DEPARTMENT OF EDUCATION

[CFDA No: 84.346]

Career Resource Network State Grants; Notice Inviting Applications for New Awards for Fiscal Year (FY) 2000

Notice to Applicants: This notice is a complete application package. Together with the statute authorizing the program and the Education Department General Administrative Regulations (EDGAR), the notice contains all of the information, application forms, and instructions needed to apply for a grant under this program.

Purpose of Program: To promote improved career and education decision-making by individuals.

Eligible Applicants: State entities designated jointly by the Governor and the State Board for Vocational and Technical Education of any of the 50 States, the Virgin Islands, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau are eligible for an award under this process. However, the Marshall Islands, Federated States of Micronesia, and the Republic of Palau are eligible to receive funds only in Fiscal Years 2000 and 2001. A State may designate an entity other than a State agency to perform the grant functions under this program. However, if a designated entity is not a part of the State government, the eligible agency for the State under section 112 of the Carl D. Perkins Vocational and Technical Education Act of 1998 (Perkins III) must apply for the grant. In that event the eligible agency under Perkins III will be the grant recipient and must either directly administer the grant or supervise the administration of the project, as required by 34 CFR 75.701.

Not more than one grant will be awarded to serve the residents of a single State or outlying area in this competition.

To receive funding, each applicant must submit evidence that the designated entity, whether it is part of the State government or another entity that will perform the grant function for the eligible agency under Perkins III, has been designated jointly by the Governor and the State Board for Vocational and Technical Education. In any case, if the designated entity is not a State agency, the eligible agency under Perkins III and the Governor are accountable for the proper expenditure of funds.

Deadline for Transmittal of Applications: June 12, 2000.

Deadline for Intergovernmental Review: June 26, 2000.

Available Funds: \$7,650,000 for the first 12 months of the 24-month project period. Funding for the second 12-month period of the 24-month project period is subject to the availability of funds and to a grantee meeting the requirements of 34 CFR 75.253.

Estimated Range of Awards: The actual amount of each award made under this competition will depend on such factors as the scope and quality of the application and will be determined during pre-award clarification discussions with the Department's Office Vocational and Adult Education, Division of Vocational-Technical Education. However, the Department strongly encourages all applicants to consider these factors and the estimated grant amounts provided below, in deciding the amount of funds to request.

The estimated grant amounts were determined by allocating to every State and outlying area a minimum amount that the Department believes is necessary to carry out an effective program and distributing the remaining funds on the basis of each State's or outlying area's respective share of the funds allocated by formula under section 111 of Perkins III. The formula set out in section 111 takes into account State population and per capita income, among other factors. These grant estimates assume that all 59 eligible applicants will submit applications which meet the requirements established by the statute and this notice and are determined by the Department to merit funding, based on the criteria described in this notice.

SUPPLEMENTARY INFORMATION:

Background

Supporting the career development of young people and helping them to make informed choices about their educational and career options have become important components of State and local efforts to reform schools and improve student achievement. Understanding the connection between what is taught in the classroom and how that knowledge will be used in a future career can make learning more meaningful to students, increase their motivation to learn, and improve student results. Reform-driven innovations such as charter schools, magnet schools, and career academies, include models that use broad career areas as the context for teaching challenging academic content and technical skills. These and other models incorporate early exposure to career possibilities, and the educational requirements needed to pursue them, as strategies to help students and parents make decisions that best meet each student's individual interests, needs, and aspirations.

Research also indicates that many young people, particularly those from low-income families, do not enroll in postsecondary education because they lack sufficient information about career opportunities and the education and training required for entry into and success in their chosen field. Students who do not develop a career and education plan prior to entering secondary school are less likely to enroll in school courses required for college entry and do not plan adequately for college education financing. Effective career guidance and academic counseling can help ensure that students and their parents set their sights high, plan for, and are prepared for postsecondary education.

