## Forest Highway Network and Planning Data 2005

Prepared by:  
Federal Highway Administration  
Central Federal Lands Division

July - 2005

## **SUMMARY:**

The following is a report on the status of the Forest Highway Network in the State of Wyoming. The data was taken from Wyoming Department of Transportation (WYDOT) road evaluation and an automatic data collection contract in the summer of 2004. The purpose of the report is to document the condition of the Forest Highway Network and provide data for pavement and bridge management systems. The report identifies potential sections for 3R projects. Nonetheless, the sections should be reviewed in the field by those involved in programming and project development before any specific projects are selected. The sections are based on political boundaries (county lines) and HPMS traffic data rather than condition changes. Therefore, each section should be scrutinized before project limits are determined. Lengths of segments have been scrutinized for errors and changed where needed. All the bridges are in the National Bridge Inventory System and therefore have the data for structural deficiency and functional obsolescence and have been assigned a sufficiency rating by the Headquarters of the FHWA.

The Wyoming Forest Highway Network contains 18 routes amounting to 609.79 miles (981.15 km).

## **CONTENTS AND DESCRIPTION OF THIS REPORT:**

**Graphs:** Show the average conditions of all state-owned highways over time, starting in 1998. There are three sections: miles-by-condition rating, average condition by route, and average condition by county.

**Description Sheets:** Show a basic map of the route with segments plus a description of the route's termini, functional class, and other useful information. (Recommendations have been removed from the descriptions)

**Pavement Condition Sheets:** Show the condition data, averaged by segment, of the route along with traffic data. The map shows the condition of the route by color code, plus termini descriptions and other features along the route. The map shows the actual un-averaged condition of the route, which may not correspond to the averaged data. This change was made to allow for faster evaluation of potential projects.

**Bridge Condition Sheets:** Show the bridge locations and length, width, and condition information from the National Bridge Inventory.

## **POTENTIAL 3R PROJECTS:**

All the Wyoming FH routes were inspected by the WYDOT Planning and Pavement Management personnel. Wyoming uses the International Road Index (IRI) to evaluate their pavements. IRI is measured directly in inches of vertical roughness per mile of pavement. Vertical mounted accelerometers over each wheel path are used to measure the roughness over the full length of each section. The values reported are the “half car simulation” IRI. This factors both the left and right wheel path providing the ride quality felt by the vehicle occupants, not the roughness of the individual wheel paths.

Pavement Condition Ratings (PCR) are determined using distress ratings based primarily on the IRI. With the current formulas, a road is considered failed when its PCR falls to 60 or below. Fair roads have a PCR between 61 and 70, good roads have a PCR between 71 and 80, and excellent roads have a PCR of 81 and above.

FH Route	Seg	Local Route #	Route Name	County	Start MP	End MP	Length (mi)	Length (km)	ADT	Width (ft)	IRI	PCR	Distress
11	7	SR-70	Battle Lake Road	Carbon	54.93	57.69	2.76	4.44	700	24	131	58	Poor

22	9	FDR-10138	Labarge Creek - Greys River	Lincoln	95.03	95.81	0.78	1.26	N/A	24	131	58	Poor
5	3	SR-22	Teton Pass	Teton	10.99	9.88	1.11	1.79	2125	24	178	48	Poor
5	4	SR-22	Teton Pass	Teton	9.88	6.90	2.98	4.79	3903	24	134	58	Poor
21	2	FDR-3100	Wilson-Fall Creek	Teton	5.62	7.65	2.03	3.27	N/A	N/A	134	58	Poor
34	6	SR-150	Mirror Lake Road	Uinta	1.39	0.61	0.78	1.26	4538	24	256	35	Poor
34	5	SR-150	Mirror Lake Road	Uinta	1.65	1.39	0.26	0.42	4538	24	244	37	Poor
34	4	SR-150	Mirror Lake Road	Uinta	2.16	1.65	0.51	0.82	4538	24	214	42	Poor
34	3	SR-150	Mirror Lake Road	Uinta	2.57	2.16	0.41	0.66	4538	24	160	52	Poor
34	1	SR-150	Mirror Lake Road	Uinta	23.10	8.47	14.63	23.54	450	22	129	59	Poor

The following is the relative pavement rating based on the IRI value:

IRI Values	PCR	Pavement Rating
Below 53	81 to 100	Excellent
53 to 86	71 to 80	Good
87 to 122	61 to 70	Fair
Above 122	Below 61	Poor

### **POTENTIAL BRIDGE REPLACEMENT PROJECTS:**

There are 57 bridges on the Forest Highway Network in Wyoming. All the bridge data was taken from the National Bridge Inventory System (NBIS). Bridges having a sufficiency rating less than 50, or 80 and less and structurally deficient or functionally obsolete qualify for the National Bridge Replacement Program and should be considered for replacement. Note that some bridges are in the recent or current construction program.

