

**SABIT GROUP PROGRAM
WATER RESOURCE MANAGEMENT FOR CENTRAL ASIA,
WESTERN EURASIA & CAUCASUS**

MARCH 29 – APRIL 26, 2008

PROGRAM TOPICS

Municipal and Industrial Infrastructure

Intake facilities
Treatment plants and facilities
Distribution, transmission & storage: Water mains,
storage tanks, towers reservoirs
Sewer Systems
Wastewater treatment

Management and Finance

Rate Structuring/Pricing
Financing: bond issuances, usage fees
Utility privatization
Human resources and staff training
Quality control
Certification
Watershed management policies
IT applications
Water reclamation

Industry Organizations and Regulatory Issues

Federal, state and regional regulatory agencies
Environmental Protection Agency
U.S. Geological Survey
Industry associations
Professional organizations
Water rights

Equipment and Materials

Pumps
Valves
Piping
Sampling, monitoring and testing
Meters
Backflow devices
Soil sampling

New Technology and Concepts

Water pollutant trading
Energy efficiency
Source water protection
Disinfection: Ozone, ultraviolet
Reverse osmosis technologies
Evapotranspiration
Pipe materials and construction
Decentralized wastewater system

FOR MORE INFORMATION

This is not an exhaustive list. Host companies are invited to discuss any of these and other topics related to water resource management.

For more details on specific interests, or to learn how you can participate, please contact:
