

U.S. Fish & Wildlife Service Coastal Program Highlights

Region 3, FY2001

Fish Passage Restoration, Graveyard Creek in Bad River Indian Reservation, Wisconsin (1)

Partners: Bad River Band of Chippewa
Objective: Remove barriers that block fish passage in the mouth of Graveyard Creek, which has high potential for restoration of coaster brook trout. (\$5,000)

Watershed Assessment, Baird Creek Watershed, Wisconsin (2)

Partners: Brown County Land & Water Conservation Department
Objectives: Assess erosion and sediment input into Baird Creek and begin development and implementation of Best Management Practices (BMPs). (\$8,000)

Native Aquatic Species Habitat Restoration, Antrim County, Michigan (3)

Partners: Antrim County Conservation District
Objective: Conduct streambank restoration and culvert replacement projects to reduce sediment load to Antrim Creek, a tributary to Lake Michigan. (\$14,000)

Fish Passage Restoration, Norwegian Creek, Alpena, Michigan (4)

Partners: Michigan Dept. of Natural Resources & Alpena Conservation District
Objective: Replace a culvert to open up a mile of Norwegian Creek, a tributary to Lake Huron, for fish passage. (\$14,000)

Eastern Prairie Fringed Orchid Habitat Enhancement, Illinois Beach State Park, Illinois (5)

Partners: Illinois Dept. of Natural Resources & The Conservation Fund
Objective: Control invasive species to restore habitat suitability for reintroduction of the federally threatened Eastern prairie fringed orchid. (\$10,000)

Springfield Fen Restoration, LaPorte County, Indiana (6)

Partners: Indiana Dept. of Natural Resources & Shirley Heinze Environmental Fund
Objective: Restore Springfield Fen by removing invasive species from approximately 4.5 acres of the 45 acre preserve. (\$15,000)
