

Storm Data and Unusual Weather Phenomena - April 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	-------------------	---------------------	------------------------

OKLAHOMA, Panhandle

(OK-Z001) CIMARRON, (OK-Z002) TEXAS, (OK-Z003) BEAVER

04/13/07 06:10 CST	0	Heavy Snow
04/14/07 05:00 CST	0	

A strong upper level low pressure system approached the Oklahoma panhandle from the west while much colder air surged south. Heavy snow fell across the Oklahoma panhandle during the nighttime and morning hours.

TEXAS COUNTY --- 12.0 S GUYMON [36.51, -101.48]

04/23/07 17:08 CST	0	Hail (1.00 in)
04/23/07 17:08 CST	0	Source: Broadcast Media

Hail was reported two miles north of the Oklahoma and Texas state line.

A severe thunderstorm over the central Oklahoma panhandle during the early evening hours produced large hail. No damage and no injuries were reported.

CIMARRON COUNTY --- BOISE CITY [36.73, -102.52]

04/21/07 17:40 CST	0	Hail (1.00 in)

CIMARRON COUNTY --- BOISE CITY [36.73, -102.52]

04/21/07 18:45 CST	3K	Thunderstorm Wind (EG 52 kt)
04/21/07 18:45 CST	0	Source: Fire Department/Rescue

A wooden shed was reportedly blown down by the high winds. No injuries were reported.

TEXAS COUNTY --- GUYMON [36.68, -101.48]

04/21/07 20:30 CST	43K	Thunderstorm Wind (EG 56 kt)
04/21/07 20:30 CST	0	Source: Emergency Manager

Eighteen wheelers reportedly blown over by the high winds...there was no power in the town of Texhoma...telephone poles were blown down...and the town of Hooker Police Department reported windows blown out. The new metal roof of the Hooker City Hall was peeled back and the glass front door was blown out but not broken. A satellite dish was also thrown off of the police station in Hooker and some interior damage occurred. A windmill was completely destroyed...along with a shed and a fence...northeast of Hooker and a horse barn was picked up and dropped on its roof. No injuries were reported.

Severe thunderstorms producing large hail and damaging winds moved across the western and central Oklahoma panhandle during the early and mid evening hours. No injuries were reported.

TEXAS, North Panhandle

A warehouse roof was blown off at 4th Avenue and Harrison Street and walls collapsed. Car windows were also blown out. The storm survey team found scattered wind damage in a broad area across the northern sections of Amarillo. The vast majority of the damage occurred north of Interstate 40...with most of the damage occurring along a four to five mile wide swath...along and either side of Amarillo Boulevard. Some wind damage was even noted outside or north of Loop 335. The team concluded that all of the damage assessed was consistent with...and the result of...downburst winds. There was no credible evidence of tornadic damage. The New Light Ministry Church at Northeast 24th Street and Osage Street lost almost its entire roof...where winds were estimated around one hundred miles an hour. Three vacant mobile homes rolled and were badly damaged along Amarillo Boulevard. Two were at a manufactured home dealership at Eastern Street and the third mobile home damaged was near Mirror Street. These winds were estimated to range between ninety-five and one hundred miles an hour. No injuries were reported.				
POTTER COUNTY --- 2.0 W AMARILLO [35.20, -101.86]				
	04/12/07 20:30 CST		0	Thunderstorm Wind (EG 61 kt)

Medium size trees were blown down.				
POTTER COUNTY --- 4.0 NW AMARILLO [35.24, -101.87]				
	04/12/07 20:35 CST		11K	Thunderstorm Wind (EG 74 kt)
	04/12/07 20:35 CST		0	Source: NWS Storm Survey
Across northwest sections of Amarillo...the storm survey team found a few homes and businesses which suffered window and roof damage from the downburst wind event. Damage to these structures were likely the result of winds between eighty and ninety miles an hour. An off-duty National Weather Service employee reported that a fireworks stand was blown over three quarters of a mile south of Loop 335 on North Western Street. No injuries were reported.				
POTTER COUNTY --- 2.0 W AMARILLO [35.20, -101.86]				
	04/12/07 20:40 CST		0	Thunderstorm Wind (MG 55 kt)

High winds blew down twelve inch and greater diameter trees.

