

## OUTREACH – EDUCATION EVENT REPORT AND RECOMMENDATIONS

Attendee and Report Writer's Name:  
**Joseph Kerski, Geographer.**  
**Education/GIS, Denver, Colorado.**

Event: USGS Participation in Display Case  
at Jefferson County Public Library

Location: Jefferson County, Colorado

Date(s): 1-31 January 2004

I installed USGS materials in the display case at the Wheat Ridge Branch of the Jefferson County Public Library system during January 2004. The theme for the display was "Space Science," and although I set up the plans with the librarian during summer 2003, turned out to be perfect timing with the Mars Lander and new USGS Mars maps. The display is at the entrance to the library and is seen by all patrons. This is the second display I have operated at this library, and it is part of an ongoing effort to display our materials at off site venues. One of the best examples was our display at Denver International Airport, which ran for a year.

could be obtained from, and about the USGS. I also included the Mapping the Solar System poster, one of my favorites.
