I. Information Collection Request

NAGB is seeking comments on the following Information Collection Request (ICR).

Title: An Investigation of Alternative Methods for Scale Anchoring and Item Mapping in the National Assessment of Educational Progress.

Affected Entities: Parties affected by this information collection are persons included in a broadly representative sample including persons identified as panelists for field trials, pilot studies, achievement levels-setting (ALS) meetings, and validation research for the 1996 Science NAEP.

Abstract: The purpose of this information collection activity is to gather information for NAGB regarding the selection of exemplar items from the 1996 Science NAEP. Exemplar items are used as one of the primary means of communicating student performance relative to the NAEP achievement levels. The criteria for selecting exemplar items is critical to the "message" portrayed by the items. Congress has deemed that the achievement levels must be shown to be reasonable, valid, and informative to the public.

Part One of the study has been completed and examined the statistical criteria by comparing various scale anchoring and item mapping methodologies. The results of these systematic comparisons will be judged not only statistically, but also according to the degree to which they agree with expert judgments about item difficulty. This mail survey is designed to collect responses from the expert judges. Because these individuals have participated in the process of setting achievement levels from the 1996 Science NAEP, they are likely to be keenly interested in the ALS process.

Each prospective respondent will be sent a copy of the achievement levels descriptions for one of the three grades assessed (4th, 8th or 12th) along with a selection of approximately one-half of the items that have been released for public review for that grade. Items in the released blocks will be divided so that the distribution of items across the ACT NAEP-Like scale is approximately the same. The mailing will include an addressed, postage-paid envelope.

Respondents will be asked to read the achievement levels descriptions carefully. They will be asked to provide their own judgments of the difficulty of the set of released items. Then they will be asked to indicate whether the item would be a good exemplar for Basic, Proficient, or Advanced levels. Finally respondents will be asked for their interpretation of reports of NAEP achievement data.

The respondents' judgmental classifications will be compared to the "empirical" classifications using the various statistical criteria. Respondents will have determined which, if any, achievement descriptions match the items best, with respect to the knowledge and skill required for a correct response. The mapping criterion that matches the content-based classification best would seem to represent the best statistical criterion to use in selecting exemplar items. Thus, the response criterion that categorized items by levels most frequently chosen by respondents will be considered the "best" criterion to use for selecting exemplar items.

No third party notification or public disclosure burden is associated with this collection.

Burden Statement: The estimated total respondent burden is 141 hours, and the average burden per respondent is 1.0 hour. This is a one-time survey.

Neither small business nor other small entities are included in the survey.

II. Request for Comments

NAGB solicits comments to:

(i) Evaluate whether the proposed collection of information is an appropriate method to determine the "message" portrayed by the items regarding the achievement levels to the public.

(ii) Enhance the accuracy, quality, and utility of the information to be collected.

(iii) Evaluate whether the design of this survey maximizes the response rate, i.e. the number of selected persons who will respond, given the desire to have the sample be broadly representative of persons with some interest in the educational progress of K-12 students

in the general content of the discipline of science.

Records are kept of all public comments and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, Suite 825, 800 North Capitol Street, N.W., Washington, D.C. from 8:30 a.m. to 5:00 p.m.

Executive Director, National Assessment Governing Board.