While career development is particularly important for young people, individuals of all ages need access to information and guidance on careers. New technologies, heightened global competition, and the information revolution are transforming the nature of work and careers. Individuals can no

longer assume that they will work for the same organization, remain within the same industry, or even require the same technical skills during their entire working lives. They must have access to career and educational information so that they may become active in making decisions regarding their occupation. To succeed in our dynamic, rapidly-changing economy, all individuals need up-to-date academic and technical skills, as well as access to career and education information, so that they may become active and effective managers of their own careers.

Growing recognition of the important role that career guidance and academic counseling services play in supporting student success is evidenced by the variety of Federal, State, and local programs which promote and support these services. Several Department of Education programs, including Perkins III State grants, Tech-Prep, GEAR-UP, and TRIO programs, provide funding for career guidance and academic counseling services for students. In addition, the School-to-Work Opportunities Program, jointly-administered by the Department of Education and the Department of Labor, has provided "venture capital" to State and local partnerships, to initiate or expand a wide range of career development activities for young people. Many States, local educational agencies, and institutions of higher education also support career guidance and academic counseling services for students. In addition, with assistance under Title I of the Workforce Investment Act (WIA), States and localities are building One-Stop Career Center systems that offer all individuals information and assistance in obtaining employment, training, and education.

Career Resource Network Grants

Career Resource Network grants provided under section 118 of Perkins III support the implementation of Statewide, systemic strategies for providing young people and adults with these critical career information resources and the skills they need to make effective educational and career decisions throughout their lives.

To achieve this goal, State entities may engage in a variety of activities such as research and innovative product development, professional development activities, development of career information delivery systems, and the development and dissemination of curricula and other learning resources.

Coordination With Related Program Activities

To assist States in improving student performance and outcomes, all programmatic and technical assistance activities need to be coordinated within a continuous improvement framework. The identification of the major strategies that positively impact student performance and integration of those strategies within a State's performance measurement system is critical to achieving results. As a result, the Department has begun to align all of its major grant resources, initiatives, and technical assistance activities, to assist States in their efforts to improve student performance. These include: Efforts to achieve education reform through the development of career pathway models, funding of professional development and training projects, and development of performance measurement systems. The Department views coordination and alignment of the activities required under section 118 to its major initiatives, as critical in supporting States' efforts to improve student performance.

In response to the changing economy and education reform initiatives in States, the Department identified sixteen industry-based career areas. These career areas represent all sectors of the economy and include all occupations front line through professional/technical managers. The career areas as they are defined in Appendix A of this notice provide the basis for creation of career pathway models that can be used for the development of both career and academic guidance tools and resources and curriculum development. The U.S. Secretary of Education recently announced the "Building Linkages" initiative which is designed to help students more effectively develop and realize career goals. The Secretary was joined by the U.S. Secretary of Transportation in unveiling this initiative which uses the Department's 16 career clusters as the basis for career mapping and curriculum development to prepare a student to succeed in a particular field of endeavor. The Department has funded the Building Linkages projects in five of the sixteen career areas to bring together States, in partnership with colleges, universities and employers, to develop curriculum frameworks. The sixteen areas replace the traditional areas once used by vocational education for reporting student enrollment. The new sixteen areas better reflect career opportunities in the new economy and can be aligned to existing career areas identified by

States. These sixteen career areas are (See Appendix A for definitions):

- (a) Agriculture and Natural Resources
- (b) Construction
- (c) Manufacturing
- (d) Logistics, Transportation And Distribution Services
- (e) Information Technology Services
- (f) Wholesale/Retail Sales And Service
- (g) Financial Services
- (h) Hospitality And Tourism
- (i) Business And Services
- (j) Health Services
- (k) Human Services
- (l) Arts And Communications Services
- (m) Legal And Protective Services
- (n) Scientific Research And Technical Services
- (o) Education And Training Services
- (p) Public Administration/Government Services

Career information products organized by the sixteen career cluster areas are used by career guidance and academic counseling programs, schools, teachers, students and parents to understand and explore broad career pathways within and among these career areas. Career areas provide the structure for converting labor market information into useable career information resources and tools for a variety of users. Organizing education by broad career areas and pathways represents a new direction in education and will require training and technical assistance to teachers, school administrators, and counselors to effectively assist students and parents in using this information.

