Incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: $(\mathrm{N} / \mathrm{EH}) \times 200,000$ where
$\mathrm{N} \quad=$ number of injuries and illnesses
$\mathrm{EH} \quad=$ total hours worked by all employees during the calendar year
= base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).
${ }^{2}$ Totals include data for industries not shown separately.
${ }^{3}$ Standard Industrial Classification Manual, 1987 Edition.
${ }^{4}$ Total lost workday cases involve days away from work, or days of restricted work activity, or both.
${ }^{\text {b }}$ Days-away-from-work cases include those which result in days away from work with or without restricted work activity.
${ }^{6}$ Excludes farms with fewer than 11 employees.
' Data conforming to OSHA definitions for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are
excluded from the coal, metal, and nonmetal mining industries. Data for Mining (Division B in the Standard Industrial Classification Manual, 1987 edition) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.
${ }^{\text {y }}$ Data conforming to OSHA definitions for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded.
${ }^{y}$ Data conforming to OSHA definitions for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.
${ }^{10}$ Incidence rate less than 0.05 .

NOTE: Because of rounding, components may not add to totals.
n.e.c. $=$ not elsewhere classified.
-- Indicates data not available.
