Section B — Distribution of Sales or Gross Operating Revenues — See Additional Instructions for Part II, Section B, on page 10 at the back of this form.

Distribute sales or gross operating revenues among three categories – sales of goods, sales of services, and investment income. For the purpose of this distribution, "goods" are normally economic outputs that are tangible and "services" are normally economic outputs that are intangible. When a sale consists of both goods and services and cannot be unbundled (i.e., the goods and services are not separately billed), classify the sales as goods or services based on whichever accounts for a majority of the value. Give best estimates if actual figures are not available. Insurance companies also see **Special Instructions, B.3.d. and e., page 12.**

Section C — Number of Employees and Employee Compensation — See Additional Instructions for Part II, Section C, on page 10 at the back of this form.

NUMBER OF EMPLOYEES — Employees on the payroll at the end of FY 2006 including part-time employees, but excluding temporary and contract employees not included on your payroll records. A count taken at some other date during the reporting period may be given provided it is a reasonable estimate of employees on the payroll at the end of FY 2006. If the number of employees at the end of FY 2006 (or when the count was taken) was unusually high or low due to temporary factors (e.g., a strike), enter the number of employees that reflects normal operations. If the number of employees fluctuates widely during the year due to seasonal business variations, report the average number of employees on the payroll during FY 2006. Base such an average on the number of employees on the payroll at the end of each pay period, month or quarter. If precise figures are not available, give your best estimate.

EMPLOYEE COMPENSATION — Sum of **wages and salaries** and **employee benefit plans**. Expenditures made by an employer in connection with the employment of workers, including cash payments, stock based compensation, payments in-kind, and employer expenditures for employee benefit plans including those required by statute. Base compensation data on payroll records. Report compensation which relates to activities that occurred during the reporting period regardless of whether the activities were charged as an expense on the income statement, charged to inventories, or capitalized. DO NOT include amounts related to activities of a prior period, such as those capitalized or charged to inventories in prior periods.

Part III — U.S. EXPORTS TO AND U.S. IMPORTS FROM MAJORITY-OWNED FOREIGN AFFILIATE

Goods only valued f.a.s. at port of exportation; do not include services — See Instruction Booklet, Part V.

IMPORTANT NOTES

Report U.S. exports of goods to and U.S. imports of goods from the foreign affiliate in FY 2006. Report all goods that physically left or entered the U.S. customs area. Report data on a "shipped" basis, i.e., on the basis of when and to (or by) whom the goods were shipped. This is the same basis as official U.S. trade statistics to which these data will be compared. Do **not** record a U.S. import or export if the goods did not physically enter or leave (i.e., were not physically shipped to or from) the United States, even if they were charged to the foreign affiliate by, or charged by the foreign affiliate to, a U.S. person.

Foreign affiliates normally keep their accounting records on a "charged" basis, i.e., on the basis of when and to (or by) whom the goods were charged. The "charged" basis may be used if there is no material difference between it and the "shipped" basis. If there is a material difference, the "shipped" basis must be used or adjustments made to the data on a "charged" basis to approximate a "shipped" basis. The data should include goods only; they should exclude services.

Capital goods — Include capital goods but exclude the value of ships, planes, railroad rolling stock, and trucks that were temporarily outside the United States transporting people or goods.

In-transit goods — Exclude from exports and imports the value of goods that are in-transit. In-transit goods are goods that are not processed or consumed by residents in the intermediate country(ies) through which they transit; the in-transit goods enter that country(ies) only because that country(ies) is along the shipping lines between the exporting and importing countries. In-transit goods are goods en route from one foreign country to another via the United States (such as from Canada to Mexico via the United States), and in-transit exports are goods en route from one part of the United States to another part via a foreign country (such as from Alaska to Washington State via Canada).

Packaged general use computer software — Include exports and imports of packaged general use computer software. Value such exports and imports at the full transaction value, i.e., the market value of the media on which the software is recorded and the value of the information contained on the media. Do not include exports and imports of customized software designed to meet the needs of a specific user. This type of software is considered a service and should not be included as trade in goods. Also do not include negotiated leasing fees for software that is to be used on networks.

Remarks

ANNUAL SURVEY OF U.S. DIRECT INVESTMENT ABROAD — 2006 FORM BE-11B(LF) ADDITIONAL INSTRUCTIONS BY ITEM

Part I — IDENTIFICATION OF FOREIGN AFFILIATE

- 3. Country of location If the affiliate is engaged in petroleum shipping, other water transportation, or oil and gas drilling, and has operations spanning more than one country, use country of incorporation for country of location. For example, classify in country of incorporation an oil drilling rig that moves from country to country during the year.
- 6. Ownership by U.S. Reporter named in item 1.

Equity interest is the U.S. Reporter's direct ownership in the total equity (voting and nonvoting) of the affiliate. Examples of nonvoting equity include nonvoting stock and a limited partner's interest in a partnership.

Voting interest is the U.S. Reporter's direct ownership in just the voting equity of the affiliate. Examples of voting equity include voting stock and a general partner's interest in a partnership. Thus, a U.S. Reporter could have a 100 percent direct voting interest in an affiliate but own less than 100 percent of the affiliate's total equity.

-32

Sales or gross operating revenues of foreign affiliate, by industry of sales or gross operating revenues. See Additional Instructions for Part II, Section A, item 34 below.

Holding companies (ISI code 5512) must show total income as reported in item 39. To be considered a holding company, income from equity investments (items 35 and 36) must be more than 50 percent of total income (item 39). In addition, normally at least 50 percent of total assets must consist of investments in affiliates. ISI code 5512, (holding company), is an invalid classification if more than 50 percent of income generated, or expected to be generated, by an affiliate is from non-holding company activities.

Dealers in financial instruments and finance, insurance, and real estate companies see **Special Instructions** on page 12.

Part II — FINANCIAL AND OPERATING DATA OF FOREIGN AFFILIATE

Finance or insurance companies that include investment income in gross operating revenues should report the source of such investment income in columns 2 through 7 based on the location of the issuer of the financial instrument whether publicly issued or privately placed. If the location of the issuer is unknown, then substitute the nationality of the issuer.
