Washington, DC 20503

Dear Office of Information and Regulatory Affairs Hunt:

- The "OMB Draft Guidelines for the Conduct of Regulatory Analysis and the Format of Accounting Statements" determines that saving the life of an elderly person is worth less than saving the life of a younger person..
- This is a mere pretext to cut the value of health and safety standards in order to protect the industries that stand to gain from this White House initiative.
- If analysis is fully applied, regulations for air pollution, toxic waste cleanup, food labeling and other quality of life issues could be weakened or not even implemented at all—and our senior citizens and CHILDREN will feel the brunt of it since their health is the most vulnerable to dirty air and unhealthy food.

Sincerely,

Anthony Orkin
