide additional justification for the proposed expenses. An award cannot be made until all issues under discussion have been resolved.

Q. How do I provide an assurance?

A. Except for SF-424B, "Assurances—Non-Construction Programs," you may provide an assurance simply by stating in writing that you are meeting a prescribed requirement.

Q. Where can copies of the **Federal Register**, regulations, and Federal statutes be obtained?

A. Copies of these materials can usually be found at your local library. Or you may obtain copies of the material referenced in this notice in the following manner:

(a) A copy of the Carl D. Perkins Vocational and Technical Education Act of 1998 (Pub. L. 105-332) may be obtained (1) from the Government Printing Office by writing to Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or telephoning (202) 512-1800, or (2) online from the Library of Congress at: <http://thomas.loc.gov>.

(b) A copy to the Code of Federal Regulations that contains the Education Department General Administrative Regulations, 34 CFR parts 74, 75, 77, 80, 81, 82, 85, and 86, may be obtained from the Government Printing Office by writing to Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954 or on the Internet at: [http://www.access.gpo.gov/su\\_docs](http://www.access.gpo.gov/su_docs) or <http://www.access.gpo.gov/nara/cfr>.

8. **Type of Submission.** Self-explanatory.
9. **Executive Order 12372.** Check "Yes" if the application is subject to review by Executive Order 12372. Also, please enter the month, date, and four (4) digit year (e.g., 12/12/2000). Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process. 11. **Human Subjects.** Check "Yes" or "No". If research activities involving human subjects are not planned at any time during the proposed project period, check "No." **The remaining parts of item 11 are then not applicable.**

If research activities involving human subjects, whether or not exempt from Federal regulations for the protection of human subjects, are planned at any time during the proposed project period, either at the applicant organization or at any other performance site or collaborating institution, check "Yes." If all the research activities are designated to be exempt under the regulations, enter, in item 11a, the exemption number(s) corresponding to one or more of the six

exemption categories listed in "Protection of Human Subjects in Research" attached to this form. Provide sufficient information in the application to allow a determination that the designated exemptions in item 11a, are appropriate. Provide this narrative information in an "Item 11/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page. Skip the remaining parts of item 11.

If some or all of the planned research activities involving human subjects are covered (nonexempt), skip item 11a and continue with the remaining parts of item 11, as noted below. In addition, follow the instructions in "Protection of Human Subjects in Research" attached to this form to prepare the six-point narrative about the nonexempt activities. Provide this six-point narrative in an "Item 11/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page.

If the applicant organization has an approved Multiple Project Assurance of Compliance on file with the Grants Policy and Oversight Staff (GPOS), U.S. Department of Education, or with the Office for Protection from Research Risks (OPRR), National Institutes of Health, U.S. Department of Health and Human Services, that covers the specific activity, enter the Assurance number in item 11b and the date of approval by the Institutional Review Board (IRB) of the proposed activities in item 11c. This date must be no earlier than one year before the receipt date for which the application is submitted and must include the four (4) digit year (e.g., 2000). Check the type of IRB review in the appropriate box. An IRB may use the expedited review procedure if it complies with the requirements of 34 CFR 97.110. If your application is recommended/selected for funding, a follow-up certification of IRB approval from an official signing for the applicant organization must be sent to and received by the designated ED official within 30 days after a specific formal request from the designated ED official. **If the applicant organization does not have on file with GPOS or OPRR an approved Assurance of Compliance that covers the proposed research activity, enter "None" in item 11b and skip 11c.** In this case, the applicant organization, by the signature on the application, is declaring that it will comply with 34 CFR 97 within 30 days after a specific formal request from the designated ED official for the Assurance(s) and IRB certifications.

12. **Project Title.** Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.
13. **Estimated Funding.** Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate only the amount of

the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 13.

## Protection of Human Subjects in Research (Attachment to ED 424)

### I. Instructions to Applicants about the Narrative Information that Must be Provided if Research Activities Involving Human Subjects are Planned.

If you marked item 11 on the application "Yes" and designated exemptions in 11a, (all research activities are exempt), provide sufficient information in the application to allow a determination that the designated exemptions are appropriate. Research involving human subjects that is exempt from the regulations is discussed under II.B. "Exemptions," below. The Narrative must be succinct. Provide this information in an "Item 11/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page.

If you marked "Yes" to item 11 on the face page, and designated no exemptions from the regulations (some or all of the research activities are nonexempt), address the following six points for each nonexempt activity. In addition, if research involving human subjects will take place at collaborating site(s) or other performance site(s), provide this information before discussing the six points. Although no specific page limitation applies to this section of the application, be succinct. Provide the six-point narrative and discussion of other performance sites in an "Item 11/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page.

(1) Provide a detailed description of the proposed involvement of human subjects. Describe the characteristics of the subject population, including their anticipated number, age range, and health status. Identify the criteria for inclusion or exclusion of any subpopulation. Explain the rationale for the involvement of special classes of subjects, such as children, children with disabilities, adults with disabilities, persons with mental disabilities, pregnant women, prisoners, institutionalized individuals, or others who are likely to be vulnerable.

