^aInitial concentrations of un-ionized ammonia (mg/L as N) in test solutions for Rio Grande silvery minnow from highest to lowest mixture treatment: 0.975, 0.876, 0.767, 0.608, 0.496, 0.356, 0.277, 0.191, and 0.131.

^bInitial concentrations of un-ionized ammonia (mg/L as N) in test solutions for fathead minnow from highest to lowest mixture treatment: 0.918, 0.895, 0.744, 0.568, 0.478, 0.361, 0.271, 0.190, and 0.134.

^cMeasured concentrations in unfiltered water collected at test initiation.
