

DEPARTMENT OF THE INTERIOR

LAND AND MINERALS MANAGEMENT

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management (BLM) is charged with the multiple use management of natural resources on 258 million acres of surface estate of public land, about one-eighth of the land in the United States. BLM also administers approximately 700 million acres of onshore Federal mineral estate underlying BLM and other surface ownerships. In addition, BLM has trust responsibilities on 56 million acres of Indian trust lands for mineral operations and cadastral (land) survey. The lands managed by BLM provide important natural resources, recreational and scenic values to the American people, as well as resource commodities and revenue to the Federal Government, States, and counties. It is the mission of BLM to sustain the health, diversity, and productivity of the public lands for the use and enjoyment of present and future generations.

Permanent operating funds accounts include:

Operations and maintenance of quarters.—Funds in this account are used to maintain and repair BLM employee-occupied quarters from which rental charges are collected. Agencies are required to collect quarters rentals from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

Forest ecosystems health and recovery.—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. This account was established to allow BLM to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including release from competing vegetation and density control treatments.

Timber sale pipeline restoration fund.—This fund provides for the deposit and use of fees collected by BLM for sales of non-salvage timber pursuant to the timber salvage provisions of Public Law 104-19 and Public Law 105-83. Of the total deposited into this account, 75 percent is to be used for preparation of timber sales to fill the timber pipeline on lands administered by BLM, and 25 percent is to be expended on the backlog of recreation projects on BLM lands.

Expenses, road maintenance deposits.—Users of certain roads under BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

Federal Lands Recreation Enhancement Act, BLM.—The Federal Lands Recreation Enhancement Act (FLREA) was enacted on December 8, 2004 as part of the Consolidated Appropriations Act for 2005. FLREA replaces the Recreation Fee Demonstration Program, and most current BLM sites will transition to the new program. All receipts collected under this authority will be deposited to this account. BLM returns 100 percent of these receipts back to the site where the fees were generated. FLREA authorizes this program through 2014.

Acquisitions in Deschutes, Oregon from land sale receipts.—Pursuant to Public Law 105-221, the Oregon Public Lands Transfer Act, the Secretary of the Interior is authorized to

use the proceeds from sales in Deschutes County to purchase environmentally sensitive lands.

Operations and acquisitions in Nevada from land sale receipts.—Pursuant to Public Law 105-263, 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive land in the State, implement certain conservation initiatives on Federal land in Clark County, Nevada, make capital improvements to areas administered by the National Forest Service, Fish and Wildlife Service, and BLM in Clark County, Nevada, and develop parks, trails, and natural areas in Clark County, Nevada.

Lincoln County Land Sales Act.—Public Law 106-298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an interest bearing account that is available for expenditure without further appropriation.

White Pine County Land Sales Act.—Public Law 109-432 authorizes the Secretary to dispose of certain lands in White Pine County, Nevada, distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an account that is available for expenditure without further appropriation for the management of archaeological resources, wilderness protection, recreation activities, preparation of a management plan, reimbursement for sale costs, and other purposes.

Leases from Naval Petroleum Reserve No. 2.—The 2005 Energy Policy Act established this fund for environmental investigation and restoration on that site. A portion of revenue from new leases on the site is authorized to be deposited to this account.

Leases from Naval Oil Shale Reserve No. 3.—P.L. 107-345 established a fund for environmental investigation and restoration of this site. The Budget proposes to cancel \$24.7 million in appropriated balances that are not expected to be needed to complete the required cleanup authorized by the Act.

BLM Permit Processing Improvement Fund.—The 2005 Energy Policy Act established this pilot program. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited in this fund through 2015 and used to increase BLM oil and gas permit processing.

Geothermal Lease Revenue Fund.—The 2005 Energy Policy Act established this fund. Twenty-five percent of geothermal bonuses, rents, and royalties are authorized to be deposited to this account through 2010 and used to expedite geothermal leasing activities.

Federal land disposal.—The Federal Land Transaction Facilitation Act, P.L. 106-248 114 Stat. 613, provides that the Administration will conduct sales of lands that have been classified as suitable for disposal under current resource management plans. This law provides that receipts from such sales may be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by DOI.

Excess Stewardship Receipt Fund.—Funds in this account are derived from stewardship contracts in which the revenues derived from forest products exceed the costs of services. As authorized by P.L. 108-7, these residual receipts can be used for other approved stewardship contracts.

BLM Permit Processing Improvement Fund.—The 2005 Energy Policy Act established this pilot program to improve oil

and gas permit processing. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited into this account through 2015. The Budget proposes to eliminate this fund and to substitute new user fees for this activity.

Geothermal Lease Revenue Fund.—The 2005 Energy Policy Act established this fund to expedite geothermal leasing. Twenty-five percent of geothermal bonuses, rents, and royalties are authorized to be deposited to this account through 2010. The Budget proposes to eliminate this fund and to provide additional funding for these purposes through increased user fees.

Federal Land Disposal.—The Federal Land Transaction Facilitation Act (FLTFA), P.L. 106-248 (114 Stat. 613), authorizes the sale of BLM lands that have been classified as suitable for disposal under resource management plans in place at the time the Act was passed and allows DOI to retain the proceeds from such sales to cover the administrative costs of those sales and to acquire other high-value non-Federal lands within specially-designated areas, such as national parks, refuges, and monuments. The Budget proposes to amend FLTFA to: 1) allow BLM to use updated management plans to identify areas suitable for disposal; 2) allow a portion of the receipts to be used by BLM for restoration projects; 3) return 70 percent of the net proceeds from these sales to the Federal Treasury; and 4) cap DOI receipt retention at \$60 million per year.

