${ }^{1}$ Incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: (N/EH) x 200,000 where
$\mathrm{N} \quad=$ number of injuries and illnesses
EH = total hours worked by all employees during the calendar year
200,000
= base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).
${ }^{2}$ Totals include data for industries not shown separately.
${ }^{3}$ Standard Industrial Classification Manual, 1987 Edition.
${ }^{4}$ Employment is expressed as an annual average and is derived primarily from the BLS-State Covered Employment and Wages program.
${ }^{5}$ Total lost workday cases involve days away from work, or days of restricted work activity, or both.
${ }^{6}$ Days-away-from-work cases include those which result in days away from work with or without restricted work activity.
${ }^{7}$ Excludes farms with fewer than 11 employees
${ }^{8}$ Data conforming to OSHA definitions for mining operators in coal, metal, and nonmetal mining and for employers in railroad transportation are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor; and the Federal Railroad Administration, U.S. Department of Transportation. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries.
${ }^{9}$ Incidence rate less than 0.05 .

NOTE: Because of rounding, components may not add to totals.
n.e.c. $=$ not elsewhere classified.
-- Indicates data not available.
