2006	589,000	2,550,000	72,000	3,070,000	3,040,000	56.10	45.40	7,960,000		

¹Compiled by D.A. Buckingham, J.P. Searls (retired), and M.M. Miller.

Data are calculated, estimated, or reported. See notes for more information.

Barite Worksheet Notes

Data Sources

Data sources for this barite worksheet are the mineral statistics publications of the U.S. Bureau of Mines and the U.S. Geological Survey—Minerals Yearbook (MYB); and its predecessor, Mineral Resources of the United States (MR). The years of publication and corresponding years of data coverage are listed in the References section below. Blank cells in the worksheet indicate that data were not available.

Production (sold or used)

Production data are published for only the years 1927–67, therefore, crude barite (unmanufactured barite) sold or used data are used in place of production data for the years 1900–2006. Data are reported in the MR and the MYB. The significant drop in reported production from 1982 to 1983 resulted from a major slump in the oil drilling industry that reduced demand for drilling mud.

Imports

Data are total barite imports into the United States, including crude barite, crushed and ground barite, lithopone, blanc fixe and other barite compounds. Data are in terms of barite equivalents. Data are reported in the MR and the MYB.

Exports

Data are the total barite exported from the United States, including crude barite, crushed and ground barite, lithopone, blanc fixe and other barite compounds. Export data were not available for the years 1900–20. Data are in terms of barite equivalents. Data are reported in the MR and the MYB.

Apparent Consumption

Apparent consumption data for the years 1900–2006 are estimated using the following equation.

```
APPARENT CONSUMPTION = CRUDE BARITE SOLD or USED + TOTAL IMPORTS – TOTAL EXPORTS.
```

Imports and exports data are in terms of barite equivalents. If data for a particular category were unavailable, the data were presumed to be zero in making the above calculation. Data used in the above equation are reported in the MR and the MYB.

Consumption (crushed and ground—sold or used)

Data are domestic and imported crushed and ground barite sold or used. Category can also be defined as domestic and imported crude barite sold or used by domestic grinding establishments, as crushed and ground barite, or as crushed and ground barite consumption. Data are not available for the years 1900–04. Data are reported in the MR and the MYB.

Unit Value (\$/t)

Unit value is defined as the value of 1 metric ton (t) of barite apparent consumption. The unit value data are estimated using the following equation.

UNIT VALUE = (CRUDE BARITE SALES VALUE + TOTAL BARITE IMPORT VALUE – TOTAL BARITE EXPORT VALUE) / (BARITE APPARENT CONSUMPTION).

Data used in the above equation are reported in the MR and the MYB.

Unit Value (98\$/t)

The Consumer Price Index conversion factor, with 1998 as the base year, is used to adjust unit value in current U.S. dollars to the unit value in constant 1998 U.S. dollars.

World Production

Data are world crude barite production. Data are not available for the years 1900–12 and 1914–18. Data are reported in the MR and the MYB.