Miscellaneous permanent payments include:
Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.—Under provisions of the Secure Rural Schools and Community Self-Determination Act of 2000 (Public Law 106–393), annual payments to the 18 Oregon & California (O&C) counties were derived from any revenues, fees, penalties, or miscellaneous receipts received by the Federal Government from activities by BLM on O&C and Coos Bay Wagon Road lands. These receipts were exclusive of deposits to any relevant trust fund, i.e., Timber Sale Pipeline Restoration and Forest Ecosystem Health and Recovery funds, or permanent operating funds. Public Law 106–393 expired in 2006, and the final payments for 2006 were made in 2007, consistent with the Act. Public Law 110–28 provided payments for one additional year. (A proposal to temporarily extend, but phase out and fully offset, payments previously provided under P.L. 106–393 is included within the Department of Agriculture's budget request.) In 2009, the DOI payments from this account are assumed to revert to the terms of two prior statutes enacted in 1937 and 1939, 50 Stat. 874 and 53 Stat. 753. Payments to 17 Oregon counties under the 1937 statute will be 50 percent of revenues from O&C grant lands. Payments under the 1939 statute are for lost tax revenue in two Oregon counties and are estimated to be 25 percent of all revenues from Coos Bay Wagon Road grant lands.

Payments to States (proceeds of sales).—States are paid five percent of the net proceeds from sale of public land and public land products (31 U.S.C. 1305).

Payments to States from grazing receipts, etc., public lands outside grazing districts.—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

Payments to States from grazing receipts, etc., public lands within districts.—States are paid 12½ percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

Payments to counties, National Grasslands.—Of the revenues received from the use of Bankhead-Jones Act lands administered by BLM, 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

Payments to Nevada from receipts on land sales.—(A) Public Law 96–586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent). (B) Public Law 105–263, as amended by P.L. 107–282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by NPS, FWS and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails and natural areas and implement other conservation initiatives

in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act. (C) Public Law 106–298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and c) the remaining 85 percent to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

Cook Inlet Region Inc. property.—This account received funding appropriated by section 9102 of the fiscal year 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of Public Law 94–204 (43 U.S.C. 1611). Funds are made available to BLM for administration and subsequent payment to accounts accepting Cook Inlet Region, Incorporated offers for Federal properties.

Native Alaskan groups' properties.—Funds were appropriated by Public Law 102–172 for the Calista Corporation, and by Public Law 102–415 for the Haida Corporation and the Gold Creek Susitna Association, Incorporated, for the acquisition by those groups of Federal real properties in fulfillment of claims originally settled in 43 U.S.C. 1617, the Alaska Native Claims Settlement Act.

MISCELLANEOUS PERMANENT PAYMENT ACCOUNTS

(Legislative proposal, subject to PAYGO)

Payments to states from land sales will increase because of the budget proposal to remove the current 2010 expiration date for the Federal Land Facilitation Transaction Act, and to allow the use of updated management plans to identify areas suitable for disposal under that Act.

PAYMENT TO ALASKA, ARCTIC NATIONAL WILDLIFE REFUGE

(Legislative proposal, subject to PAYGO)

The Budget assumes that the first oil and gas lease sale in the coastal plain of the Arctic National Wildlife Refuge (ANWR) would be held in 2010, producing \$7.0 billion in receipts from bonuses which would be shared 50/50 between the Federal government and the State of Alaska. The Federal share of the royalties from the leased areas would be directed to reducing the budget deficit.

The Helium Act Amendments of 1960, Public Law 86–777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities.

The Helium Privatization Act of 1996, Public Law 104–273, provides for the eventual privatization of the program and its functions. In 2009, the Helium program will consist of:

- (a) continued storage and transmission of crude helium;
- (b) complete disposal of helium refining facilities and other excess property not needed for storage and transmission of crude helium;
- (c) oversight of the production of helium on Federal lands; and
- (d) administration of in-kind and open market crude helium gas sale program.

The estimates assume that the helium program will continue full implementation of the Helium Privatization Act.

The Minerals Management Service (MMS) is responsible for managing the Nation's oil, natural gas, and other energy and mineral resources on the Outer Continental Shelf (OCS) and with collecting Federal mineral revenues from the OCS and onshore Federal and Indian lands. MMS's goal is to ensure environmental protection, promote responsible use, and realize fair market value for these natural resources. Through all of its programs, MMS works to ensure that the public receives maximum benefit from America's OCS resources and mineral revenues.

Outer Continental Shelf Lands.—The Offshore Energy and Minerals Management program coordinates MMS's responsibilities for OCS activities, which range from administering OCS leases and monitoring the safety of offshore facilities to protecting America's coastal and marine environments. As the Nation's designated steward of the mineral resources on the OCS, MMS has worked diligently for over 25 years to build a successful offshore program with a legal and regulatory framework that will provide for safe and environmentally sound OCS mineral resource development. The Energy Policy Act of 2005, enacted on August 8, 2005, provided MMS with new authorities to oversee Federal offshore renewable energy projects and related uses of America's offshore public lands. As a result, MMS is required to develop and administer a permitting program, promulgate new regulations, and manage pre-existing wind energy projects.

Minerals Revenue Management.—Through the Minerals Revenue Management program, MMS ensures that the Nation's Federal and Indian mineral revenues, whether received through in-kind or in-value royalties, are accurately reported and paid in compliance with laws, regulations, and lease terms. Revenues collected by MMS are one of the largest sources of non-tax revenue to the Federal Government. MMS disburses mineral revenues to states, the Office of the Special Trustee for American Indians, other Federal agencies, and the General Fund of the United States Treasury. Through the Royalty In Kind (RIK) program, MMS administers in-kind royalties so that the resources received are managed in a manner that best benefits the Nation.

