

Oilseeds: World Markets and Trade

Strong Aug – Nov Argentine Soybean Export Pace a Major Departure from Past Performance

Monthly Argentine Soybean Exports

Growing world demand for soybeans coupled with fewer exportable supplies in Brazil and the United States led buyers to turn to Argentina to meet projected needs. The result was a notable surge in Argentina's soybean exports in the August - November period, a three-fold increase over the previous two-year average. Brazil's late-season slowing export pace, indicative of dwindling supplies, reduced competition during this period and contributed to a 1 million ton decline in their February/January marketing year exports. Although the United States shipped aggressively in the final quarter of 2007, this year's smaller harvest is forecast to cut current marketing year exports by 3 million tons.

Faced with Brazil's short-fall in last year's exports, fewer U.S. exports, and uncertainty in the 2008 South American harvest, importers rushed to secure adequate supplies from Argentina. Demand was broad-based with China, facing a smaller crop, the primary buyer accounting for nearly 80 percent of export sales.

The outlook for the coming year calls for Argentina to return to a more normal export pattern as exportable supplies in Brazil increase in 2008.
