PBGC - Participant Services

Exhibit 300: Capital Asset Plan and Business Case Summary

Part I: Summary Information And Justification

Section A: Overview

1. Date of submission: Sep 10, 2006

Agency: **012** Bureau: **12**

3. Barcaa. 12

4. Name of this Capital Asset: **PBGC - Participant Services**

5. Unique Project (Investment) Identifier: 012-12-01-05-01-2075-00

6. What kind of investment will this be in FY2008? Mixed Life Cycle

7. What was the first budget year this investment was submitted to OMB? FY2004

8. Provide a brief summary and justification for this investment, including a brief description of how this closes in part or in whole an identified agency performance gap: This investment (1) operates and maintains the suite of business systems that are used by the PBGC to provide benefits administration and payment services to over 1,100,000 citizens who are vested participants in pension plans that PBGC has trusteed; it also (2) modernizes and enhances several key investment components to improve PBGC's customer service and reduce its operating costs. This investment consists of 9 components: (1) Benefit Payments (Paying Agent Bank); (2) Spectrum/Participant Records Information Systems Management (PRISM) Re-Engineering: One of PBGC's key initiatives is to re-engineer (i.e., consolidate and modernize) the PRISM applications into the new Spectrum system which is designed to integrate with the Commercial Off-The-Shelf (COTS) Customer Relationship Management (CRM) system resulting in an "Unified Desktop"; (3) Customer Relationship Management (CRM): The enhancements planned for FY 2006-FY2007 integrate CRM with the new Spectrum system, improving not only staff efficiency, but also, providing a much more complete view of the participant to the PBGC's customer-service staff; (4) Image Processing System (IPS): (5) Participant Administration Maintenance Team (PAMT)/PRISM: This activity provides operational maintenance for the PRISM (Participant Records & Information System Management) suite of applications; (6) My Pension Benefit Account (MyPBA): provide Internet self-service for PBGC participants. The current investment will produce a much greater degree of integration between MyPBA and the elements of the Unified Desktop (CRM and Spectrum,); (7) ARIEL is a COTS system that calculates defined-benefit pension-plan benefits, and has been modified somewhat to meet the unique needs of the PBGC; (8) Case Management System (CMS) remakes the legacy Case Administration System for managing trusteed plans; (9) Data Acquisition: This project modernizes the PBGC's automated methods for acquiring participant data from companies sponsoring

trusteed pension plans, and will deliver a highly automated means of loading data needed to calculate benefits. The performance gap that this investment keeps from widening is continuing benefits administration for over 1.6 million citizens who are participants in the over 3,000 terminated pension plans PBGC has trusteed, on an aging legacy database infrastructure. With FY 2008 funding PBGC will begin to redesign the underlying participant database - an activity that will take years to complete.

- 9. Did the Agency's Executive/Investment Committee approve this request? yes
 - a. If "yes," what was the date of this approval? Jun 15, 2006
- 10. Did the Project Manager review this Exhibit? yes
- 11. Contact information of Project Manager?

NameAnand Kothari

Phone Number 202-326-4000

E-mailKothari.anand@pbgc.gov

- 12. Has the agency developed and/or promoted cost effective, energy efficient and environmentally sustainable techniques or practices for this project. **no**
 - a. Will this investment include electronic assets (including computers)? yes
 - b. Is this investment for new construction or major retrofit of a Federal building or facility? (answer applicable to non-IT assets only) [Not answered]
 - 1. If "yes," is an ESPC or UESC being used to help fund this investment? [Not answered]
 - 2. If "yes," will this investment meet sustainable design principles? [Not answered]
 - 3. If "yes," is it designed to be 30% more energy efficient than relevant code? [Not answered]
- 13. Does this investment directly support one of the PMA initiatives? **no**

Expanded E-Government

Competitive Sourcing

Financial Performance

a. Briefly describe how this asset directly supports the identified initiative(s)? Financial Performance: Modernizing reduces legacy maintenance costs, reduces workarounds to compensate for limitations and inflexibility, and improve controls over financial transactions. Competitive Sourcing: Moves risk from to the Contractor under the Paying Agent component which is being re-competed as a Performance Based Contract. Expanding E-Gov: My PBA provides participants with personalized on-line self-service centers, and will integrate with the ARIEL component.