General Administration.—The General Administration program is responsible for providing leadership, securing resources, developing organizational capabilities, coordinating strategic planning efforts, building infrastructure and assuring the appropriate delivery of services for the entire MMS organization.

For Mineral Leasing and Associated Payments (MLAP), the Mineral Leasing Act (MLA), 30 U.S.C. 181 et seq., provides that all States be paid 50 percent of the revenues resulting from the leasing of mineral resources on Federal public domain lands within their borders. In addition, under MLA, 40 percent of revenues are deposited in the Reclamation Fund, which funds western water projects, and the remaining 10 percent is deposited in the General Fund of the United States Treasury. By law, Alaska receives no funds from the Reclamation Fund, but receives a 90-percent share of mineral leasing receipts. In addition, the State of Oklahoma is paid 37½ percent of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache Tribal lands, to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252). Mineral leasing revenues are derived from royalties, rents, bonuses, and other revenues, including minimum royalties, late payment interest, settlement payments, gas storage fees, estimated royalty payments, and recoupments.

States receive 50 percent of Federal revenues generated from mineral production occurring on Federal Lands within that State's boundaries. To partially cover the costs of administering the Federal mineral leasing program, the Budget proposes to amend the MLA to allow MMS to deduct two percent from the required payments to States under the Act. MMS was authorized until 2000 to deduct a certain amount from State mineral revenue payments based on an assessment of the Federal Government's costs to manage and oversee mineral leasing and production (referred to as "net receipts sharing", or NRS). NRS authority was repealed in 2000, during a time of Federal budget surpluses. The Administration's pro-

MINERAL LEASING AND ASSOCIATED PAYMENTS—Continued

posal would return to a form of NRS similar to that which was in a place prior to 2000. However, the proposal addresses concerns raised about the administrative complexity of the original NRS process by simplifying how costs are allocated. Instead of attempting to allocate specific program costs on a State-by-State basis, the Administration has proposed a simple two percent deduction from the State share of revenues (equivalent to one percent of total mineral revenues) prior to making individual State allocations.

The FY 2008 Interior, Environment, and Related Agencies Appropriations Act, enacted as Division F, Title I of P.L. 110–161, implemented the proposed two-percent deduction from State payments, effective for fiscal year 2008. The Budget proposes authorizing legislation to amend the Mineral Leasing Act to make this change in the Federal-State revenue allocation permanent.

The Energy Policy Act of 2005 (P.L. 109–58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that, for a four-year period, \$250,000,000 in OCS revenues be paid annually to coastal States and coastal political subdivisions that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State’s allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases.

The Gulf of Mexico Energy Security Act of 2006 opens some additional areas in the Gulf of Mexico for offshore oil and gas leasing, while maintaining moratoria on activities east of the Military Mission Line and within certain distances from the coastline of Florida. The Act provides that 37.5 percent of Outer Continental Shelf revenues from certain leases be distributed to four coastal States (Alabama, Louisiana, Mississippi, and Texas) based on a complex allocation formula and subject to an annual cap in later years. The receipts are available in the year following collection, and the first disbursement is estimated to be in 2009. The funding provided is to be used primarily for coastal protection and restoration activities.

Title IV of the Department of the Interior and Related Agencies Appropriation Act, 1998 (P.L. 105-83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce and the unappropriated balance of interest remains in the fund. At this time, no budget authority is requested.

These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected or for defraying any of the expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements.

The Energy Policy Act of 2005 (P.L. 109-58) amended section 20 of the Geothermal Steam Act of 1970 (30 U.S.C. 1019 et seq.). The amendment provides that for the revenues collected from geothermal leasing, 50 percent of the revenues are to be paid to the State and 25 percent are to be paid to the county in which the leased lands or geothermal resources are located. In addition, the remaining Federal revenues received during the first five fiscal years following enactment of the Energy Policy Act, after excluding funds paid to State and county governments, are deposited into a separate Treasury account for use by DOI in the implementation of the Geothermal Steam Act of 1970 and the Energy Policy Act of 2005.

The Energy Policy Act of 2005 (P.L. 109-58) amended section 20 of the Geothermal Steam Act of 1970 (30 U.S.C. 1019 et seq.) to provide that 25 percent of the revenues collected from geothermal leasing be paid to the county in which the leased lands or geothermal resources are located. This payment is in addition to the 50 percent of Federal revenues that have historically been paid to the State in which the leased lands or geothermal resources are located. The Budget proposes to eliminate these county payments and return to the traditional 50/50 Federal-State revenue sharing arrangement.

Environmental protection.—This activity funds those functions that directly contribute to ensuring that the environment is protected during surface coal mining operations. It also addresses those activities that ensure that coal operators adequately reclaim the land after mining is completed.

Under this activity, OSM provides regulatory grants to States to operate enforcement programs under the terms of the Surface Mining Control and Reclamation Act of 1977 (SMCRA). It also provides for the operation of Federal and Indian land programs and the oversight of State programs, and supports State regulatory program development and maintenance. In addition, this activity funds environmental reclamation efforts through the collection of civil penalties for post-SMCRA reclamation and funds from bond forfeitures, and provides funding for underground and coal outcrop fires.