In addition, Perkins III shares a number of common performance goals with WIA titles I and II, including academic and skill attainment, program completion, and placement and retention in employment and postsecondary education. The Department encourages State entities to align their products and services with performance measurement systems under development by Federal and State education, vocational education, workforce development programs, and labor market information organizations in order to support State and local efforts to meet performance targets in their performance measurement systems.

Since 1976, most States and outlying areas have received grants from the National Occupational Information Coordinating Committee (NOICC) to support interagency State Occupational Information Coordinating Committees (SOICCs) under the Carl D. Perkins Vocational and Applied Technology Education Act of 1990 (P.L. 101-392) and its predecessors. Since 1982, States

and outlying areas have also received such grants under the Job Training Partnership Act of 1982 (JTPA) (PL 102-367). Funding for these grants ends on June 30, 2000, with the expiration of JTPA. While some of the activities authorized under section 118 of Perkins III are similar to those which could have been carried out under the SOICC grant program, there are some significant differences which should be noted by applicants.

Unlike the previous SOICC grant program, the development, implementation, and maintenance of occupational information systems and labor market information products are not authorized uses of funds under section 118 of Perkins III. Section 15 of the Wagner-Peyser Act as amended by the Workforce Investment Act (WIA) authorizes States and outlying areas to collect, analyze, and disseminate occupational and labor market information. In contrast, section 118 of Perkins III funds may be used by States and outlying areas for the development and delivery of career counseling and educational guidance resources and services, which utilize the occupational and labor market information.

Further, none of the functions and activities assisted under section 118 may duplicate functions and activities carried out under the WIA or section 15 of the Wagner-Peyser Act. To assist job-seekers as well as employers, the Department of Labor has created America's Career Kit, an array of online information resources on job openings, persons looking for employment and their qualifications, and education and training opportunities. With assistance under Title I of the WIA, States and localities are building One-Stop Career Center systems that offer all individuals information and assistance in obtaining employment, training, and education. Section 15 of the Wagner-Peyser Act also provides States and outlying areas with assistance in collecting, analyzing, and disseminating occupational and labor market information. Section 118 funds may not be used to duplicate any of these or other activities assisted under WIA, but may be used to supplement and enhance them. For example, professional development activities or other resources developed to support academic counseling and career guidance for young people may be made available to youth-serving programs that receive assistance under WIA Title I, provided that they do not duplicate functions or activities that are assisted by WIA. The Secretary encourages applicants to collaborate with State and local recipients of WIA funds in deciding how they will

implement the activities required by section 118(b) both to ensure that funds are used most effectively and that the non-duplication requirements of section 118(c)(2) are fulfilled.

Finally, applicants should note that States and outlying areas are not required to establish or maintain interagency State Occupational Information Coordinating Committees in order to receive funds under section 118. Support for these bodies, however, is an eligible use of funds. States and outlying areas may find these bodies to be an effective means of coordinating their section 118 activities with related State and Federal initiatives.

Appendix B—Questions and Answers

Potential applicants frequently direct questions to officials of the Department regarding application notices and programmatic and administrative regulations governing various direct grant programs. To assist potential applicants, the Department has assembled the following most commonly asked questions followed by the Department's answers.

Q. Can we get an extension of the deadline?

A. No. A closing date may be changed only under extraordinary circumstances. Any change must be announced in the **Federal Register** and must apply to all applications. Waivers for individual applications cannot be granted regardless of the circumstances.

Q. How many copies of the application should I submit and must they be bound?

A. Applicants are required to submit one original and two copies of the grant

application. To aid with the review of applications, the Department encourages applicants to submit four additional copies of the grant application. The Department will not penalize applicants who do not provide additional copies. Sending applications in notebooks, binders, folders, or other coverings is strongly discouraged.

Q. We just missed the deadline for the XXX competition. May we submit under another competition?

A. Yes, however, the likelihood of success is not good. A properly prepared application must meet the specifications of the competition to which it is submitted.