FH	State or Local Route	NBIS Number	MP	Facility	Owner	Width (ft)	Width (m)	Length (ft)	Length (m)	SD	FO	SR

4	US-212	1570-051P	1.0	Index Creek	NPS	30.8	101.0	49.9	163.7	X		58.7

### **Definition of terms:**

**Structurally deficient (SD):** A bridge that (1) has been restricted to light vehicles only, (2) is closed, or (3) requires immediate rehabilitation to remain open.

**Functionally obsolete (FO):** A bridge for which the deck geometry, load carrying capacity (comparison of the original design load to the State legal load), clearance, or approach roadway alignment no longer meets the usual criteria for the system of which it is an integral part.

**Sufficiency rating (SR):** The numerical rating of a bridge based on its structural adequacy and safety, essentiality for public use, and its serviceability and functional obsolescence.

### **CHANGES SINCE LAST REPORT:**

FH 05 – Mileposts were reversed so that the route now starts at 17.49 and travels easterly towards the 5.59 milepost.

FH 08 – Mileposts were reversed so that the route now starts at 45.88 and travels westerly towards the 0.00 milepost.

FH 12 – Mileposts were changed so that the route now starts at milepost 68.12 and travels easterly towards the 27.53 milepost.

FH 14 – Segment 1 length changed from 0.68 to 4.51 miles. The length was always 4.51, but was labeled as 0.68.

FH 22 – Segment 1 length changed from 13.06 to 13.12 miles.

FH 25 – Removed bridge ‘Box Creek’ because it was no longer listed in the NBIS.

Graphs – Added miles to the ‘Mileage by Condition’ portion of the graphs that was previously not reported. This portion should now show all state route miles in Wyoming with the exception of FH 4.

Intro and Route ID – Total length increased because of the changes above to segments in FH 22 and FH 25

## FH 4 Beartooth Highway

### Route Description

FH-04, Beartooth Highway. This route starts at the State line, east of Cooke City, Montana, and proceeds easterly 34.35 miles (55.27 km) over US-212 to the State line, southwest of Red Lodge, Montana. It is a State Scenic Byway.

Evaluation: US-212 is presently administered by the National Park Service. It is functionally classified as a minor arterial serving the Shoshone National Forest. According to Forest Service data, 30% of the traffic is Forest related. Much of the summer traffic is tourists driving for pleasure. It is a potential All American Road. The principal Forest resource served is recreation. FH-04 serves four Forest Service owned campgrounds. The route also serves other local needs including commercial supply and access to Yellowstone National Park.

FH-05, Teton Pass. This route starts at the State line east of Victor, Idaho, and proceeds easterly 11.90 miles (19.15 km) over SR-22, to Fall Creek road (FH-21) in Wilson.

Evaluation: SR-22 is owned and operated by the Wyoming Department of Transportation. It is functionally classified as a major collector serving the Targhee and Bridger-Teton National Forests. Much of the traffic are workers driving from Idaho to Jackson for employment. The principal Forest resource served is recreation. There is one Forest Service owned campground on the route. The route also serves other local needs including school buses, mail delivery and commercial supply.

## FH 8 Chief Joseph Scenic Highway

### Route Description

FH-08, Chief Joseph Scenic Highway. This route starts at the junction with SR-120 north of Cody and proceeds northerly 45.88 miles (73.82 km) over SR-296, to the junction with US-212 approximately 13 miles southeast of Cooke City, Montana.