Technology development and transfer.—This activity provides funding to enhance the technical skills that States and Indian tribes need to operate their regulatory programs. It provides technical outreach to States and Indian tribes to solve problems related to the environmental effects of coal mining. The Applicant Violator System is funded from this activity.

Financial management.—This activity provides the resources for the managing, accounting, and processing of collections and for the pursuit of delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations.

Executive direction and administration.—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

Environmental restoration.—This activity funds those functions that contribute to reclaiming lands affected by past coal

mining practices. Funds are used to restore land and water resources and the environment that have been degraded by mining prior to the passage of SMCRA.

This activity provides discretionary funding for the Federal reclamation program, which includes the Federally-administered emergency reclamation program, high-priority projects in States that do not have a reclamation program, and watershed cooperative agreements. Beginning in 2008, this activity will provide mandatory reclamation grants for qualified States and Tribes, instead of the discretionary grants provided through 2007.

Technology development and transfer.—This activity provides funding to enhance the technical skills that the States and Indian tribes need to operate their reclamation programs. OSM conducts technical studies on mining and reclamation-related problems.

Financial management.—This activity provides funds to identify, notify, collect, and audit fees from coal operators for the Abandoned Mine Reclamation Fund. OSM seeks to maximize voluntary compliance with the SMCRA's reclamation fee provisions.

Executive direction and administration.—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

Public Law 109-432 authorizes mandatory Treasury payments to three United Mine Workers of America (UMWA) retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other federal funding sources do not meet the plans expenditure needs, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in the plans; unobligated balances in the fund are used to generate interest for this purpose.

The Water and Related Resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues and stretch limited water supplies. In 2009, Reclamation will partner with the U.S. Geological survey to implement a Water Security Initiative that focuses resources and funding on areas in the West where conflict exists or is most likely to occur. This Initiative will merge two water conservation programs Water 2025 and the Water Conservation Field Services Program and award competitive grants based upon West-wide criteria as one approach to address and prevent such future conflicts.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of DOI and the science needs of its land and resource management bureaus. The U.S. Geological Survey also works in collaboration with other Federal, State, and Tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues pertaining to the water, land, geologic, and biological resources of the Nation.

The 2009 Budget continues science programs that generate relevant, objective information for land managers and for communities throughout the Nation. Major areas of emphasis in the Budget include: increased information about water quantity and quality through a water census and development of predictive tools needed to guide decisions made by the private sector, localities, Tribes, States, and the Federal Government; expansion of the frontiers of scientific information about oceans and coastal areas and partnering with states in regional challenges; begin development of the framework

for a climate effects research and monitoring network; begin the collaborative process to define priorities for a national land imaging program; and enhanced monitoring to better understand large scale drivers of migratory bird populations and habitat change.

Geographic research, investigations, and remote sensing.—The USGS Geography Program seeks to observe the Earth at various scales using remote sensing to understand the human and environmental dynamics of land change. The Geography Program also provides scientific information to describe and interpret America's landscape by mapping the terrain, monitoring changes over time, and analyzing how and why these changes have occurred. The knowledge gained through these activities is used to model the processes of change and to forecast future changes.

Geologic hazards, resources, and processes.—The national program of onshore and offshore geologic research and investigations produces: 1) information on natural hazards of geologic origin such as earthquakes, volcanic eruptions, landslides, and coastal erosion; 2) geologic information for use in the management of public lands and in national policy determinations; 3) information on the chemistry and physics of the Earth, its past climate, and the geologic processes by which it was formed and is being modified; 4) geologic, geophysical, and geochemical maps and analyses to address environmental, energy and mineral resource, and hazards concerns; 5) environmental, hazards, energy and mineral resource assessments; and 6) improved methods and instrumentation for detecting and monitoring hazards, disseminating hazards information, and conducting assessments.

Water resources investigations.—The USGS water programs produce data, analyses, assessments, and methodologies to support Federal, State, Tribal, and local government decisions on water planning, water management, water quality, flood forecasting and warning, and enhancement of the quality of the environment. These programs work cooperatively with other Federal agencies, States, and other entities to leverage Federal resources to meet their mutual water information needs.

Biological research.—The national program of biological research: 1) conducts biological resources inventory and monitoring; 2) provides scientific information for the management of biological resources; and 3) predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats. The program conducts the high priority biological research needed by DOI's land management bureaus and operates the Cooperative Research Unit program, which provides research and information to resource managers, and trains natural resource professionals in partnership with university and State scientists.

Enterprise information.—The USGS enterprise information program supports bureau-level activities and investments in the areas of information technology, information security, information management, information policy and standards, and information science. As the primary vehicle for planning and executing the broad information goals and objectives of the USGS, the program provides bureau-level information policies, infrastructure, and services needed to support the bureau's scientific mission; creates an integrated information environment within the USGS; ensures that the bureau meets legislative and administrative information management mandates; and provides the basic foundation for easy discovery, access, acquisition, and use of USGS data and information. The National Geospatial Program is focused on improving geospatial data access, integration, and applications through implementation of *The National Map* and the National Spatial Data Infrastructure (NSDI). Partnerships with other Federal, State, and local agencies; the private sector; and academia are the keystone for accomplishing this mission.

Global change.—USGS provides critical science, monitoring, and predictive modeling of information related to our changing climate and its effects on the landscape and the Nation's resources. The knowledge and information that results from this program will help policy makers, resource managers, and citizens make informed decisions about the management of the landscapes for which they have responsibility and on which they live.

Science support.—Science support provides for bureau-wide management; executive direction and coordination; administrative, human resources, and business information systems management; and financial and personnel systems support provided by DOI's National Business Center.

