REF: Delaware Office of Safety and Health Consultation

Dear Senator Biden:

Penn Fibre Plastics, Inc. is a manufacturer that employs 65 people in Greenwood, DE. I am writing to inform you of the valuable service that is provided by the Department of Labor's Office of Safety and Health Consultation.

This Consultation service is of great benefit to small and medium-sized companies such as ours to ensure compliance to all applicable Codes of Federal Regulations of the OSHA ACT. Their approach of working together with us is highly productive. As a result, the negative stereotype of OSHA as an enforcer and regulator is corrected through the work of the Delaware Office of Safety and Health Consultation service, which demonstrates that compliance is good for business and good for people. Frankly, we would be hard-pressed to remain in compliance or in a competitive position without this service. The OSH Consultation is a true partnership between government and business that effectively establishes and promotes safe and competitive work environments.

Thank you in advance for your support and recognition of a truly beneficial program such as this.

Sincerely,

Timothy D. Parker  
Operations Manager
