

Uses' do not apply to this system of records.

Specifically, records of the identity, diagnosis, prognosis, or treatment of any client/patient, irrespective of whether or when he/she ceases to be client/patient, maintained in connection with the performance of any alcohol or drug abuse, education, training, treatment, rehabilitation, or research which is conducted, regulated, or directly or indirectly assisted by any department or agency of the United States, shall, except as provided therein, be confidential and be disclosed only for the purposes and under the circumstances expressly authorized in 42 U.S.C. 290dd-2. This statute takes precedence over the Privacy Act of 1974 in regard to accessibility of such records, except to the individual to whom the record pertains.

The content of any record may be disclosed in accordance with prior written consent of the patient with respect to whom such record is maintained, but only to such extent, under such circumstances, and for such purposes as may be allowed under such prescribed regulations.

Information from records may be released without the member's consent in the following situations:

To medical personnel to the extent necessary to meet a bona fide medical emergency.

To qualified personnel for the purpose of conducting scientific research, management audits, or program evaluation, but such personnel may not identify, directly or indirectly, any individual patient in any report of such research, audit or evaluation, or otherwise disclose patient identities in any manner.

If authorized by an appropriate order of a court of competent jurisdiction granted after applications showing good cause, the court shall weigh the public interest and the need for disclosure against the injury to the patient, to the physician-patient relationship, and to the treatment services. Upon the granting of such order, the court, in determining the extent to which any disclosure of all or any part of a record is necessary, shall impose appropriate safeguards against unauthorized disclosures.

The above prohibitions do not apply to any interchange of records within the Armed Forces or within those components of the Department of Veterans Affairs furnishing health care to veterans or between such components and the Armed Forces.

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of the Technology and Media Services for Individuals with Disabilities program is to: (1) Improve results for children with disabilities by promoting the development, demonstration, and use of technology, (2) support educational media services activities designed to be of educational value in the classroom setting to children with disabilities, and (3) provide support for captioning and video description that is appropriate for use in the classroom setting.

Priority: In accordance with 34 CFR 75.105(b)(2)(iv) and (v), this priority is from allowable activities specified in the statute, or otherwise authorized in the statute (see sections 674 and 681(d) of the Individuals with Disabilities Education Act (IDEA)).

Absolute Priority: For FY 2007 this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

Technology and Media Services for Individuals With Disabilities—Steppingstones of Technology Innovation for Children With Disabilities

Background

The Department has made Steppingstones of Technology

Innovation for Children with Disabilities awards for several years under the Technology and Media Services for Individuals with Disabilities program. Starting in FY 2005, awards were limited to two phases, Development and Research on Effectiveness. Abstracts of projects funded under these two phases can be found at http://www.nichcy.org/directories/4_volume2006.pdf. (See projects funded under CFDA 84.327A with Beginning Dates of September 1, 2005 or later.)

Priority

Applicants must—

(a) Describe a technology-based approach for improving the results of early intervention, response-to-intervention assessment techniques, or preschool, elementary, middle school, or high school education for children with disabilities. The technology-based approach must be an innovative combination of new technology and additional materials and methodologies that enable the technology to improve educational, assessment, or early intervention results for children with disabilities;

(b) Present a justification, based on scientifically rigorous research or theory, that supports the potential effectiveness of the technology-based approach for improving the results of early intervention, response-to-intervention assessment techniques, or preschool, elementary, middle school, or high school education for children with disabilities. Results studied under this priority must focus on child outcomes, rather than on parent or professional outcomes. Child outcomes can include improved academic or pre-academic skills, improved behavioral or social functioning, and improved functional performance, provided that valid and reliable measurement instruments are employed to assess the outcomes. Technology-based approaches intended for use by professionals or parents are not appropriate for funding under this priority unless child-level benefits are clearly demonstrated. Technology-based approaches for professional development will not be funded under this priority;

(c) Provide a detailed plan for conducting work in one of the following two phases:

(1) *Phase 1—Development:* Projects funded under Phase 1 must develop and refine a technology-based approach, and test its feasibility for use with children with disabilities. Activities under Phase I of the priority may include development, adaptation, and

refinement of technology, materials, or methodologies. Activities under Phase 1 of the priority must include formative evaluation of the technology-based approach's usability and feasibility for use with children with disabilities. Each project funded under Phase 1 must be designed to develop, as its primary product, a promising technology-based approach that is suitable for field-based evaluation of effectiveness in improving results for children with disabilities.

(2) *Phase 2—Research on Effectiveness:* Projects funded under Phase 2 must select a promising technology-based approach that has been developed and tested in a manner consistent with the criteria for activities funded under Phase 1, and subject the approach to rigorous field-based research to determine effectiveness in educational or early intervention settings. Approaches studied through projects funded under Phase 2 may have been developed with previous funding under Phase 1 of this priority or with funding from other sources. Phase 2 of this priority is primarily intended to produce sound research-based evidence that demonstrates that the technology-based approach can improve educational or early intervention results for children with disabilities in a defined range of real world contexts.