Facilities.—This activity finances: 1) rental payments and operation and maintenance for properties; and 2) deferred maintenance and capital improvement.

Reimbursable program.—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission-related work performed at the request of the financing agency.

Ecological services.—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, and other Federal agencies. These partnership activities help make the listing of species under the Endangered Species Act unnecessary and protect

RESOURCE MANAGEMENT—Continued

and recover those species that are listed. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize adverse environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

National wildlife refuge system.—The Service maintains the National Wildlife Refuge System consisting of 548 refuges, waterfowl production areas in 205 counties that are managed by 37 wetland management districts, and 49 coordination areas, totaling over 96 million acres. The National Wildlife Refuge System administers this network of lands and waters to conserve and restore fish, wildlife, plants, and their habitats.

Migratory bird management and law enforcement.—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 900 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures implementing the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protections laws, and works in partnership with international, state, and tribal counterparts to conserve wildlife resources.

Fisheries.—The Fisheries Program consists of 70 national hatcheries, nine Fish Health Centers, seven Fish Technology Centers, 64 Fishery Resource Offices, and a Historic National Fish Hatchery. Working with partners, the Fisheries Program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American Public.

General operations.—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all fish and wildlife programs. The funds also support the Service's international activities, the National Conservation Training Center, and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

Consistent with the Administration's focus on working with partners to address imperiled species and other priority wildlife conservation needs, the State and Tribal Wildlife grant program provides funds to States, the District of Columbia, Tribes, and territories to develop and implement wildlife management and habitat restoration programs. Allocation of funds to the States is determined by a formula of one-third based on land area and two-thirds based on population and require a cost-share. Grants to the Tribes are awarded competitively. Additionally, roughly \$5,000,000 will be provided on a competitive basis to those projects that emphasize cooperative conservation and best demonstrate results linked to outcome performance goals.

Federal Land Acquisition funds are used to protect areas that have native fish and/or wildlife values and provide natural resource benefits over a broad geographical area, and for acquisition management activities. Emphasis is placed on acquiring important fish and wildlife habitat necessary for the conservation of listed, endangered and threatened species; nationally important wetlands; and additions to existing national wildlife refuges. The program focuses on projects that use alternative and innovative conservation tools, such as easements, and projects that include the input and participation of the affected local communities and stakeholders.

The Landowner Incentive Program provided cost-shared, competitive grants to States, the District of Columbia, territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These State, Tribal, and territorial programs provide technical and financial assistance to private landowners all across the country to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008.

The Partnerships for Wildlife Act (16 U.S.C. 3741) authorizes wildlife conservation and appreciation projects to conserve fish and wildlife species and to provide opportunities for the public to enjoy these species through nonconsumptive activities. Grants to States are directed toward nonconsumptive activities and the conservation of species not taken for recreation, fur, or food; not listed as endangered or threatened under the Endangered Species Act of 1973; and not defined as marine mammals under the Marine Mammal Protection Act of 1972. The Budget proposes to close the account by cancelling longstanding unobligated balances.

The Fish and Wildlife Service is proposing to amend the Migratory Bird Hunting and Conservation Stamp Act, to increase the sales price for Duck Stamps from \$15 to \$25 for 2009. We estimate sales of approximately 1.4 million Duck Stamps in 2009 providing a total of \$35 million at the \$25 price, an increase of \$14 million annually. With the additional receipts, the Service anticipates acquisition of more than 6,800 acres in fee and approximately 10,000 acres in conservation easements in 2009.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707) and interest on obligations held in the Federal Aid in Wildlife Restoration Fund. The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. A portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for conservation, recovery, and monitoring projects for species that are listed, or species that are candidates for listing, as threatened or endangered. Grants are also awarded to States and U.S. territories for land acquisition in support of Habitat Conservation Plans and species recovery efforts in partnership with local governments and other interested parties to protect species while allowing development to continue. The Fund is partially financed by permanent appropriations from the General Fund of the U.S. Treasury in an amount equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts and amounts equal to Lacey Act receipts over \$500,000. The actual amount available for grants is subject to annual appropriations. In FY2009, \$4.5m in unobligated funds are being permanently cancelled.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes revenues through the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. The Fish and Wildlife Service makes payments to counties in which Service fee lands are located. If the net revenues are insufficient to make full payments according to the formula contained in the Act, direct appropriations are authorized to make up the difference.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 200 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address backlogged maintenance needs, enhance resource protection, and cover the costs of collection. FLREA authorizes this program through 2014.

The Federal Aid in Wildlife Restoration Act, now known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise taxes on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program and a firearm and bow hunter education and safety enhancement program that provides grants to the States.

The Federal Aid in Sport Fish Restoration Act, now known as the Dingell-Johnson Sport Fish Restoration Act (as modified by the Wallop-Breaux and other amendments), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment, and certain other sport fish related products.

Since 1992, the Sport Fish Restoration Account has supported coastal wetlands grants pursuant to the Coastal Wetlands Planning, Protection and Restoration Act (P.L. 101-646). Additional revenue from small engine fuel taxes was provided under the Surface Transportation Extension Act of 1997 and again by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users, enacted for 2006 and beyond.

The Coastal Wetlands Planning, Protection and Restoration Act is funded through the Dingell-Johnson Sport Fish Restoration Act, which requires an amount equal to 18.5 percent of net deposits into the Sport Fish Restoration and Boating Safety Trust Fund, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, to be distributed as follows: 70 percent shall be available to the Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent shall be available to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects under Section 8 of the North American Wetlands Conservation Act (P.L. 101-233).

