Friends -

I am writing to express my concerns over the A-76 process and the overall trend in the Forest Service.

With reductions of people and programs on the ground serving the resources and the public we are on the wrong track

Our energies are increasingly gobbled up by processes, accounting, documentation, and e-mail overload. We're losing our mission.

I've worked on 4 districts in rural areas with lots of local interaction, and I keep up on current events everywhere. We need the comment period to be extended in order to digest all this new information.
