CAS: you may want to talk to Rocky about where they are putting in sheetrock.  
The sooner the better. O

good evening senator, [REDACTED] i went over to the house today and noodled it a bit and I think things will start moving very quickly now. the plumbing is roughed in and the appliances shouldnt take that long to install. rocky tells me that a four man crew should be able to hang the sheet rock in one day[right] the electricians should be here within the next two weeks and hopefully we will be through by the end of october. that is pretty fast i suppose for all that is being done. augie and his crew are there everyday and work diligently and expertly. ill be back on the 7th [REDACTED]
