Subject: o'hare

there is still an effort to throw this into windows 95. i'd like to understand some things:
>>> We're meeting at noon today in 5/1003 to discuss -- johngray, davidcol, ohare & rome leads. We'll send meeting minutes afterwards.

* oem only or upgrade too?

>>> I think we can do OEM no problem. Upgrade schedule is pretty tight, but we will investigate. If we're not in the upgrade, it makes our life easier, and we get more Plus revenue... :-)

* if upgrade then cd and floppy or just cd?

* if upgrade do we have our story down on plus versus win95 on this feature

thanks
