### Letterhead Certificate for Export of Boneless Beef to Chile

Date Issued: \_\_\_\_\_ Certificate Number: \_\_\_\_\_

1. The feeding of ruminants with meat and bone meal and greaves derived from ruminants has been banned and the ban has been effectively enforced.
2. The meat comes from cattle that were not rendered insensible by a device injecting compressed air or gas into the cranial cavity prior to slaughter, or by any method that cuts the spinal cord.
3. The meat or meat products were not derived from the following specified risk materials: the brain, skull, eyes, trigeminal ganglia, spinal cord, vertebral column (excluding the vertebrae of the tail, the transverse processes of the thoracic and lumbar vertebrae, and the wings of the sacrum), and dorsal root ganglia of cattle 30 months of age and older, and the tonsils and distal ileum of the small intestine of any cattle, regardless of age.
4. The meat or meat products were not produced by a process of mechanical separation.
5. The meat comes from cattle less than 30 months of age that were subjected to ante and post mortem inspection and showed no evidence of systemic contagious or infectious diseases of animal or public health concern, including suspected or confirmed cases of central nervous system disorders.
6. The country or zone of origin is declared as free of foot-and-mouth disease without vaccination, rinderpest, and contagious bovine pleuropneumonia before the International Office of Epizootics and this sanitary condition is recognized by Chile.
7. The cattle from which the beef is derived were born, raised, and slaughtered in the exporting country or in a zone with similar epidemiological conditions.