Evaluation: SR-296 is owned and operated by the Wyoming Department of Transportation. It is a State designated scenic byway. It is functionally classified as a major collector serving the Shoshone National Forest. According to Forest Service data, 24% of the traffic is Forest related. The principal Forest resources served are recreation, mining, timber and grazing. There are three Forest Service owned campgrounds, two picnic areas, three trail heads and the Crandall Ranger Station on the route. The route also serves local needs including commercial supply.

## FH 11 Battle Lake Road

## Route Description

FH-11, Battle Lake Road. This route starts at the junction with SR-789 in Baggs and proceeds easterly 57.69 miles (92.82 km) over SR-70 to the junction with SR-230 in Riverside.

Evaluation: SR-70 is owned and operated by the Wyoming Department of Transportation. It is a designated scenic byway. It is functionally classified as a major collector through the Medicine Bow National Forest. According to Forest Service data, 50% of the traffic is Forest related. The principal Forest resources served are recreation and timber. There are four Forest Service owned campgrounds and four trail heads served by the route. The route also serves local needs including school buses, mail delivery and commercial supply.

## FH 12 Snowy Range Road

### Route Description

FH-12, Snowy Range Road. This route starts at the junction with SR-230 south of Saratoga and proceeds easterly 40.59 miles (65.31 km) over SR-130 to the west limit of the town of Centennial.

Evaluation: SR-130 is owned and operated by the Wyoming Department of Transportation. It is a designated scenic byway. It is functionally classified as a major collector through the Medicine Bow National Forest. According to Forest Service data, 20% of the traffic is Forest related. The principal Forest resources served are recreation and timber. It serves seven Forest Service owned campgrounds, four picnic areas, four trail heads, the Brush-Creek Visitors Center, the Centennial Visitors Center and the Centennial Work Center. The route also serves local needs including commercial supply.

## FH 19 Dull Center Road

### Route Description

FH-19, Dull Center Road. This route starts at the junction with SR-59 in Bill and proceeds northeasterly 27.10 miles (43.61 km) over Converse CR-38, 5.90 miles (9.5 km) over Converse CR-39, 6.16 miles (9.91 km) over Weston CR-7A, 12.11 miles (19.48 km) over Weston CR-54 and 9.07 miles (14.59 km) over Weston CR-7C to the Junction with SR-450 near Clareton.

**Evaluation:** FH-19 is owned and operated by Converse County for the 27.0 miles on the south and by Weston County for the 33.2 miles on the north. It is functionally classified as a local road serving the Thunder Basin National Grasslands. According to Forest Service data, 50% of the traffic is Forest related. The primary uses of the Grasslands are grazing and oil and gas extraction. Several pipelines convey the petroleum products from the area. There are no public facilities maintained on the Grasslands. The road is fair to poor condition with marginal gravel surface for most of the route. An engineered gravel road in good condition serves the northern most 4.3 miles of the route from SR-450 to an oil company field office.

FH-21, Wilson - Fall Creek. This route starts at the junction with US-26/89 Southwest of Hoback Junction and proceeds northerly 7.65 miles (12.31 km) over FDR-31000 and 10.22 miles (16.44 km) over CR-2, to the junction with SR-22 in Wilson.

Evaluation: FDR-31000 is owned and operated by the Forest Service. CR-2 is owned and administered by Teton County. The south section of CR-2 is good while the paved section north of Mosquito Creek is fair. FDR-31000 is functionally classified as a local road and CR-2 a minor collector through the Bridger-Teton National Forest. According to Forest Service data, 100% of the traffic on FDR-31000 is Forest related while the traffic on CR-2 varies between 5% and 18%. The principal Forest resource served is recreation. The route also serves school buses, mail delivery and commercial supply.

# FH 21 Wilson-Fall Creek

## FH 22 Labarge Creek - Greys River

### Route Description

FH-22, Labarge Creek-Greys River. This route starts at the junction with US-189 south of Labarge and proceeds northerly 13.06 miles (21.01 km) over Lincoln CR-315 and 82.75 miles (133.14 km) over FDR-10138 to the junction with US-89 at Alpine.

