Subject: suggestion regarding fire protection

During this last period of this congress, it is urged that the President, congressional representatives and other elected officials to consider following up with the resent alteration to 10 USC 2465 involving "partnership" exemptions for public safety with a section addressing Firefighters / fire & emergency services functions.

Suggested change or amendment to 10 USC 2465 allowing for the "Consolidation of existing civilian fire functions in to the local paid - full time fire agencies within an integrated partnership for basic fire suppression, emergency medical care, rescue and hazardous material operations, where specific and specialized Department of Defense / Military requirements are not required."

This would allow for an improved integrated response to emergencies which occur on and adjacent to various DoD facilities. Further, this has the potential to both improved the level of service to the public and government, as well as reduce the cost to maintain quality fire and rescue services.