- 14. Does this investment support a program assessed using the Program Assessment Rating Tool (PART)? (For more information about the PART, visit www.whitehouse.gov/omb/part.) yes
 - a. If "yes," does this investment address a weakness found during a PART review? **no**
 - b. If "yes," what is the name of the PARTed program? **Pension Benefit Guaranty Corporation**
 - c. If "yes," what rating did the PART receive? Moderately Effective
- 15. Is this investment for information technology? **no**

For information technology investments only:

- 16. What is the level of the IT Project? (per CIO Council PM Guidance) Level 2
- 17. What project management qualifications does the Project Manager have? (per CIO Council PM Guidance) (1) Project manager has been validated as qualified for this investment
- 18. Is this investment identified as "high risk" on the Q4 FY 2006 agency high risk report (per OMB's "high risk" memo)? **no**
- 19. Is this a financial management system? yes
 - a. If "yes," does this investment address a FFMIA compliance area? yes
 - 1. If "yes," which compliance area: Section 2, Section 4
 - 2. If "no," what does it address? [Not answered]
 - b. If "yes," please identify the system name(s) and system acronym(s) as reported in the most recent financial systems inventory update required by Circular A-11 section 52 **PRISM**; **CAS**
- 20. What is the percentage breakout for the total FY2008 funding request for the following?

Hardware2

Software8

Services 90

Other₀

- 21. If this project produces information dissemination products for the public, are these products published to the Internet in conformance with OMB Memorandum 05-04 and included in your agency inventory, schedules and priorities? **n/a**
- 22. Contact information of individual responsible for privacy related questions:

Name Philip Hertz

Phone Number 202-326-4000

Title

E-mail

hertz.philip@pbgc.gov

23. Are the records produced by this investment appropriately scheduled with the National Archives and Records Administration's approval? **yes**

Section B: Summary of Spending

1.

Table 1: SUMMARY OF SPENDING FOR PROJECT PHASES (REPORTED IN MILLIONS)

(Estimates for BY+1 and beyond are for planning purposes only and do not represent budget decisions)

	PY-1 and earlier	PY 2006	CY 2007	BY 2008	BY+1 2009	BY+2 2010	BY+3 2011	BY+4 and beyond	Total
Planning:	0.5	0.2	0.2	0.2	0.2	0.2	0.2	0.2	1.9
Acquisition:	8.6	9.8	9.3	11.1	11.2	5.9	6.1	6	68

- 2. If earned value is not required or will not be a contract requirement for any of the contracts or task orders above, explain why: Only a few of the listed contracts provided DME that is greater than the PBGC's established \$500,000 threshold for requiring EV. Those contracts are as follows: CT-02-0641, CT-04-0685, PBGC01-DO-03-0175, PBGC01-DO-06-0169. These contracts support the PRISM re-engineering, CRM, MyPBA and CMS development work
- 3. Do the contracts ensure Section 508 compliance? **yes**
 - a. Explain why: Section 508 compliance is an explicit, mandatory requirement enforced by the Corporation's contracting officer and wholly supported by its General Counsel and its Chief Technology Officer. In order to comply with PBGC requirements, any user software acquired (or developed)by the Corporation must provide an application interface that complies with the

software application standards required by Section 508 of the Rehabilitation Act as detailed in 36 CFR 1194, Subpart B

- 4. Is there an acquisition plan which has been approved in accordance with agency requirements? **yes**
 - a. If "yes," what is the date? Oct 31, 2005
 - b. If "no," will an acquisition plan be developed? [Not answered]
 - 1. If "no," briefly explain why: [Not answered]

^{5.} Have any weaknesses, not yet remediated, related to any of the systems part of or supporting this investment been identified by the agency or IG? **yes**