Evaluation: Lincoln County owns and maintains CR-315 for the southerly 13 miles of FH-22. The balance of the route is FDR-10138, owned and maintained by the Forest Service. The entire route is functionally classified as a local road. The easterly 11.4 miles of CR-315 is a 20 foot pavement in poor condition. The 18 foot unpaved portion of CR-315 is also close to the river and would be difficult to widen. The first section of FDR-10138, in Sublette County, along with CR-315 are on private land providing access to the several ranches. Once FDR-10138 re-enters Lincoln county, the road enters the Bridger-Teton Forest and serves the recreational and grazing activities. The northern 35.4 miles of the route has been widened to 24 feet and provides a good gravel surface. The balance of the 47.6 miles in the Forest is from 14 to 18 feet wide of native materials in generally poor condition. The Forest Service has indicated that it intends to maintain this as a single-lane road with pullouts. This section also has two bridges that are only 14 feet wide and both need to be replaced.

## FH 22 Labarge Creek - Greys River

## FH 23 Louis Lake Road

### Route Description

FH-23, Louis Lake Road. This route starts at the junction with SR-28 near Atlantic City and proceeds northerly 27.65 miles (44.49 km) over FDR-300 and 9.08 miles (14.61 km) over SR-131 to the junction of US-287 in Lander.

Evaluation: FDR-300 is owned and operated by the Forest Service with the exception of the northerly 1.57 miles (2.53 km) which is owned and administered by Fremont County. The County section is good. SR-130 is owned and maintained by the Wyoming Department of Transportation. FDR-300 is functionally classified as a local road and SR-131 a major collector through the Shoshone National Forest. According to Forest Service data, 88% of the traffic on FDR-300 and 43% on SR-131 is Forest related. The principal Forest resource served is recreation, timber and grazing. It serves four Forest Service owned campgrounds, three trail heads, two picnic areas, a youth camp, the University of Missouri Geology Camp and the Sinks Canyon State Park. The route also serves school buses, mail delivery and commercial supply.

## FH 24 Firehole Canyon Road

## Route Description

FH-24, East Side Flaming Gorge Highway. This route starts at the end of the pavement at Firehole Marina and proceeds easterly 10.19 miles (16.40 km) over CR-33 to US-191 south of Rock Springs.

Evaluation: CR-33 is owned and operated by Sweetwater County. It is functionally classified as a minor collector serving the Flaming Gorge National Recreation Area (Ashley National Forest). According to Forest Service data, 8% of the traffic is Forest related. This must be in error since the principal use is to serve the Forest Service owned Marina. The principal Forest resource served is recreation.

## FH 24 Firehole Canyon Road

## FH 25 Buffalo Valley Loop

### Route Description

FH-25, Buffalo Valley Loop. This route starts at the junction with US-287/26, at the Pinto Ranch approximately 3.5 miles east of Moran Junction and proceeds easterly 9.87 miles (15.88 km) over CR-5, and then southerly 4.21 miles (6.77 km) over FDR-30050, looping back to US-287/26 near Fourmile Meadow.

Evaluation: CR-5 is owned and operated by Teton County. It is functionally classified as a minor collector. FDR-30050 is owned and operated by the Forest Service. It is functionally classified as a local road. According to Forest Service data, 75% of the traffic Forest related. The principal Forest resource served is recreation, mining and timber. It serves three Forest Service trail heads. The route also serves school buses, mail delivery and commercial supply.

## FH 26 Sage Creek Road

## Route Description

FH-26, Sage Creek Road. This route starts at the junction with SR-70 (FH-11), west of Encampment, and proceeds northerly 9.93 miles (15.98 km) over FDR-801, 33.99 miles (54.69 km) over CR-401 and 10.84 miles (17.44 km) over SR-71 to Higley Boulevard in Rawlins.

Evaluation: FDR-801 is owned and operated by Forest Service. It is functionally classified as a local road. CR-401 is owned and maintained by Carbon County. It is functionally classified as a minor collector. SR-71 is owned and operated by the Wyoming Department of Transportation. The State route is a major collector. The principal Forest resourceserved is recreation and grazing.

# FH 26 Sage Creek Road

## Pavement Condition

Map above shows the actual condition (paved sections only) which may not correspond to the average condition reported for each segment in the chart below. See Summary page i for more information.

## FH 27 Green River Lakes Road

## Route Description

FH-27, Green River Lakes Road. This route starts at the north end of SR-352 northwest of Pinedale and proceeds northerly and easterly 15.67 miles (25.21 km) over FDR-650 to the entrance to the Green River Lake Campground.