The Clean Vessel Act authorizes the Secretary of the Interior to make grants to States, in specified amounts as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. The Dingell-Johnson Sport Fish Restoration Act, as amended, provides for the transfer of funds from the Sport Fish Restoration and Boating Trust Fund to the Sport Fish Restoration Account for use by the Secretary of the Interior to carry out the purposes of this Act and for use by the Secretary of Homeland Security for State recreational boating safety programs (46 USC 13106(a)(1)). The Sportfishing and Boating Safety Act of 1998 authorizes the Secretary of the Interior to develop national and state outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources, as well as to make grants to states for developing and maintaining sewage disposal facilities and other boating facilities for recreational vessels.

Assistance is provided to States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat and provision of access for public use.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program and provides funding for several

fisheries commissions and the Sport Fishing and Boating Partnership Council.

The National Park System administers 391 areas and 78.8 million acres of land in 49 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the

Northern Marianas. These areas have been established to protect and preserve the cultural and natural heritage of the United States and its territories. Park visits total over 272 million annually. This annual appropriation funds the operation of individual units of the National Park System as well as planning and administrative support for the entire system. Funds within this appropriation are used to support the cooperative effort for restoration of the Everglades and are available until expended. Within this appropriation, repair and rehabilitation funds are available for two years, to provide the flexibility needed to carry out this project program, in which typical projects include, but are not limited to, facility, campground, and trail rehabilitation; roadway overlay and/or reconditioning; bridge repair; wastewater and water line replacement; and the rewiring of buildings. The repair and rehabilitation program includes funding to implement an automated facility management software system and to conduct comprehensive facility condition assessments.

Funds are to initiate the new Centennial Challenge matching grant program. This ten-year effort would generate up to \$2 billion in donations and matching funds for the renewal of the National Park System in preparation for the Centennial celebration in 2016. The 2008 appropriation served as interim funding pending permanent authorization for the full ten-year program. All funds must be matched on a 50/50 basis and are to be administered under the existing challenge cost-share program structure.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support NPS land acquisition activities and provide grants to States for the purchase of land for recreation activities. The Federal Land Acquisition Program provides funds to acquire certain lands, or interests in lands, for inclusion in the National Park System to preserve nationally important natural and historic resources. Funds are also used for Civil War Battlefield grants. The State Assistance Program provides grants for a wide array of State recreation projects as well as for acquiring lands, or interests in lands, for outdoor recreation purposes. No grants funds are requested in 2009.

Funds are also included for the National Park Service to manage and coordinate the Federal Land Acquisition Program. The administration of the State Assistance program grants awarded in prior years was moved in 2008 to the National Recreation and Preservation account, which also funds the administration of other grants.

Federal Lands Recreation Enhancement Act.—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). FLREA was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005, and authorizes this program through 2014. By law, up to 15 percent of proceeds may be used for administration, overhead, and indirect costs related to the program, and net proceeds are to be used for high-priority visitor service or resource management projects throughout the National Park System.

America the Beautiful: The National Parks and Federal Recreational Lands Pass.—Proceeds from the sale of national park and Federal recreational lands passes are to be distributed between the Federal land management agencies as determined by the Secretaries of these agencies in accordance with Public Law 108-447.

Deed-restricted parks fee program.—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105-327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

Transportation systems fund.—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105-391.

Educational expenses, children of employees, Yellowstone National Park.—Revenues received from the collection of short-term recreation fees to the park are used to provide education facilities to pupils who are dependents of persons engaged in the administration, operation, and maintenance of Yellowstone National Park (16 U.S.C. 40a).

Payment for tax losses on land acquired for Grand Teton National Park.—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

The Historic Preservation Fund finances 60 percent of programmatic matching grants-in-aid to States and certified local governments, as well as grants to Indian Tribes. The President's Preserve America initiative assists local communities in designing heritage tourism programs that support sustainable uses for historic assets and create economic opportunities for communities. Preserve America grants help States and communities preserve their historic resources by incorporating

the resources into their local economies; the grants also help local communities develop resource management strategies and sound business practices for the continued preservation of heritage assets, including historic resources and associated landscapes and natural features. Save America's Treasures grants help restore historic sites and collections, including significant documents, objects, manuscripts, photographs, works of art, journals, still and moving images, sound recordings, historic structures, and sites that document and illuminate the history and culture of the United States of America.

Park concessions franchise fees.—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105-391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations.

Concessions improvement accounts.—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account at the direction of the park superintendent for facilities that directly support concession visitor services, but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

Park buildings lease and maintenance fund.—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105-391.

Operation and maintenance of quarters.—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

Delaware Water Gap, Route 209 operations.—Fees collected for use of Route 209 within the Delaware Water Gap National Recreation Area by commercial vehicles are used for management, operation, and maintenance of the route within the park as authorized by Public Law 98-63 (97 Stat. 329), section 117 of Public Law 98-151 (97 Stat. 977) as amended by Public Law 99-88 (99 Stat. 343), and section 702 of Division I of Public Law 104-333 (110 Stat. 4185). The expired authorization was restored in fiscal year 1997 by Public Law 104-333 and in fiscal year 2006 by Public Law 109-156.

Glacier Bay National Park resource protection.—Of the revenues received from fees paid by tour boat operators or other

permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of Public Law 104-333 (110 Stat. 4185).

Filming and photography special use fees.—The National Park Service is authorized to retain fee receipts that are collected from issuing permits to use park lands and facilities for commercial filming, still photography, and similar activities. Amounts collected are used in accordance with the formula and purposes established under the Federal Lands Recreation Enhancement Act.