- a. If "yes," have those weaknesses been incorporated into the agency's plan of action and milestone process? **yes**
- 6. Indicate whether an increase in IT security funding is requested to remediate IT security weaknesses? **yes**
 - a. If "yes," specify the amount, provide a general description of the weakness, and explain how the funding request will remediate the weakness. Yes, a request of \$2.7 million was requested but not approved, pending further information. OMB's approval is pending further information. Of that \$2.7 million, \$1.5 million was requested to make various improvements to PBGC's enterprisewide information security program and to complete eight additional C&As during FY2007. The remainder of the request related to smart cards, data encryption and two-factor authentication. Additionally, during January 2007, PBGC management will begin a strategic review of security requirements and funding, in order to decide the funding schedule and possible funding sources for the improvements and C&As needed. PBGC has made substantial progress by hiring a third party Information Security vendor to assist in developing an effective Risk Management Program and performing Independent Validation and Verification (IV&V) on new and in progress C&A efforts. While in this role, the Vendor also performed a gap analysis comparing PBGC's security program to all OMB, NIST Special Publications, and FISMA information security guidelines, and then mapped them back to PBGC's information security reportable condition. This analysis served as a baseline for planned Risk Management activities upgrading PBGC's security program to include Risk Management and Certification and Accreditation. The IV&V vendor is also assisting PBGC in developing system specific/ enterprise-level Security Plans of Action and Milestones. The systems listed in this investment have been certified and accredited as listed. PBGC will re-certify Administar, IPVFB, PRISM/Spectrum and CAS/CMS during FY2007. The other systems listed will receive C&A's as they are prioritized and aligned with the strategic planning process scheduled from January to April 2007.
- 7. How are contractor security procedures monitored, verified, and validated by the agency for the contractor systems above? **Not applicable, PBGC believes: none of these systems will be operated outside of PBGC control.**

	8. Planning & Operational Systems - Privacy Table:

- 5. Will the application leverage existing components and/or applications across the Government (i.e., FirstGov, Pay.Gov, etc)? **no**
 - a. If "yes," please describe. [Not answered]
- 6. Does this investment provide the public with access to a government automated information system? **yes**
 - a. If "yes," does customer access require specific software (e.g., a specific web browser version)? **no**
 - 1. If "yes," provide the specific product name(s) and version number(s) of the required software and the date when the public will be able to access this investment by any software (i.e. to ensure equitable and timely access of government information and services). No specific software is required.

Part II: Planning, Acquisition And Performance Information

Section A: Alternatives Analysis

- 1. Did you conduct an alternatives analysis for this project? yes
 - a. If "yes," provide the date the analysis was completed? May 5, 2006
 - b. If "no," what is the anticipated date this analysis will be completed? [Not answered]
 - c. If no analysis is planned, please briefly explain why: [Not answered]

2. Alternatives Analysis Results:							
Alternative Analyzed	Analyzed Description of Alternative		Risk Adjusted Lifecycle Benefits estimate				
Complete Re- Development of Legacy Systems	Fully address the performance gap by complete redevelopment of Participant Services Systems and continued maintenance and operation of back-office components (IPS, PAMT, Paying Agent). Particular features: (1) Unified Desktop with major releases of: in-bound channel tracking, Enhanced workflow; CTI/IVR integration and outgoing correspondence tracking with minor releases of bug fixes, implementation of deferred and new user requirements, oracle application upgrades and maintenance.	215.3	229.2				
Significant Redevelopme nt of Legacy Systems	Closing performance gap by realizing performance improvements in the longer term. Critical elements are the limitations and inflexibilities of the legacy systems (PRISM, CAS) that hamper operations today and require the introduction of workarounds and compensating controls. Staged re-engineering of the key components of the Participant Services Systems-utilizing COTS, and continued maintenance and operation of back-office components (IPS, PAMT, Paying Agent)	191.7	221.8				
Esseential Redevelopme nt of Legacy	Close critical elements of the gap while minimizing impact on the budget. Replaces PRISM Benefits, which is a significant source of the limitations and inflexibility previously described, and also partially replaces CAS	185.9	210.5				

Systems	functionality with CMS, thus eliminating the	
	limitations on case administration imposed by the	
	legacy application. It also begins integrating MyPBA	
	with CRM to enable customer requests received via the	
	web, telephone, letter, and e-mail to be tracked	
	together.	