Q. I'm not sure which competition is most appropriate for my project. What should I do?

A. We are happy to discuss any such questions with you and provide clarification on the unique elements of the various competitions.

Q. Will you help us prepare our application?

A. We are happy to provide general program information. Clearly, it would not be appropriate for staff to participate in the actual writing of an application, but we can respond to specific questions about application requirements, evaluation criteria, and the priorities. Applicants should understand, however, that prior contact with the Department is not required, nor will it in any way influence the success of an application.

Q. When will I find out if I'm going to be funded?

A. You can expect to receive notification as soon as possible after the application closing date, depending on the number of applications received and the number of Department competitions with similar closing dates.

Q. Once my application has been reviewed by the review panel, can you tell me the outcome?

A. No. Every year we are called by a number of applicants who have a legitimate reason for needing to know the outcome of the panel review prior to official notification. Some applicants need to make job decisions, some need to notify a local school district, etc. Regardless of the reason, because final funding decisions have not been made at that point, we cannot share information about the results of panel review with anyone.

Q. Will my application be returned if I am not funded?

A. No. We no longer return unsuccessful applications. Thus, applicants should retain at least one copy of the application.

Q. Can I obtain copies of reviewers' comments?

A. Upon written request, reviewers' comments will be mailed to unsuccessful applicants.

Q. Is travel allowed under these projects?

A. Travel associated with carrying out the project is allowed. Because we may

request the project director of funded projects to attend an annual project directors' meeting, you may also wish to include a trip or two to Washington, DC in the travel budget. Travel to conferences is sometimes allowed when the purpose of the conference will be of benefit and relates to the project.

Q. If my application receives high scores from the reviewers, does that mean that I will receive funding?

A. Not necessarily. It is often the case that the number of applications scored highly by the reviewers exceeds the dollars available for funding projects under a particular competition. The order of selection, which is based on the scores of all the applications reviewed and other relevant factors, determines the applications that can be funded.

Q. What happens during pre-award clarification discussions?

A. During pre-award clarification discussions, technical and budget issues may be raised. These are issues that have been identified during the panel and staff reviews that require clarification. Sometimes issues are stated as "conditions." These are issues that have been identified as so critical that the award cannot be made unless those conditions are met. Questions may also be raised about the proposed budget. Generally, these issues are raised because an application contains inadequate justification or explanation of a particular budget item, or because the budget item seems unimportant to the successful completion of the project. If you are asked to make changes that you feel could seriously affect the project's success, you may provide reasons for not making the changes or provide alternative suggestions. Similarly, if proposed budget reductions will, in your opinion, seriously affect the project activities, you may explain why and provide additional justification for the proposed expenses. An award cannot be made until all issues under discussion have been resolved.

Q. How do I provide an assurance?

A. Except for SF-424B, "Assurances—Non-Construction Programs," you may provide an assurance simply by stating in writing that you are meeting a prescribed requirement.

Q. Where can copies of the **Federal Register**, program regulations, and Federal statutes be obtained?

A. Copies of these materials can usually be found at your local library. If not, they can be obtained from the Government Printing Office by writing to Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402. Telephone: (202) 708-8228. When requesting copies of regulations or statutes, it is helpful to use the specific name or public law, number of a statute, or part number of a regulation. The material referenced in this notice should be referred to as follows:

(a) The Carl D. Perkins Vocational Technical Education Act of 1998 (Pub. L. 105-332) may be obtained (1) from the Government Printing Office by writing to Superintendent of Documents, P.O. Instructions for Budget Narrative

The budget narrative should explain, justify, and, if needed, clarify your budget summary. For each line item (personnel, fringe benefits, travel, etc.) in your budget, explain why it is there and how you computed the costs.

Please limit this section to no more than five pages. Be sure that each page of your application is numbered consecutively.

Instructions for Program Narrative

The program narrative will comprise the largest portion of your application. This part is where you spell out the who, what, when, why, and how, of your proposed project.

Although you will not have a form to fill out for your narrative, there is a format. This format is based on the selection criteria. Because your application will be reviewed and rated by a review panel on the basis of the

selection criteria, your narrative should follow the order and format of the criteria.