Projects funded under Phase 2 of this priority must conduct research that poses a causal question and must employ randomized assignment to treatment and comparison conditions, unless a strong justification is made for why a randomized trial is not possible. If a randomized trial is not possible, the applicant must employ alternatives that substantially minimize selection bias or allow it to be modeled. These alternatives include appropriately structured regression-discontinuity designs and natural experiments in which naturally occurring circumstances or institutions (perhaps unintentionally) divide people into treatment and comparison groups in a manner akin to purposeful random assignment. In their applications, applicants proposing to use an alternative system must (1) make a compelling case that randomization is not possible, and (2) describe in detail how the procedures will result in substantially minimizing the effects of selection bias on estimates of effect size. Choice of randomizing unit or units (e.g., students, classrooms, schools) must be grounded in a theoretical framework. Observational, survey, or qualitative methodologies may complement experimental methodologies to assist in the identification of factors that may

explain the effectiveness or ineffectiveness of the technology-based approach being evaluated. Applications must provide research designs that permit the identification and assessment of factors that may have an impact on the fidelity of implementation. Mediating and moderating variables that are both measured in the practice or model condition and are likely to affect outcomes in the comparison condition must be measured in the comparison condition (e.g., student time-on-task, teacher experience, and time in position).

Projects funded under Phase 2 of this priority must conduct comprehensive research in order to provide convincing evidence of the effectiveness or ineffectiveness of the technology-based approach under study, at least within a defined range of settings. Applicants must provide documentation that available sample sizes, methodologies, and treatment effects are likely to result in conclusive findings regarding the effectiveness of the technology-based approach;

(d) Provide a plan for forming collaborative relationships with vendors and/or other dissemination or marketing resources to ensure that the technology-based approach can become widely available if sufficient evidence of effectiveness has been obtained. Applicants should document the availability and/or participation of dissemination or marketing resources. Applicants are encouraged to plan these collaborative relationships early in their projects, even in Phase 1 (if applicable), but should refrain from widespread dissemination of the technology-based approach to practitioners until evidence of its effectiveness has been obtained;

(e) Budget for the project director to attend an annual two-day Project Directors' meeting in Washington, DC, and another annual two-day trip to Washington, DC to collaborate with the Federal project officer and the other

projects funded under this priority to share information, and to discuss findings and methods of dissemination; and

(f) Budget five percent of the grant amount annually to support emerging needs as identified jointly through consultation with the OSEP project officer.

If the project maintains a Web site, include relevant information and documents in a format that meets a government or industry-recognized standard for accessibility. If the project produces instructional materials for dissemination, it must produce them in accessible formats, including complying with the National Instructional Materials Accessibility Standard (NIMAS) for textual materials.

Within this absolute priority, we intend to fund at least two projects led by a project director or principal investigator who is in the initial phase of his or her career. For purposes of this priority, the initial phase of an individual's career is considered to be the first three years after the individual completes and graduates from a doctoral program (i.e., for FY 2007 awards, projects may support individuals who completed and graduated from a doctoral program no earlier than the 2003–2004 academic year). To qualify for this consideration, the applicant must explicitly state and document that the project director or principal investigator is in the initial phase of his or her career. At least 50 percent of that individual's time must be devoted to the project.

Within this absolute priority, we also intend to fund at least two projects focusing on technology-based approaches for children with disabilities, ages birth to age three, and to fund at least two projects focusing on technology-based approaches to response-to-intervention assessment techniques.

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act

(APA) (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed priorities. However, section 681(d) of the IDEA makes the public comment requirements of the APA inapplicable to the priority in this notice.

Program Authority: 20 U.S.C. 1474 and 1481.

Applicable Regulations: The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75, 77, 79, 80, 81, 82, 84, 85, 86, 97, 98, and 99.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian tribes.

Note: The regulations in 34 CFR part 86 apply to IHEs only.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: The Administration has requested \$31,063,000 for the Technology and Media Services for Individuals with Disabilities program for FY 2007, of which we intend to use an estimated \$2,670,000 for the Steppingstones of Technology Innovation for Children with Disabilities competition. The actual level of funding, if any, depends on final congressional action. However, we are inviting applications to allow enough time to complete the grant process if Congress appropriates funds for this program.

Maximum Award: Phase 1: \$200,000, per year and Phase 2: \$300,000, per year. We will reject any application that proposes a budget exceeding the maximum award for a single budget period of 12 months. The Assistant Secretary for the Office of Special Education and Rehabilitative Services may change the maximum amount through a notice published in the **Federal Register**.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210 and are listed in the application package.

2. *Treating a Priority as Two Separate Competitions:* In the past, there have been problems in finding peer reviewers without conflicts of interest for competitions in which many entities throughout the country submit applications. The Standing Panel requirements under IDEA also have placed additional constraints on the availability of reviewers. Therefore, the Department has determined that, for some discretionary competitions, applications may be separated into two or more groups and ranked and selected for funding within the specific group. This procedure will ensure the availability of a much larger group of reviewers without conflicts of interest. It also will increase the quality, independence, and fairness of the review process and permit panel members to review applications under discretionary competitions for which they have also submitted applications. However, if the Department decides to select for funding an equal number of applications in each group, this may result in different cut-off points for fundable applications in each group.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN). We may also notify you informally.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Reporting:* At the end of your project period, you must submit a final

performance report, including financial information, as directed by the Secretary. If you receive a multi-year award, you must submit an annual performance report that provides the most current performance and financial expenditure information as specified by the Secretary in 34 CFR 75.118.

4. *Performance Measures:* Under the Government Performance and Results Act of 1993 (GPRA), the Department has developed measures that will yield information on various aspects of the quality of the Technology and Media Services for Individuals with Disabilities program. These measures focus on the extent to which projects are of high quality, are relevant to the needs of children with disabilities, and contribute to improving the results for children with disabilities. Data on these measures will be collected from the projects funded under this competition.

Grantees also will be required to report information on their projects' performance in annual reports to the Department (34 CFR 75.590).
