CONFIDENTIAL

---

## Situation Analysis

---

- IE is a fully integrated feature of Win98
  - IE5 will be part of Win98 SP2
- IE has around 50% browser share
  - Gaining ground
  - Larger portion of new users are using IE
  - Weakest segment: only 8% of education
- Many end users have IE & Netscape
  - View both browsers as parity products

---

## Situation Analysis

---

- "Connection to the Internet" is a top 3 reason for buying a computer
  - 71% of 1997 computer buyers are on-line
- "It came with my computer" is the #1 reason people switch to IE
- Users follow OEM's lead onto Internet
- **Conclusion:** OEM's are the best vehicle to gain browser share

---

# Netscape Navigator

- “Underdog” image, losing share, “Not MS”
- Loss of browser revenue has forced them to change to “portal” strategy
- Turned to development community to assist with version 5 - “Mozilla”
  - Cost effective way to port to other OS’s?
  - Produce higher quality product?
  - Better at solving customer needs?
  - OR, the downfall of their Internet client?

---

## **Netscape - Their Message**

- "World's most popular Internet client"
- Every small press endorsement is victory
- Still use comparisons to IE4 beta 2
- Proclaim popularity, "10,000 companies will distribute 100,000,000 copies in 98"
- IE is "Windows only" and supports Microsoft proprietary protocols instead of open Internet standards

---

# **Netscape - What will they do?**

- **OEM Channel:**
  - Work hard to gain 2 or 3 OEM partners, and leverage victory to gain breadth
  - Continue to develop “server” partnerships
- **Push distribute through Netscape.com, ISP’s, and businesses**
- **Promotional trials with prizes and discounts**

---

# Objectives

---

- Gain commitment from top 10 OEM's to adopt and promote IE5
  - Pre-install on next cycle
  - Revamp web sites
- Deliver high OEM and EUJ customer satisfaction
  - Overcome IE4 problems
- Increase browser share to 65%
  - Launch is great "occasion" to switch users

---

## Issues

---

- Does Chrome have enhanced performance with IE5?
- Can we develop an "Internet Upgrade Utility?"
  - Will be allowed to ship it?
- Weak relationships with OEM Webmasters
- IE5 will not be pre-installed until Spring
- Will OEM's share customer lists?
- Smaller footprint?

---

## Issues II

---

- Name / "Windows Explorer" similarities
- Lower support costs? Prove it!
- Windows feature vs. multi-platform
- Version #'s: IE5,6 vs. IE2000
- How to focus on "Activating IE"
- Ship paper about IE5 website with computers before pre-install
- Content/features for OEM websites
- Launch event? No

---

# Strategy

---

- Promote value of IE5 as
  - Lower support costs than IE4 & Netscape
  - “Superior end-user experience”
  - Integration: Win98, Office9, Chrome
- Get OEM’s involved early
- Filter message to end users
  - “Activate IE”

---

## **Phase I - Initial Contact**

---

- Engage the OEM's early
- IE 5 announcement
- Web site for OEM's to get betas/daily builds
- IE4 OEM satisfaction survey

## **Phase II - Prepare message/tools**

- **Develop sales material, presentations, and tools for OEM Account Managers**
- **Integration message**
- **Lower support costs**
  - Support savings study: IE5 vs IE4 & NTSCP
- **New features**
- **Additional corporate / EU value**
- **Develop "Internet Upgrade Utility"**

---

## **Phase III - Build Excitement**

- Sell to OEM's and gain commitment from top 20 OEM's to ship & promote
- Encourage OEM's to revamp Channels and web sites to promote IE5
  - Demonstrate value of Channels, DHTML & XML to improve OEM-EU relationships
  - \$\$ for Top 10 OEM web site changes

## **PHASE IV - Encourage, PR, Launch**

- Work with OEM's to utilize IE5 to further differentiate their products
- Joint PR opportunities
- "Where to find an IE5 computer" page on microsoft.com
- Deliver "Internet Upgrade Utility" with OPK
- Explore joint marketing opportunities to solicit Netscape users to convert to IE5
- No launch event, yet.

---

## **Phase 5 - Post Launch**

- Continue to maintain OEM accounts
- Implement programs to convert Netscape users to IE5
  - Pay particular attention to computers sold to educational accounts (only 8% share)

# OEM's Value

---

- **Supports better**
- **Smaller footprint?**
- **Cool content / improve relationships**
- **Customer satisfaction**
  - **Faster**
  - **Easier**
  - **More stable, manageable**
  - **Speed**

---

# Features

---

- ***Lower TCO / Support***
- Web applications
- Trident
- End User experience
  - Simplified browsing experience
  - Speed (performance), URL help
  - Enhanced searches & error messages
  - Customize toolbars, consistency
  - Save web pages, off-line/laptop support

---

# Support Cost Reductions

MS98 0125670  
CONFIDENTIAL

---

---

## Schedule

---

- **May 15, IE5 Beta 1**
- June 22, NT5 Beta 2
- June 22, Office 9 Beta 1
- July 15, Chrome RTM
- **Sept. 22, IE5 Beta 2**
- **Nov. 1, IE5 RTM**
- Dec, Office 9 RTM (ships with IE5)
- Jan-March, NT5 RTM (ships with IE5)

---

## Next Steps

- OEM IE4 survey approved & sent by OEM division
- List OEM's to get Beta 1, communicate
- Approve/program/integrate "Internet Update Utility"
- Determine OEM web content/initiate update process
- Develop OEM sales plan --> tools
- Support cost study, **Beta 2+** timeframe
- Discuss Netscape conversion programs
- **Resolve additional issues**