Before preparing your application, you should carefully read the legislation and EDGAR regulations governing this program, eligibility requirements, priorities, and the selection criteria for this process.

Your program narrative should be clear, concise, and to the point. Begin the narrative with a one page abstract or summary of your project. Then describe the project in detail, addressing each selection criterion in order.

The Secretary strongly suggests that you limit the program narrative to no more than 30 double-spaced, typed pages (on one side only), although the Secretary will consider your application if it is longer. Be sure to number consecutively ALL pages in your application.

You may include supporting documentation as appendices to the program narrative. Be sure that this material is concise and pertinent to this program.

You are advised that—

(a) The Secretary considers only information contained in the application in ranking applications for funding consideration. Letters of support sent separately from the formal application package are not considered in the review by the technical review panels. (34 CFR 75.217)

(b) The technical review panel evaluates each application solely on the basis of the selection criteria contained in this notice.

(c) Letters of support included as appendices to an application, that are of direct relevance to or contain commitments that pertain to the established selection criteria, such as commitment of resources, will be reviewed by the panel. As noted above in paragraph (a), letters of support sent separately from the formal application package are not considered in the review by the technical review panel. (34 CFR 75.217)

Performance Measures

The Government Performance and Results Act of 1993 (GPRA) places new management expectations and requirements on Federal departments and agencies by creating a framework for more effective planning, budgeting, program evaluation, and fiscal accountability for Federal programs. The intent of GPRA is to improve public confidence by holding departments and agencies accountable for achieving program results. Under GPRA, Departments and agencies must clearly describe the goals and objectives of their programs.

As required by GPRA, the Department of Education has prepared a strategic plan for 1998–2002. This plan reflects the Department's priorities and

integrates them with its mission and program authorities and describes how the Department will work to improve education for all children and adults in the United States.

standards so that they are prepared for responsible citizenship, further learning, and productive employment. Among the objectives for Goal 1 is that schools help all students make successful transitions to college and careers.

Factors that may be considered in evaluating the success of the program may include:

(1) Number of people trained by the career resource grant recipient;

(2) Improved and expanded use of career development products and services; and

(3) Number of students who had access to career development products and services.

An evaluation plan must be included in each Career Resource Network grant. The application should describe the plan in detail including the following information: (1) What types of data will be collected; (2) what instruments will be used; (3) when reports of results and outcomes will become available; and (4) how information will be used by the project to monitor progress and to provide accountability information to stakeholders.

BILLING CODE 4000-01-U

OMB Control No. 1801-0004 (Exp. 8/31/2001)

NOTICE TO ALL APPLICANTS

The purpose of this enclosure is to inform you about a new provision in the Department of Education's General Education Provisions Act (GEPA) that applies to applicants for new grant awards under Department programs. This provision is Section 427 of GEPA, enacted as part of the Improving America's Schools Act of 1994 (Pub. L. 103-382).

To Whom Does This Provision Apply?

Section 427 of GEPA affects applicants for new grant awards under this program. **ALL APPLICANTS FOR NEW AWARDS MUST INCLUDE INFORMATION IN THEIR APPLICATIONS TO ADDRESS THIS NEW PROVISION IN ORDER TO RECEIVE FUNDING UNDER THIS PROGRAM.**

(If this program is a State-formula grant program, a State needs to provide this description only for projects or activities that it carries out with funds reserved for State-level uses. In addition, local school districts or other eligible applicants that apply to the State for funding need to provide this description in their applications to the State for funding. The State would be responsible for ensuring that the school district or other local entity has submitted a sufficient section 427 statement as described below.)

What Does This Provision Require?

