

Join Acadia National Park staff for the Schoodic Education Adventure! Bring your 5th through 8th grade students to this rewarding three-day, two-night residential program at the Schoodic Education and Research Center in Winter Harbor, Maine.

Curriculum-based classroom activities and hands-on field experience offer an invaluable learning experience in a unique setting. Situated on the rugged coast of Maine, the campus is accessible to shoreline, wetland, and forest ecosystems and provides a rich educational environment for students.

Field-based experiences highlight both woodland and shoreline environments.

SERC is located on the Schoodic Peninsula within Acadia National Park. The campus is an hour and a half drive from Bar Harbor and Bangor, Maine.
