Subject: Support for President Bush's Privatization Plan

The Grassroot Institute of Hawaii supports the efforts of the administration to subject some 850,000 federal jobs to genuine competition with focus on the end result desired -- quality, desired service to customers.

The efforts of OFPP to improve Circular A-76 is appreciated and supported. It certainly needs a makeover. The assumption that all activities are "presumed to be commercial" moves the problem of providing government goods and services to the task of making customers happy and eventually opens the door to getting the government back inside the fence defined by the US Constitution.

Good job. Let us know if we can help.

Please note above e-mail address of Randy Roth, Policy Adviser to Governor Lingle. We need similar action here and he will be addressing such as soon as initial organizational problems are solved.