Section 427 requires each applicant for funds (other than an individual person) to include in its application a description of the steps the applicant proposes to take to ensure equitable access to, and participation in, its Federally-assisted program for students, teachers, and other program beneficiaries with special needs. This provision allows applicants discretion in developing the required description. The statute highlights six types of barriers that can impede equitable access or participation: gender, race, national origin, color, disability, or age. Based on local circumstances, you should determine whether these or other barriers may prevent your students, teachers, etc. from such access or participation in, the Federally-funded project or activity. The description in your application of steps to be taken to overcome these barriers need not be lengthy; you may provide a clear and succinct description of how you plan to address those barriers

that are applicable to your circumstances. In addition, the information may be provided in a single narrative, or, if appropriate, may be discussed in connection with related topics in the application.

Section 427 is not intended to duplicate the requirements of civil rights statutes, but rather to ensure that, in designing their projects, applicants for Federal funds address equity concerns that may affect the ability of certain potential beneficiaries to fully participate in the project and to achieve to high standards. Consistent with program requirements and its approved application, an applicant may use the Federal funds awarded to it to eliminate barriers it identifies.

What are Examples of How an Applicant Might Satisfy the Requirement of This Provision?

The following examples may help illustrate how an applicant may comply with Section 427.

- (1) An applicant that proposes to carry out an adult literacy project serving, among others, adults with limited English proficiency, might describe in its application how it intends to distribute a brochure about the proposed project to such potential participants in their native language.
- (2) An applicant that proposes to develop instructional materials for classroom use might describe how it will make the materials available on audio tape or in braille for students who are blind.
- (3) An applicant that proposes to carry out a model science program for secondary students and is concerned that girls may be less likely than boys to enroll in the course, might indicate how it intends to conduct "outreach" efforts to girls, to encourage their enrollment.

We recognize that many applicants may already be implementing effective steps to ensure equity of access and participation in their grant programs, and we appreciate your cooperation in responding to the requirements of this provision.

Estimated Burden Statement for GEPA Requirements

The time required to complete this information collection is estimated to vary from 1 to 3 hours per response, with an average of 1.5 hours, including the time to review instructions, search existing data resources, gather and maintain the data needed, and complete and review the information collection. **If you have any comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to:** U.S. Department of Education, Washington, DC 20202-4651.

PROTECTION OF HUMAN SUBJECTS IN RESEARCH (Attachment to ED 424)

I. Instructions to Applicants about the Narrative Information that Must be Provided if Research Activities Involving Human Subjects are Planned

If you marked item 12 on the application "Yes" and designated exemptions in 12a, (**all research activities are exempt**), provide sufficient information in the application to allow a determination that the designated exemptions are appropriate. Research involving human subjects that is exempt from the regulations is discussed under II.B. "Exemptions," below. The Narrative must be succinct. **Provide this information in an "Item 12/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page.**

If you marked "Yes" to item 12 on the face page, and designated no exemptions from the regulations (**some or all of the research activities are nonexempt**), address the following six points for each nonexempt activity. In addition, if research involving human subjects will take place at collaborating site(s) or other performance site(s), provide this information before discussing the six points. Although no specific page limitation applies to this section of the application, be succinct. Provide the six-point narrative and discussion of other performance sites in an "Item 12/Protection of Human Subjects Attachment" and insert this attachment immediately following the ED 424 face page.

(1) Provide a detailed description of the proposed involvement of human subjects. Describe the characteristics of the subject population, including their anticipated number, age range, and health status. Identify the criteria for inclusion or exclusion of any subpopulation. Explain the rationale for the involvement of special classes of subjects, such as children, children with disabilities, adults with disabilities, persons with mental disabilities, pregnant women, prisoners, institutionalized individuals, or others who are likely to be vulnerable.

(2) Identify the sources of research material obtained from individually identifiable living human subjects in the form of specimens, records, or data. Indicate whether the material or data will be obtained specifically for research purposes or whether use will be made of existing specimens, records, or data.

(3) Describe plans for the recruitment of subjects and the consent procedures to be followed. Include the cir-

cumstances under which consent will be sought and obtained, who will seek it, the nature of the information to be provided to prospective subjects, and the method of documenting consent. State if the Institutional Review Board (IRB) has authorized a modification or waiver of the elements of consent or the requirement for documentation of consent.

(4) Describe potential risks (physical, psychological, social, legal, or other) and assess their likelihood and seriousness. Where appropriate, describe alternative treatments and procedures that might be advantageous to the subjects.