(2) Identify the sources of research material obtained from individually identifiable living human subjects in the form of specimens, records, or data. Indicate whether the material or data will be obtained specifically for research purposes or whether use will be made of existing specimens, records, or data.

(3) Describe plans for the recruitment of subjects and the consent procedures to be followed. Include the circumstances under which consent will be sought and obtained, who will seek it, the nature of the information to be provided to prospective subjects, and the method of documenting consent. State if the Institutional Review Board (IRB) has authorized a modification or waiver of the elements of consent or the requirement for documentation of consent.

(4) Describe potential risks (physical, psychological, social, legal, or other) and assess their likelihood and seriousness. Where appropriate, describe alternative treatments and procedures that might be advantageous to the subjects.

(5) Describe the procedures for protecting against or minimizing potential risks, including risks to confidentiality, and assess their likely effectiveness. Where appropriate, discuss provisions for ensuring necessary medical or professional intervention in the event of adverse effects to the subjects. Also, where appropriate, describe the provisions for monitoring the data collected to ensure the safety of the subjects.

(6) Discuss why the risks to subjects are reasonable in relation to the anticipated benefits to subjects and in relation to the importance of the knowledge that may reasonably be expected to result.

### II. Information on Research Activities Involving Human Subjects

#### A. Definitions.

A research activity involves human subjects if the activity is research, as defined in the Department's regulations, and the research activity will involve use of human subjects, as defined in the regulations.

#### —Is it a research activity?

The ED Regulations for the Protection of Human Subjects, Title 34, Code of Federal Regulations, Part 97, define research as "a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge." *If an activity follows a deliberate plan whose purpose is to develop or contribute to generalizable knowledge, such as an exploratory study or the collection of data to test a hypothesis, it is research.* Activities which meet this definition constitute research whether or not they are conducted or supported under a program which is considered research for other purposes. For example, some demonstration and service programs may include research activities.

#### —Is it a human subject?

The regulations define human subject as "a living individual about whom an investigator (whether professional or student) conducting research obtains (1) data through intervention or interaction with the individual, or (2) identifiable private information." (1) *If an activity involves obtaining information about a living person by manipulating that person or that person's environment, as might occur when a new instructional technique is tested, or by communicating or interacting with the individual, as occurs with surveys and interviews, the definition of human subject is met.* (2) *If an activity involves obtaining private information about a living person in such a way that the information can be linked to that individual (the identity of the subject is or may be readily determined by the investigator or associated with the information), the definition of human subject is met.* [Private information includes information about behavior that occurs in a context in which an individual can reasonably expect that no observation or recording is taking place, and information which has been provided for specific purposes by an

individual and which the individual can reasonably expect will not be made public (for example, a school health record.)]

#### **B. Exemptions.**

Research activities in which the only involvement of human subjects will be in one or more of the following six categories of *exemptions* are not covered by the regulations:

(1) Research conducted in established or commonly accepted educational settings, involving normal educational practices, such as (a) research on regular and special education instructional strategies, or (b) research on the effectiveness of or the comparison among instructional techniques, curricula, or classroom management methods.

(2) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior, unless: (a) information obtained is recorded in such a manner that human subjects can be identified, directly or through identifiers linked to the subjects; and (b) any disclosure of the human subjects' responses outside the research could reasonably place the subjects at risk of criminal or civil liability or be damaging to the subjects' financial standing, employability, or reputation. *If the subjects are children, this exemption applies only to research involving educational tests or observations of public behavior when the investigator(s) do not participate in the activities being observed.* [Children are defined as persons who have not attained the legal age for consent to treatments or procedures involved in the research, under the applicable law or jurisdiction in which the research will be conducted.]

(3) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior that is not exempt under section (2) above, if the human subjects are elected or appointed public officials or candidates for public office; or

federal statute(s) require(s) without exception that the confidentiality of the personally identifiable information will be maintained throughout the research and thereafter.

(4) Research involving the collection or study of existing data, documents, records, pathological specimens, or diagnostic specimens, if these sources are publicly available or if the information is recorded by the investigator in a manner that subjects cannot be identified, directly or through identifiers linked to the subjects.

(5) Research and demonstration projects which are conducted by or subject to the approval of department or agency heads, and which are designed to study, evaluate, or otherwise examine: (a) public benefit or service programs; (b) procedures for obtaining benefits or services under those programs; (c) possible changes in or alternatives to those programs or procedures; or (d) possible changes in methods or levels of payment for benefits or services under those programs.

(6) Taste and food quality evaluation and consumer acceptance studies, (a) if wholesome foods without additives are consumed or (b) if a food is consumed that contains a food ingredient at or below the level and for a use found to be safe, or agricultural chemical or environmental contaminant at or below the level found to be safe, by the Food and Drug Administration or approved by the Environmental Protection Agency or the Food Safety and Inspection Service of the U.S. Department of Agriculture.