Contributions to U.S. Park Police annuity benefits.—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under Public Law 85-157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before fiscal year 2002, such payments were funded from appropriations made annually to the National Park Service.

Parkway construction project funds have been derived from the Highway Trust Fund through appropriations to liquidate contract authority, which has been provided under section 104(a)(8) of the Federal Aid Highway Act of 1978, title I of Public Law 95-599, as amended, and appropriation language, which has made the contract authority and the appropriations available until expended.

All work initially proposed under this program for the Cumberland Gap National Historical Park, the George Washington Memorial Parkway, and the Baltimore-Washington Parkway has been completed.

All remaining balances are expected to be expended on repairs to the Going-to-the-Sun Road in Glacier National Park, per P.L. 108-7, by the close of 2008.

ADMINISTRATIVE PROVISIONS

[For fiscal year 2008 and hereafter, if the Secretary of the Interior, or either party to a value determination proceeding conducted under a National Park Service concession contract issued prior to November 13, 1998, considers that the value determination decision issued pursuant to the proceeding misinterprets or misapplies relevant contractual requirements or their underlying legal authority, the Secretary or either party may seek, within 180 days of any such decision, the de novo review of the value determination decision by the United States Court of Federal Claims. This court may make an order affirming, vacating, modifying or correcting the determination decision.]

For the costs of administration of the Land and Water Conservation Fund grants authorized by section 105(a)(2)(B) of the Gulf of Mexico Energy Security Act of 2006 (P.L. 109-432), the National Park Service may retain up to five percent of the amounts which are authorized to be disbursed under such section, such retained amounts to remain available until expended.

The National Park Service may distribute to operating units based on the safety record of each unit the costs of programs designed to improve workplace and employee safety, and to encourage employees receiving worker's compensation benefits pursuant to chapter 81 of title 5, United State Codes, to return to appropriate positions for which they are medically able.

In addition to other uses set forth in section 407(d) of Public Law 105-391, franchise fees credited to a sub-account shall be available for expenditure by the Secretary, without further appropriation, for use at any unit within the National Park System to extinguish or reduce liability for Possessory Interest or leasehold surrender interest. Such funds may only be used for this purpose to the extent that the benefiting unit anticipated franchise fee receipts over the term of the contract at that unit exceed the amount of funds used to extinguish or reduce liability. Franchise fees at the benefiting unit shall be credited to the sub-account of the originating unit over a period not to exceed the term of a single contract at the benefiting unit, in the amount of funds so expended to extinguish or reduce liability.

[A] For fiscal year 2009 and hereafter, a willing seller from whom the Service acquires title to real property may be considered a "displaced person" for purposes of the Uniform Relocation Assistance and Real Property Acquisition Policy Act and its implementing regulations, whether or not the Service has the authority to acquire such property by eminent domain.

Section 3(f) of the Act of August 21, 1935 (16 U.S.C. 463(f)), related to the National Park System Advisory Board, is amended in the first sentence by striking ["2007"] "2009" and inserting ["2009"] "2010". (Department of the Interior, Environment, and Related Agencies Appropriations Act, 2008.)

Donations and contributed funds.—The Secretary of the Interior may accept donations of funds or other property and he may use the donated property in accordance with the terms of the donation in furtherance of any program authorized by other provision of law for the benefit of Indians (25 U.S.C. 451).

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs and Bureau of Indian Education may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Appropriations for the Bureau of Indian Affairs and Bureau of Indian Education (except the [revolving fund for loans, the Indian loan guarantee and insurance fund,] *Revolving Fund for Loans Liquidating Account, Indian Loan Guaranty and Insurance Fund Liquidating Account, Indian Guaranteed Loan Financing Account, Indian Direct Loan Financing Account,* and the Indian Guaranteed Loan Program account) shall be available for expenses of exhibits.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs or Bureau of Indian Education for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, [and] regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs or Bureau of Indian Education under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any *federally recognized* tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs or Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

Appropriations made available in this or any other Act for schools funded by the Bureau of Indian Education shall be available only to the schools in the Bureau of Indian Affairs school system as of September 1, 1996. No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995. Funds made available under this Act may not be used to establish a charter school at a Bureau of Indian Education-funded school (as that term is defined in section 1146 of the Education Amendments of 1978 (25 U.S.C. 2026)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau of Indian Education-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau of Indian Education a pro rata share of funds to reimburse the Bureau of Indian Education for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau of Indian Education funds, and the Bureau of Indian Education does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau of Indian Education-funded schools sharing a campus with a charter school and performing functions related to the charter schools operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Remaining funds in the Trust Territory of the Pacific Islands account will be used to meet final transition responsibilities of the United States. Outlays from numerous on-going infrastructure construction projects in the Republic of Palau and the other two entities will continue as provided by the Compacts of Free Association and appropriation laws and will be reported as Trust Territory expenditures until such time as the activities cease.

COMPACT OF FREE ASSOCIATION

For grants and necessary expenses, **[\$5,362,000]** \$4,818,000, to remain available until expended, as provided for in sections 221(a)(2), 221(b), and 233 of the Compact of Free Association for the Republic of Palau; and section 221(a)(2) of the Compacts of Free Association for the Government of the Republic of the Marshall Islands and the Federated States of Micronesia, as authorized by Public Law 99-658 and Public Law 108-188. The peoples of the Marshall Islands and the Federated States of Micronesia approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003, Public Law 108-188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023.