(5) Describe the procedures for protecting against or minimizing potential risks, including risks to confidentiality, and assess their likely effectiveness. Where appropriate, discuss provisions for ensuring necessary medical or professional intervention in the event of adverse effects to the subjects. Also, where appropriate, describe the provisions for monitoring the data collected to ensure the safety of the subjects.

(6) Discuss why the risks to subjects are reasonable in relation to the anticipated benefits to subjects and in relation to the importance of the knowledge that may reasonably be expected to result.

II. Information on Research Activities Involving Human Subjects

A. Definitions.

A research activity involves human subjects if the activity is research, as defined in the Department's regulations, and the research activity will involve use of human subjects, as defined in the regulations.

—Is it a research activity?

The ED Regulations for the Protection of Human Subjects, Title 34, Code of Federal Regulations, Part 97, define research as "a systematic investigation, including research development, testing and evaluation, designed to develop or contribute to generalizable knowledge." *If an activity follows a deliberate plan whose purpose is to develop or contribute to generalizable knowledge, such as an exploratory study or the collection of data to test a hypothesis, it is research.* Activities which meet this definition constitute research whether or not they are conducted or supported under a program which is considered research for other purposes. For example, some demonstration and service programs may include research activities.

—Is it a human subject?

The regulations define human subject as “a living individual about whom an investigator (whether professional or student) conducting research obtains (1) data through intervention or interaction with the individual, or (2) identifiable private information.” (1) *If an activity involves obtaining information about a living person by manipulating that person or that person’s environment, as might occur when a new instructional technique is tested, or by communicating or interacting with the individual, as occurs with surveys and interviews, the definition of human subject is met.* (2) *If an activity involves obtaining private information about a living person in such a way that the information can be linked to that individual (the identity of the subject is or may be readily determined by the investigator or associated with the information), the definition of human subject is met.* [Private information includes information about behavior that occurs in a context in which an individual can reasonably expect that no observation or recording is taking place, and information which has been provided for specific purposes by an individual and which the individual can reasonably expect will not be made public (for example, a school health record).]

B. Exemptions.

Research activities in which the only involvement of human subjects will be in one or more of the following six categories of *exemptions* are not covered by the regulations:

- (1) Research conducted in established or commonly accepted educational settings, involving normal educational practices, such as (a) research on regular and special education instructional strategies, or (b) research on the effectiveness of or the comparison among instructional techniques, curricula, or classroom management methods.
- (2) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior, unless: (a) information obtained is recorded in such a manner that human subjects can be identified, directly or through identifiers linked to the subjects; and (b) any disclosure of the human subjects’ responses outside the research could reasonably place the subjects at risk of criminal or civil liability or be damaging to the subjects’ financial standing, employability, or reputation. *If the subjects are children, this exemption applies only to research involving educational tests or observations of pub-*

lic behavior when the investigator(s) do not participate in the activities being observed. [Children are defined as persons who have not attained the legal age for consent to treatments or procedures involved in the research, under the applicable law or jurisdiction in which the research will be conducted.]

- (3) Research involving the use of educational tests (cognitive, diagnostic, aptitude, achievement), survey procedures, interview procedures or observation of public behavior that is not exempt under section (2) above, if the human subjects are elected or appointed public officials or candidates for public office; or federal statute(s) require(s) without exception that the confidentiality of the personally identifiable information will be maintained throughout the research and thereafter.

- (4) Research involving the collection or study of existing data, documents, records, pathological specimens, or diagnostic specimens, if these sources are publicly available or if the information is recorded by the investigator in a manner that subjects cannot be identified, directly or through identifiers linked to the subjects.

- (5) Research and demonstration projects which are conducted by or subject to the approval of department or agency heads, and which are designed to study, evaluate, or otherwise examine: (a) public benefit or service programs; (b) procedures for obtaining benefits or services under those programs; (c) possible changes in or alternatives to those programs or procedures; or (d) possible changes in methods or levels of payment for benefits or services under those programs.