- 3. Which alternative was selected by the Agency's Executive/Investment Committee and why was it chosen? Under all three alternatives, the benefits are similar: improved staff efficiency through the elimination of the legacy PRISM application (which is composed of 19 separate modules, each of which executes as an independent application); improved customer contact center (Call Center) efficiency through consolidation of customer requests in the CRM system; reduced Call Center and higher-level support requirements through customer self-service via the MyPBA system; improve management and administration of PBGC cases through the new CMS application: lower systems maintenance costs through replacement of old legacy software with modern software organized as services or provided as COTS. The magnitude and timing of the realization of the benefits varies, of course. Alternative 3 was chosen for its lower cost and ability to meet the most important of PBGC's service objectives with acceptable risk. Alternative 3 will allow access to ARIEL benefits statements through MyPBA (i.e., Internet access by participants to benefits statements previously available only in hard copy), provide a GUI for actuaries using ARIEL (improving their productivity), automate the accessibility of trusteed pension plan information through MyPBA (lower costs per plan made accessible), integrate MyPBA with the Unified Desktop (participant contacts made via the Internet tracked with other participant contacts and services through CRM), integrate mail capture through IPS (scanning and imaging of participant mail) with CRM to consolidate tracking, and retire components of the legacy PRISM system (reducing maintenance costs.) Alternative 3 was also chosen in order to optimize the PBGC's overall IT portfolio, particularly in FY 2006 and FY 2007. Given the needs for new or modernized IT systems to support other vital portions of the PBGC's business, PBGC made its choice in order to present a total agency budget request that was balanced and met the immediate needs of its business areas. According to our cost-benefit analysis, through FY 2011 the ROI for Alternative #1 is 106%, for Alternative #2 is 116% and for Alternative #3 was 113%.
- 4. What specific qualitative benefits will be realized? Improve vitally needed operational flexibility at cost of modest operational risk: for FY 2008 and FY 2009, this alternative will shift all but absolutely essential maintenance resources to beginning the re-design of the legacy GENESIS database, which was first deployed in 1996.

Section B: Risk Management

- 1. Does the investment have a Risk Management Plan? no
 - a. If "yes," what is the date of the plan? [Not answered]

- b. Has the Risk Management Plan been significantly changed since last year's submission to OMB? [Not answered]
- c. If "yes," describe any significant changes: [Not answered]
- 2. If there currently is no plan, will a plan be developed? **yes**
 - a. If "yes," what is the planned completion date? Mar 31, 2007
 - b. If "no," what is the strategy for managing the risks? [Not answered]
- 3. Briefly describe how investment risks are reflected in the life cycle cost estimate and investment schedule: A Risk Management Plan is currently under development with an anticipated completion date of 03/31/2007. The Participant Services project manager will work within the allocated budget to determine activities that can be supported for the year. The budget will be divided into areas of support, which will be aligned with the project schedule. The schedule will track activities relating to risk, specifically: MOUs and ISAs, OMB reporting, application and data releases, partner working groups and meetings, and overall project management. Each of Risk Management Early Warning / Legal Matter Management fiscal year goals will be tracked in the project schedule so as to ensure on-time and on-budget delivery. The investment's scope, schedule, and cost will be reviewed and baseline through the initiative's oversight and governance procedures. In addition, the milestones will be reported to OMB through the OMB Dashboard and Milestone reporting process. The tasks' scope and completion are validated, and the cost and schedule are tracked using earned value management. Section B of this Exhibit 300 will be included in the enterprise plans of actions of milestones (POA&M).

Section C: Cost and Schedule Performance

- 1. Does the earned value management system meet the criteria in ANSI/EIA Standard 748? **no**
- 2. Answer the following questions about current cumulative cost and schedule performance. The numbers reported below should reflect current actual information. (Per OMB requirements Cost/Schedule Performance information should include both Government and Contractor Costs):
 - a. What is the Planned Value (PV)? 9.588
 - b. What is the Earned Value (EV)? 9.446
 - c. What is the actual cost of work performed (AC)? 9.553
 - d. What costs are included in the reported Cost/Schedule Performance information (Government Only/Contractor Only/Both)? **Contractor Only**
 - e. "As of" date: Oct 31, 2006
- 3. What is the calculated Schedule Performance Index (SPI= EV/PV)? 0.99
- 4. What is the schedule variance (SV = EV-PV)? **-0.142**
- 5. What is the calculated Cost Performance Index (CPI = EV/AC)? **0.99**

- 6. What is the cost variance (CV = EV-AC)? **0.106**
- 7. Is the CV% or SV% greater than \pm 10%? (CV%= CV/EV x 100; SV%= SV/PV x 100) **no**
 - a. If "yes," was it the? [Not answered]
 - b. If "yes," explain the variance: [Not answered]
 - c. If "yes," what corrective actions are being taken? [Not answered]
 - d. What is most current "Estimate at Completion"? 9.6
- 8. Have any significant changes been made to the baseline during the past fiscal year? **no**
 - a. If "yes," when was it approved by OMB? [Not answered]

9. Comparison of Initial Baseline and Current Approved Baseline:									
	Initial Baseline		Current Baseline			Current Baseline Variance
