§180.1146

§180.1146 Beauveria bassiana Strain GHA; exemption from the requirement of a tolerance.

Beauveria bassiana Strain GHA is exempted from the requirement of a tolerance in or on all raw agricultural commodities when applied to growing crops according to good agricultural practices.

[60 FR 18547, Apr. 12, 1995]

§180.1147 Bacillus thuringiensis CryIIIA delta-endotoxin and the genetic material necessary for its production.

Bacillus thuringiensis CryIIIA deltaendotoxin and the genetic material necessary for its production are exempted from the requirement of a tolerance when used as a plant pesticide in potatoes. "Genetic material necessary for its production" means the CryIIIA gene and its regulatory regions. "Regulatory regions" are the genetic materials that control the expression of the gene, such as promoters, terminators, and enhancers.

[60 FR 21728, May 3, 1995]

§180.1148 Occlusion Bodies of the Granulosis Virus of Cydia pomenella; tolerance exemption.

An exemption from the requirement of a tolerance is established for residues of the microbial pest control agent Occlusion Bodies of the Granulosis Virus of *Cydia pomonella* (codling moth) in or on all raw agricultural commodities.

[60 FR 42450, Aug. 16, 1995]

§180.1149 Inclusion bodies of the multi-nuclear polyhedrosis virus of Anagrapha falcifera; exemption from the requirement of a tolerance.

The microbial pest control agent inclusion bodies of the multi-nuclear polyhedrosis virus of *Anagrapha falcifera* is exempted from the requirement of a tolerance in or on all raw agricultural commodities when used to control certain lepidopteran pest species.

[60 FR 37020, July 19, 1995]

40 CFR Ch. I (7–1–04 Edition)

§180.1150 6-Benzyladenine; exemption from the requirement of a tolerance.

(a) The biochemical plant regulator 6-benzyladenine (6-BA) is exempt from the requirement of a tolerance in or on apple at an application rate of ≤ 182 grams of active ingredient per acre per season, and in or on pistachio at an application rate of ≤ 60 grams of active ingredient per acre per season.

(b) 6-Benzyladenine is temporarily exempt from the requirement of a tolerance in or on apples at ≤ 182 grams of active ingredient per acre per season, and in or on pistachio at ≤ 60 grams of active ingredient per acre per season when used in accordance with the Experimental Use Permit 73049-EUP-2. The temporary exemption from a tolerance will expire on January 31, 2005.

[68 FR 5839, Feb. 5, 2003, as amended at 69 FR 17308, Apr. 2, 2004]

§ 180.1151 Phosphinothricin Acetyltransferase (PAT) and the genetic material necessary for its production all plants; exemption from the requirement of a tolerance.

Phosphinothricin Acetyltransferase (PAT) and the genetic material necessary for its production in all plants are exempt from the requirement of a tolerance when used as plant-pesticide inert ingredients in all plant raw agricultural commodities. "Genetic material necessary for its production" means the genetic material which comprise genetic material encoding the PAT protein and its regulatory regions. "Regulatory regions" are the genetic material that control the expression of the genetic material encoding the PAT protein, such as promoters, terminators, and enhancers.

[62 FR 17719, Apr. 11, 1997]

§ 180.1152 Bacillus thuringiensis CryIA(b) delta-endotoxin and the genetic material necessary for its production (plasmid vector pCIB4431) in corn; exemption from the requirement of a tolerance.

Bacillus thuringiensis CryIA(b) deltaendotoxin and the genetic material necessary for its production (plasmid vector pCIB4431) in corn is exempt from the requirement of a tolerance when