The Compact of Free Association with the Republic of Palau was implemented under the terms of Public Law 99-658 on October 1, 1994. This compact will provide annual benefits to the Republic totalling an estimated \$600 million over the fifteen-year period that began at the implementation date.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office's focus is in assisting the Secretary and the Congress to target resources toward developing solutions for the Department's most serious management and program challenges, and toward high-risk areas vulnerable to fraud, waste, abuse and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mission. The Office is required to keep the Secretary and the Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results about which Americans care most.

Program operations, support, and improvements.—This activity supports the management and investment of approximately \$3.3 billion held in trust for Tribes and individual Indians. Resources support the implementation of trust management reform efforts, including historical accounting*, and the accurate collection, investment, disbursement, and provision of timely financial information to Indian Tribes and individual Indian money (IIM) account holders.

(*The amount for historical accounting may be revised as legal issues pending before the Court are resolved.)

Tribal trust funds are deposited into a consolidated account in the U.S. Treasury pursuant to: (1) general or specific acts of Congress; and (2) Federal management of Tribal real properties, the titles to which are held in trust for the Tribes by the United States. These funds are available to the respective Tribal groups for various purposes, under various acts of Congress, and are subject to the provisions of Tribal constitutions, bylaws, charters, and resolutions of the various Tribes, bands, or groups.

Commencing with 2000, most Tribal trust funds, including special funds, managed by the Office of the Special Trustee for American Indians were reclassified as non-budgetary. Ownership of these funds did not change, nor did the Federal Government's management responsibilities; changes were made for presentation purposes only. Some Tribal trust funds will remain budgetary, in either this Tribal Special Fund or the Tribal Trust Fund presented later in this section. Most of the assets of these funds are in investments held outside Treasury.

This consolidated display presents the activities associated with the following accounts: Three Affiliated Fort Berthold Trust Fund; Standing Rock Trust Fund; Papago Cooperative Fund; Ute Tribe Trust Fund; Pyramid Lake Indian Reservation Trust Fund; Cochiti Wetfields Project; and San Luis Rey Water Authority Trust Fund. More detailed information on specific account data is provided in the budget justification for the Office of the Special Trustee for American Indians.

The Indian Gaming Regulatory Act, as amended by the 1998 Interior and Related Agencies Appropriation Act (P.L. 105-83), established the National Indian Gaming Commission as an independent agency within the Department of the Interior. The Commission monitors and regulates gaming activities conducted on Indian lands. Operating costs of the Commission are financed to the greatest extent possible through annual assessments of gaming operations, regulated by the Commission. The Native American Technical Corrections Act of 2006 (Public Law 109-221) included a provision replacing the previous fee limitation contained in the Indian Gaming Regulatory Act with a maximum of 0.08 percent of the gross gaming revenues of all gaming operations subject to regulation under Indian Gaming Regulatory Act.

The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 et seq.) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through negotiated settlements or other legal actions by the Department of the Interior.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a departmentwide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 et seq.), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq.), the Oil Pollution Act of 1990 (33 U.S.C. 2701 et seq.), and the Act of July 27, 1990 (16 U.S.C. 19jj et seq.). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The Budget reflects the receipts, transfers, and mandatory spending by the Department of Interior associated with the civil and criminal settlements resulting from the 1989 Exxon Valdez oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and Alaska State natural resource trustee agencies to restore the natural resources and services damaged by the spill. The Exxon Valdez Oil Spill Trustee Council consists of 3 State and 3 Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

The original civil settlement with the Exxon Corporation included a re-opener provision valid from September 2002 to September 2006, which provided an opportunity for the Trustee governments to claim up to an additional \$100 million for natural resource injury that could not have been known or anticipated at the time of settlement. In late 2006, the Trustee governments issued a demand letter for \$92 million to the ExxonMobil Corporation, as well as a comprehensive restoration project plan for the clean up of lingering oil.

The civil settlement and interest earned to date total roughly \$1 billion, of which \$148 million remains, outside the Treasury. The balance is managed on behalf of the Trustee Council by the State of Alaska, (Exxon Valdez Investment Fund), with funds earmarked for future habitat acquisition and protection and for marine research and ecological monitoring in the spill zone.

Preparedness.—This activity funds the non-emergency and predictable aspects of the Department's wildland fire program. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

Fire suppression operations.—This activity funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected, and consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the

soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Emergency stabilization actions may be performed within one year of containment of a fire. Funding requests are guided by the historical 10-year average of suppression expenditures, adjusted for inflation.

Other operations.—This activity funds programs designed to reduce the risk of damage resulting from catastrophic wildland fires. Hazardous fuels reduction, fire facilities construction and maintenance, post-fire rehabilitation of burned areas, applied research, and grants to rural fire departments are funded in other operations. The hazardous fuels reduction activity includes the planning, all operational aspects, and monitoring of treatments to reduce fuel loads and promote ecosystem health in forests and rangelands. Methods for fuels reduction include prescribed fire, mechanical, and chemical treatments or a combination of methods. The fire facilities program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting and hazardous fuels reduction. Facilities funded in this activity include crew quarters, warehouses, fire caches, dispatch centers, fire stations, engine storage, and aviation bases. The burned area rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire-adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The joint fire science activity funds the Department's share of the Joint Fire Science program, an interagency partnership to sponsor applied research to assist field managers in fire suppression, fuels treatment, and post-fire rehabilitation.

The Budget assumes that the first oil and gas lease sale in the coastal plain of the Arctic National Wildlife Refuge (ANWR) would be held in 2010, producing \$7.0 billion in receipts from bonuses which would be shared 50/50 between the Federal government and the State of Alaska. The Federal share of the royalties from the leased areas would be directed to reducing the budget deficit.
