Comments:

Federal Reserve Vice Chairman Donald L. Kohn says emerging economies could quell commodity prices by curbing demand.....DUH!!! Are we actually paying this idiot? In real American dollars? Through their negligence and greed, the President, Vice-President, Federal Reserve Board Chairman, Mr. Kohn and the rest of the Federal Reserve Board have just about ruined this country.. I would like to know exactly who's payroll they are really on.. It can't possibly be the American people.. Everything they do is contrary to the best interests of anyone but the foreign governments and other FAT CATS throughout the world!! All friends of theirs, I'm sure!! Shame on all of them!!