POTTER COUNTY --- 4.0 W AMARILLO [35.20, -101.89]				
	04/12/07 20:50 CST		2K	Thunderstorm Wind (EG 87 kt)
	04/12/07 20:50 CST		0	Source: NWS Storm Survey

The most significant damage from the downburst wind event occurred at the Medipark area near the Discovery Center. At least twenty large trees were either uprooted...or had snapped near their bases. A roof had completely blown off a restroom in the park...a few light poles had blown down...and several picnic shelters were badly damaged. The survey team estimated that peak winds ranged from ninety to one hundred and ten miles an hour. Roofing material from a hospital construction site was wrapped around a light pole due to the high winds.

POTTER COUNTY --- 10.0 E AMARILLO [35.20, -101.64]

Storm Data and Unusual Weather Phenomena - April 2007

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
<p>This tornado formed four miles west of Boys Ranch at 1751 CST and tracked north northeast. The tornado crossed U.S. Highway 385 at the Oldham and Hartley county line before exiting Oldham county at 1759 CST five miles northwest of Boys Ranch. The tornado continued in Hartley county for about another thirteen miles... before dissipating at 1827 CST. The tornado was rated as EF1 in Hartley county...but was rated as EF0 in Oldham county since it remained over open country. No damage or injuries were reported.</p>				
HARTLEY COUNTY --- 2.5 SSE CHANNING [35.65, -102.31], 7.0 ESE HARTLEY [35.84, -102.28]				
	04/21/07 17:59 CST		12K	Tornado (EF1, L: 13.56 mi , W: 880 yd)
	04/21/07 18:27 CST		0	Source: NWS Storm Survey
<p>This tornado formed four miles west of Boys Ranch in Oldham county and entered Hartley county two and a half miles south southeast of Channing at 1759 CST. The tornado continued for another thirteen and a half miles before dissipating on mile south of U.S. Highway 87 or seven miles east southeast of Hartley. In Hartley county...numerous power poles...fences...and a few highway signs sustained damage. While in Oldham county...the tornado was rated as EF0 but in Hartley county it was rated as EF1. There were no fatalities and no injuries reported.</p>				
MOORE COUNTY --- 10.0 WSW DUMAS [35.79, -102.13], 0.5 N CACTUS [36.06, -102.00]				
	04/21/07 18:16 CST		1.30M	Tornado (EF2, L: 19.67 mi , W: 1320 yd)
	04/21/07 18:40 CST	14	0	Source: NWS Storm Survey
<p>This tornado formed ten miles west southwest of Dumas at 1816 CST and tracked northeast for about twenty miles before exiting Moore county one half of a mile north of Cactus at 1840 CST. The tornado continued in Sherman county for about another four miles...before dissipating at 1852 CST. In Moore county...evidence suggested that the tornado was about three quarters of a mile wide as it passed through the town of Cactus. The most significant damage occurred across the northwest half of Cactus...but most homes and businesses received some damage as a result of this tornado. It is estimated that at least ten mobile homes were demolished and many more left uninhabitable. Fourteen people were injured in Cactus...however there were no fatalities. On April 25...Governor Rick Perry declared a State of Emergency in two proclamations for Moore county as a result of the Cactus tornado. The Governor also requested President Bush to declare a Presidential Disaster Declaration for the county.</p>

<p>Numerous tree limbs blown down by the high winds.</p>				
<p>Numerous severe thunderstorms producing large hail...damaging winds...and tornadoes moved north and northeast across the western and central Texas panhandle during the evening hours. The only injuries occurred in Cactus from a tornado...however no fatalities were reported.</p>				
<hr/>				
ARMSTRONG COUNTY --- 13.0 NE WAYSIDE [34.91, -101.39]				
	04/22/07 22:07 CST		0	Flood (due to Heavy Rain)
	04/22/07 22:32 CST		0	Source: Law Enforcement
<p>A strong storm system brought a round of thunderstorms which produced very heavy rainfall over the south central Texas Panhandle. National Weather Service Doppler radar estimated that one to two inches of rain fell in a seven mile wide strip across the Prairie Dog Town Fork of the Red River just upstream of the river gage site located thirteen miles northeast of Wayside Texas. The runoff from the intense heavy rain caused a rise on the river to just over the flood stage of ten feet. There was no reports of damage or injuries.</p>				
<p>Runoff from intense heavy rainfall caused the Prairie Dog Town Fork of the Red River to rise above flood stage during the late evening hours. No damage or injuries were reported.</p>