Evaluation: FDR-650 is owned and operated by the Forest Service. The whole route is functionally classified as a local road serving the Bridger-Teton National Forest. Close to 100% of the traffic is Forest related. The principal forest resource served is recreation and grazing. It serves two Forest Service owned campgrounds and the Kendall Guard Station.

# FH 27 Green River Lakes Road

## Pavement Condition

Map above shows the actual condition (paved sections only) which may not correspond to the average condition reported for each segment in the chart below. See Summary page i for more information.

TOTAL ROUTE LENGTH: 15.67 Miles

## FH 28 Smiths Fork Road

## Route Description

FH-28, Smiths Fork Road. This route starts at the junction with US-89 south of Smoot and proceeds easterly 23.46 miles (37.75 km) over FDR-10072 to a junction with FDR-10138 (FH-22).

Evaluation: FDR-10072 is owned and operated by the Bridger-Teton National Forest. The route is functionally classified as a local road. Close to 100% of the traffic is Forest related. The western 6.4 miles of the route was recently widened to 22-feet and graveled and is in good condition; the eastern 17.0 miles to junction with FH-22, Greys River Road, is a poor 18 foot native surface road. The route follows the historical Emigrant Trail (Lander Cutoff) and provides recreational access to the forest and several cattle camps associated with grazing operations. The Labarge Meadows Guard Station is the only Forest facility accessed by this route. The route does provide access to the Greys River and Labarge Creek from the west. This route is the western section of the only east-west access between US-89 on the west and US-191 on the east for almost 120 miles. The combination of FH-28 and the eastern section of FH-22 provides a link between these two highways. The access to the two rivers and the use as a cut across is the primary justification for this route.

## FH 28 Smiths Fork Road

## Pavement Condition

Map above shows the actual condition (paved sections only) which may not correspond to the average condition reported for each segment in the chart below. See Summary page i for more information.

TOTAL ROUTE LENGTH: 23.46 Miles

## FH 29 Douglas-Esterbrook Road

### Route Description

FH-29, Douglas-Esterbrook Road. This route starts at the Albany/Converse County Line, east of Esterbrook, and proceeds northerly 0.84 miles (1.35 km) over FDR-633, 10.61 miles (17.07 km) over CR-5 and 16.64 miles (26.77 km) over SR-94 to I-25 Business in Douglas.

Evaluation: FH-29 not only provides access to the Laramie Peak Unit of the Medicine Bow National Forest from I-25 in Douglas, but it serves as recreational access to the North Platte River. It is functionally classified as a minor collector except for FDR-633 which is a local road. They provide access to the Forest Service Esterbrook Work Center and the summer cabin community of Esterbrook in addition to general recreational and grazing access to the Forest. The bridge over Labonte Creek on the north end of CR-5 is structurally deficient and should be replaced. Continuing south, CR-5 is a narrow, winding road in a deep canyon following Mill Creek. Widening would require difficult and costly environmental and construction work. FDR-633 is adjacent to private property which would require right of way acquisition and the closeness of the cabins to the road in Esterbrook probably makes any additional width impossible to attain without removal of the cabins.

## FH 34 Mirror Lake Road

### Route Description

FH-34, Mirror Lake Road. This route starts at the north end of Utah Fh-34 at the State Line and proceeds northerly 22.49 miles (36.19 km) over SR-150 to I-80 in Evanston.

Evaluation: SR-150 is owned and operated by the Wyoming Department of Transportation. At present, the condition is generally good to fair. It is functionally classified as a major collector serving the Wasatch National Forest. The principal Forest resources served are recreation. The route also serves local needs including school buses, mail delivery and commercial supply.

## FH 76 Grand Targhee Road

## Route Description

FH-76, Grand Targhee Road. This route starts at the Idaho State Line and proceeds easterly 8.34 miles (13.42 km) over CR-15 to the Grand Targhee Ski Area parking lot.

Evaluation: CR-15 is owned and operated by the Teton County. It is functionally classified as a minor collector serving the Targhee National Forest. According to Forest Service data, 13% of the traffic is Forest related. This is low since the main purpose of the route is access to the Grand Targhee Ski area. The principal Forest resources served are recreation and grazing. The route also serves local needs including school buses, mail delivery and commercial supply.
